Built Environment & Geography Catalogue

July - December 2025
New and Forthcoming Titles

Welcome

Welcome to the July to December 2025 Built Environment & Geography Catalogue.

We welcome your feedback on our publishing programme, so please do not hesitate to get in touch – whether you want to read, write, review, adapt or buy, we want to hear from you, so please visit our website below or please contact your local sales representative for more information.

www.routledge.com

*Prices are correct at time of going to press and may be subject to change without notice.
Some titles within this catalogue may not be available in your region.*

eBooks

We have over 50,000 eBooks available across the Humanities, Social Sciences, Behavioural Sciences, Built Environment, STM and Law, from leading Imprints, including Routledge, Focal Press and Psychology Press. These eBooks are available for both individual and institutional purchase.

INDIVIDUALS

Our eBooks are available from Amazon, Apple iBookstore, Google eBooks, Ebooks.com, Kobo, Barnes & Noble, Waterstones, Mobipocket, VitalSource, and CourseSmart.

LIBRARIES AND INSTITUTIONS

Subscribe to or purchase a wide range of eBook packages or pick and mix your own from our complete collection (a minimum number of titles applies). FREE TRIALS are available. For more information, please visit www.tandfebooks.com or contact your local sales team.

eUpdates

Register your email at www.tandf.co.uk/eupdates to receive information on books, journals and other news within your area of interest.

A New Domesticity

The changing nature of our experience of the home

Laura Mark

This book will question the complex relationship between home and architecture, analysing how we experience our homes and domestic environments. It will critique the established concept of 'home' rather than reaffirming it and look at what 'home' means when technology is changing its very nature. With illustrated examples and case studies, this book is predominantly a student textbook which will link theories around people's experience of the home.

Alvar Aalto and Urban Design

Robert Cody , Angela Amoia

This book provides a fresh look at Alvar Aalto's regional and community planning work, particularly the ways in which he incorporated sustainability, resiliency, energy, and health, and examines how contemporary architects and planners can learn from this approach for the betterment of 21st century urban design and our future cities. This is an essential read for all those interested in the urban design work of Alvar Aalto. Written in an accessible way for those new to the work of Aalto, Architecture and Urban Design students of all levels will also find this a helpful guide on ecologically and socially responsible design.

Alvar Aalto in the Finnish Context

Edited by **Aino Niskanen , Kirmo Mikkola , Juhani Pallasmaa , Gareth Griffiths**

Series: Routledge Research in Architecture

This book, first published in Finnish in 1985 under the title Aalto, is a critical introduction to Finnish architect Alvar Aalto (1898-1976), written by one of Aalto's Finnish architectural contemporaries, Kirmo Mikkola (1934-1986). The book is divided into six sections dealing with different aspects of Aalto's architecture, from his classical beginnings to urban planning, as well as his various professional and intellectual associates.

Apartment Block Design

Massing Matters

Simos Vamvakidis

This architectural design book focuses on massing studies for multi-unit housing projects; namely apartment blocks. It provides a fresh look at architectural synthesis for architects, students and architecture curious readers, focusing on multi-unit housing projects. The book re-examines the apartment block as a design model, for today and tomorrow, through a simple, flexible and explicit design approach. The innovation of this book lies in the idea that any type of apartment block can be designed and understood using three basic fundamental elements: Housing Units, Circulation and Communal Spaces.

4TH EDITION

Architect's Legal Pocket Book

Matthew Cousins Practicing architect and member of the Royal Institute of British Architects, UK

Series: Routledge Pocket Books

This handy pocket guide covers key legal principles which will help you to quickly understand the law and where to go for further information. Now in its fourth edition, this bestselling book has been fully updated throughout to provide you with the most current information available. Illustrated with clear diagrams and featuring key cases, it is a comprehensive guide to current law for architects and an invaluable source of information. It is a book no architect should be without.

Architectural Thinking in a Climate Emergency

Edited by **Sofie Pelsmakers , James Benedict Brown**

What is the role of architecture — and the architect — in the Anthropocene? Architects agree that the profession must change. But we lack the tools and knowledge to undertake the transformations that are urgently needed. This book aims to address that need through 15 chapters illustrating how we can act collectively to make a difference. It brings together writers, researchers, educators, students, and practitioners working at the forefront of this transformation. Above all, they each affirm the architect's responsibility to help transition toward carbon-neutral, sustainable practices that advance social and environmental justice.

Architecture and Social Sustainability

Understanding the New Paradigm

Edited by Alexandra Staub Penn State University, University Park, PA

Architecture and Social Sustainability shows how we can better design for stakeholder agency, serve historically marginalized populations, and further our theoretical thinking about sustainability writ large. With chapters exploring both the urban and the building scale, this volume examines the design of buildings and urban settings to illustrate how we can create more inclusive and equitable communities through broadening our design approach. Essential reading for architects and urban designers seeking alternatives to conventional practice, as well as educators and students incorporating social sustainability as a foundational design concept.

Architectures of Art and Design Education

An exploration of UK and international design schools

Neil Drabble, Rose Gridneff

The Art School has had a fundamental effect on society, both UK and international: influencing how the art world is presented, perceived and interacted with. In this highly illustrated book, the authors highlight how the physical studios and workshops designed for learning, teaching and making, influence and interact with curriculum, creativity, practice and community. Exploring a drastically shifting landscape, it celebrates the crucial relationship between the creative working spaces and the development of creative minds. A timely reflection on the position of arts education in relation to the current social and political landscape.

Climate Adaptation for Architects

A Design Toolkit

Allison Anderson

Architecture must adapt to protect people from the threat of climate change. About half of the world's population lives in contexts that are highly vulnerable to climate change as hazards continue to intensify. Climate Adaptation for Architects presents 45 adaptation tactics responding to the most consequential effects of climate change: heat, water, wind, and resource scarcity. Each chapter includes images, definition, background information, key design issues, potential impacts, and resources for further information. This is a valuable resource for all architects, landscape architects, urban planners, developers, and policy makers.

Collaborations in Architecture and Sociology

Anita Bakshi, Zaire Dinzey-Flores

This book, by an architect and a sociologist, addresses the disconnect between the design of the built environment and social life and lays out a pathway for interdisciplinary engagement. Through this collaboration, the authors create a new interdisciplinary orientation and methodology, termed SOCIOARC, that recognizes the relationship of the built form and aesthetics to social experience. Accessibly written and illustrated, this book will be an essential resource for undergraduate- and graduate-level students of sociology, architecture, urban design, landscape architecture, and planning, and all those interested in shaping a more just, equitable society through our built environment.

Craft Theory and Contemporary Architecture

Grant Alford

This book offers a comprehensive exploration of craft theory in relation to contemporary architecture. Craft is an old and familiar idea, but the line between craft and art or craft and mere manufacturing, for example, is notoriously hard to describe. Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand, design, and construct the built environment. Written for students and scholars, this book challenges and extends the legacy of craft thinking in architecture.

Design for Construction

Tectonic Imagination in Contemporary Architecture

Eric Höweler

This book explores projects and practices that span the gap by thinking through materials and processes with what Höweler calls a tectonic imagination. Design for Construction is organized into 10 chapters covering topics such as means and methods, part-to-whole relationships, material research, digital design workflows, risk mitigation, construction sequencing, digital fabrication, ethical material sourcing, and circular construction practices. Höweler provides a careful analysis of over 200 buildings projects by practices. This book will be crucial reading for both architects and students of architecture.

Design for Physical Medicine and Rehabilitation

Samira Pasha , Mardelle McCuskey Shepley

This book provides a brief introduction to Physical Medicine and Rehabilitation and its historical and global context for readers interested in the role of design. It introduces various settings where rehabilitation can be provided and their relevant patient demographics, influential trends, and available research to paint a full picture for readers who wish to better understand this field. The book lays the groundwork for making design decisions by sharing available standards, project case studies, environment & behaviour literature, and applicable theories.

Designing with Algorithms

A Mathematical Guide

Arash Soleimani

Computing is revolutionizing the creative process, transforming how designers approach ideation, prototyping, fabrication, communication, and presentation. Yet, many lack the foundational knowledge needed to fully harness its potential. Designing with Algorithms: A Mathematical Guide bridges this gap, offering a comprehensive, step-by-step exploration of algorithmic practices applicable across diverse design fields. Whether you're a student, practitioner, or enthusiast, this book empowers you to future-proof your design practice and unlock the creative potential of computation.

Digital Records, Heritage Conservation and Post-earthquake Re-construction in Chile

Bernadette Devilat L.

Series: Routledge Research in Architectural Conservation and Historic Preservation

The conservation of built heritage implies constant intervention. One form of intervention is reconstruction, which, in the context of disasters, usually tries to bring buildings and places back to their previous state and is contested in heritage discourses. This book challenges reconstruction as a replica to physically preserve damaged built heritage by critically examining a context of constant change resulting from earthquakes — Chile — advocating for the digital record to be an analytical basis for design, following the principles embedded in vernacular domestic architecture.

Dual Cities

Social Housing in London & New York

Karakusevic Paul, Althorpe Mike

With comparable global ambitions, post-industrial economies and international demographics, there is much that unites the cities of London and New York. Growing up in tandem and maturing as urban democracies during the 19th and 20th centuries, they have learnt from one another and have both exerted incredible influence on the shape and form of cities around the world. In the 21st century, as both grapple with a crisis of housing affordability and ageing dwelling stock, the two cities are united once more around forging a new era for urban housing and social equity.

Embodied Carbon for Sustainable Building Conservation

Edited by **Oriel Prizeman** Cardiff University, United Kingdom

This timely volume provides the latest research, guidance, examples, and methods for understanding, calculating, leveraging, and reducing embodied carbon in building conservation. In this book, an international and multi-disciplinary group of authors offer perspectives on the leverage and implementation of strategies to account for embodied carbon for the conservation of the historic environment. This will be an essential resource for all building conservation and heritage practitioners including building surveyors, architects, conservators, engineers, conservation officers, building archaeologists, and consultants.

Finishing in Architecture

Polishing, Completing, Ending

Edited by **Paul Emmons** Virginia Tech, USA, **Marcia Feuerstein**, **Negar Goljan**

Finishing in Architecture: Polishing, Completing, Ending explores the topic of finishing and the fascinating physical and metaphysical implications of its various conceptions in architecture. Finishing is essential to all human practices and concepts of time, yet simultaneously it is largely impossible to identify an entirely finished state of being. From the material to the procedural and the conceptual, this volume explores the practices of finishing in architecture within three currents: surfaces, projects, and most broadly, architectural times. It will be of interest to students and instructors of architecture and design, architectural historians, and other scholars.

Form Follows Fuel

14 Buildings from Antiquity to the Oil Age

Florian Urban, Barnabas Calder

Consisting of 14 accessibly-written case studies, this book is the first to quantify energy inputs for a range of buildings worldwide and across the historical record. In the process it throws up both detailed challenges and practical solutions to today's ecological crises, highlighting the aspects of today's buildings that make architecture responsible for 37% of human climate-changing emissions, and revealing the enormously lower impacts of historical alternatives to today's default building practices. The book is an important contribution to architectural historical research, written for academics and building professionals as well as for a general audience.

5TH EDITION

Guide to JCT Standard Building Contract 2024

Sarah Lupton , Manos Stellakis

The latest edition of the JCT Guide series provides a practical, comprehensive overview of the 2024 JCT Standard Contract suite (SBC/Q, SBC/AQ, and SBC/XQ). It organises and explains all provisions, procedures, and conditions by subject, clearly outlining the obligations of various parties and addressing key contractual issues that may arise during a project—supported by the most recent legislation and case law. Key features of the 2024 edition: *Detailed analysis of the JCT Standard Building Contract 2024, explaining every update. *Coverage of recent legislative changes, including the Building Safety Act, Building Regulations Part 2A and Procurement Act 2023.

Institution Architecture: Building the Avant-Garde

A Sociological Approach

Lina Stergiou

Series: Routledge Research in Architecture

Institution Architecture: Building the Avant-garde takes a terminological, sociological and semiological approach that develops by tracing the 'avant-garde' in a century span of literatures for a textual analysis, unpacking the text, and in a process analysis, interpreting it.

Routledge
August 2025 : 330pp

2ND EDITION

Introducing Architectural Tectonics

Exploring the Intersection of Design and Construction

Chad Schwartz Southern Illinois University–Carbondale, USA

The second edition of Introducing Architectural Tectonics is an exploration of the poetics of construction. Tectonic theory is an integrative philosophy examining the relationships formed between design, construction, and space while creating or experiencing a work of architecture. In this text, author Chad Schwartz presents an introductory investigation into tectonic theory, subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike. This second edition has been updated to include the tectonic analysis of four new architectural precedents, from Nigeria, Burkina Faso, Mexico and China.

Metaphoric Architecture

Transforming Ideas into 3D Form

Michael C. Abrams

Metaphoric Architecture focuses on a fundamental but often challenging part of the beginning design phases – how to take an abstract idea and transform it into a three-dimensional object, space or building. Through media experimentation, analysis of innovative case studies and hands-on exercises, Abrams guides the reader through the early stages of design. It will be the ideal studio companion for beginning students of both architecture and interior design, with a wide range of architectural lessons that include abstraction, design fundamentals, concept development, building design, case-study analysis, and site-to-building relationships.

2ND EDITION

Neuro-Inclusive Community Design

Lessons from Sólheimar Ecovillage

Charles Durrett

This book is an inspiring exploration of Sólheimar Ecovillage in Iceland, a pioneering community that embodies sustainability, social responsibility, and inclusivity. Cohousing expert, Charles Durrett delves into the unique aspects of this ecovillage, about 100 residents, 45 of those include those with developmental and intellectual disabilities, live and thrive alongside neighbors in a safe and enriching environment. It will have a broad audience of architects, designers, occupational therapists, mental health professionals, housing developers, practitioners in housing and social care, among others.

New Scottish Houses

Contemporary architecture and living in the landscape

Isabelle Priest

New Scottish Houses: Contemporary Architecture and Living in the Landscape brings together for the first time the best examples of contemporary rural houses in Scotland. Showcasing the new rural vernacular that has developed in Scotland over the past 20 years, it presents this rich seam of architecturally designed houses as a new, exciting and specific movement that aims to be distinctly Scottish. Exploring the fusion of modern design with Scotland's rugged natural beauty, each case study explores a curate collection of contemporary homes that push the boundaries of design – from remote highlands to coastal hideaways.

Nietzsche for Architects

Lucy Huskinson University of Bangor, Wales, UK

Series: Thinkers for Architects

In the bewildering array of architectural positions that lay claim to Nietzsche as an influence, how can we begin to make sense of Nietzsche's own approach to architecture? And how can we identify within his complex philosophy the key ideas and themes we require to make sense of his contribution to architecture? This first introduction to Nietzsche's philosophy written specifically for architects locates his evaluation of appropriate and inappropriate architecture in the body of his writings and presents a clear overview of Nietzsche's insights into architectural design alongside his advice for architects and designers.

Reinventing Modern Architecture in Greece

From Sentimental Topography to Ekistics

Marianna Charitonidou

Series: Routledge Research in Architecture

The book examines the connection between the politics of the Marshall Plan and urban planning and identifies the key players, such as the Greek architect and urban planner Constantinos A. Doxiadis and the Italian industrialist Adriano Olivetti. It also explores the architects of the Mataroa mission, who played a vital role in the cross-fertilisation between France and Greece, and the role of travel to Greece for architects during the nineteenth century.

2ND EDITION

Remembering Places: A Memoir

Joseph Rykwert University of Pennsylvania, USA

Born in Warsaw in 1926, Joseph Rykwert was one of the best-known critics and historians of architecture. One of very few writers to be awarded the RIBA's highest honour, the Royal Gold Medal, in 2014, and author of countless books and essays, his influence over the past 60 years cannot be underestimated. In this new edition of his memoir, he posthumously expands upon the first edition. He spent most of his working life between the US and UK, and worked as a designer, teacher and a writer; as such, his groundbreaking ideas and work have had a major impact on the thinking of architects and designers since the 1960s, and continue to do so to this day.

2ND EDITION

Residential Retrofit

24 Case Studies

Marion Baeli

The essence of sustainability in buildings is their capability to adapt to change over time. The UK has a large housing stock that has been developed and evolved over generations, and become the fabric and character of our cities, towns and neighbourhoods. The capability of buildings to adapt to changing lifestyles is the root of their sustainability. This book presents a series of innovative and best practice case studies of residential low energy retrofit projects, and illustrates what has been achieved in practice in the UK.

Reuse of Architectural Components

Bailey Bestul

As the need for a circular construction industry becomes progressively more apparent, building practitioners are increasingly turning to salvaged building components to construct new projects. Yet the aesthetic potential of reused materials remains underexplored. Drawing from art history, architectural theory and constructed works, this book develops a set of design strategies practitioners might employ to develop thoughtful, architecturally rigorous reuse projects. It is essential reading for professionals interested in integrating reuse in their architectural practice.

Routledge Critical Companion to Race and Architecture

Edited by **Felipe Hernández**, **Itohan Osayimwese**

Series: *Routledge International Handbooks*

This book explores the malleability of race as a construct, one subject to continuous redefinitions in different times, cultures and places. While race has been deployed historically to establish hierarchies in a modern-colonial world, it also has acquired the capacity to challenge those hierarchies, enabling critical engagements with epistemic positions that have been excluded from univocal Eurocentric architectural narratives. It is essential reading for anyone studying or working in the built environment.

Routledge Handbook of Neuroscience and the Built Environment

Edited by **Alexandros A. Lavdas**, **Ann Sussman** Boston Architectural College, USA, **A. Vernon Woodworth**

Series: *Routledge International Handbooks*

According to the OECD (Organization for Economic Cooperation and Development), in the 21st century, we are living in a New Age of Biology, acknowledging the rapid development of transformative findings in the life sciences. The Routledge Handbook of Neuroscience and the Built Environment shows how these new findings impact architecture, planning and design, changing our understanding of how people respond to their surroundings, and how they can be optimized for our wellbeing. This volume will be important reading for the design community, whether practicing, educating, or studying, as well as policy makers and public health professionals.

Rural Design for the Future

Dewey Thorbeck University of Minnesota, USA

Design thinking and the problem-solving process of design is a strategic resource. Through creativity, innovation, and entrepreneurship it can help communities optimize limited land and water resources in urban and rural landscapes. To address the problems facing communities, it connects human, animal, and environmental health through design for both urban and rural regions. This book provides a methodology for holistically crossing borders and connecting issues to nurture new design thinking and collaborative problem solving. It will allow designers, architects, policymakers and citizens to envisage the solutions to some of the most pressing issues in rural design.

Sacred Modernity

Anglican Church Architecture in Mid-Twentieth Century Britain

Lorenzo Grieco

Series: *Routledge Research in Architecture*

This book examines mid-20th-century Anglican church architecture in Britain, from the 1935 to the 1975, exploring how it was shaped by liturgical changes, social shifts, and artistic influences. It investigates the theoretical foundations of modern Anglican church design and the contributions of various denominations to shared worship spaces. Amidst the rise of research groups, publications, and photographic documentation, the book highlights the subject's significance in this period.

SOFT Design

Aesthetic Experience at the Intersection of Materials, Technology & Interaction

Liliana Becerra

Soft Design explores an emerging design language of emotional aesthetics that merges emotive and sensory design with ancient and new technology to create multidimensional and multisensorial experiences. Soft Design integrates tangible and intangible expression of the aesthetic experience with scientific research. This will be interesting reading for a wide range of design practitioners – interior, industrial, interaction, spatial, digital, sensory, and UX designers – as well as those working in neuroaesthetics and in the converging fields of health, science and design.

The Adaptive Nature of Design Ethics Discourse

Philippe d'Anjou

Series: *Routledge Research in Architecture*

How do designers navigate the ethical discursive territories of design thinking and practice when the same common terms they consistently use across the different design ethics paradigms—like fair, right, good—convey different meanings? Delving into the dynamic and adaptable nature of ethical language and terminology in design, this book argues that it is intrinsically flexible—what can be described as chameleonic. Engaging in a meta-ethical investigation, this book elucidates the interconnections of key terms of design ethics discourse and explores the way in which different frameworks of design ethics both diverge and intersect.

The Berlin Tenement and the City

Katharina Borsi

Series: Routledge Research in Architectural History

The Berlin Tenement and the City describes the development of the Berlin tenement from 1860 to 1914, showing how it became both Berlin's standard housing type and its principal urban component – the city's ubiquitous typology. In contrast to earlier historical categorisations of the tenement as a "rental barrack", here it is described as an evolving typology that dynamically responded to the demands of the city and urban reform.

The Conquest of Istanbul and the Manipulation of Architecture

The Islamist-nationalist Rhetoric of Conquest and Melancholy

Berin F. Gür

Series: Routledge Research in Architecture

This book explores the contemporary memory of the Ottoman conquest of Constantinople (Istanbul) in 1453. It focuses on how the conquest is remembered by Islamist-nationalist imagination in Turkey today and how architecture plays a role in shaping this memory, underscoring its susceptibility to political manipulation.

4TH EDITION

The Green Studio Handbook

Strategies for Decarbonization

Alison G. Kwok, Walter T. Grondzik, Tom Hahn

Making the complexities of green architecture accessible to the design studio, The Green Studio Handbook remains a must-read for current and future architects. The heart of this book provides 43 comprehensive design strategies covering the building envelope, lighting, heating, cooling, energy & electricity, and water & waste – each with a description, key architectural issues, implementation considerations, and a step-by-step design procedure for integration early in the design process. All case studies are brand-new to this fourth edition and include a wide range of building types, from the USA, Colombia, Rwanda, Malaysia, Denmark, Bhutan, Canada, and Australia.

The Interiors Theory Primer

William Mangold

In a world where life is increasingly defined by interior conditions, this Primer provides insight into the significance of interior spaces and experiences. Organized into three sections, this book addresses long-standing issues at the core of interiors, starting with questions of experience and inhabitation, before moving to emerging areas of concern such as virtuality, biophilia, and social justice. The Interiors Theory Primer provides both interior design students and instructors, a clear and cohesive structure to understand and engage the important contributions that comprise interiors theory from core to emerging areas of the discipline.

The Mannerist Phase in Architecture

On Early Style

Lina Malfona

This book frames mannerism as an inescapable stage in the creative process. The mannerist phase is usually an adolescent stage of language, preceding the consolidation of thought. It is that period, as fertile as it is anguished, in which each author engages in a dialogue with his or her past, reinterpreting or completely transforming it. The mannerist phase is that period when architects design spaces, not yet knowing what it means to design places.

The New Luxury

Individuality, quality and sustainability in interior design

Dean Keyworth

This book explores what 'luxury' in interior design means today and how to achieve it, and provides inspirational examples of projects from a range of designers that meet the parameters of quiet luxury. Like many other sectors, interior design can be polarised: the luxury, unattainable end, and the cheap and cheerful lower end. This book disregards this dichotomy and shows how designers can avoid a throw-away culture, cleaving to that idea of longevity and high-quality above the cheap and flimsy, even for those with smaller budgets. Illustrated with beautiful examples of projects.

The Routledge Handbook of Architecture and Anthropology

Contemporary Approaches to a Cross-Disciplinary Field

Edited by **Marie Stender**, **Claus Bech-Danielsen**, **Aina Landsverk Hagen** Oslo and Akershus University College of Oslo, Norway, **Madlen Kobi**, **Ying Zhou**

Series: *Routledge International Handbooks*

This Handbook provides fresh insights into the debates and challenges that unfold in the cross-disciplinary field of architecture and anthropology. Based on studies of empirical contexts across the globe, the authors launch and test a broad variety of methods and advance various theoretical concepts.

The superREUSE Manifesto

Graeme Brooker The Royal College of Art, UK

The superREUSE Manifesto is a critical exploration of ideas, research and practices in reuse. -Reuse identifies insights into cities, buildings, interiors and objects constructed through working with extant material. Super is an elevated pitch for a 21st century that is characterised by responses to the challenges of the climate emergency and social justices. The superREUSE Manifesto coalesces ideas in the designed and built environment that react and work with these challenges. It is an uncompromising collection of ideas and propositions designed to stimulate its reader to rethink their position in relation to how we must transform everything into its superREUSE.

Upkeep, Repair, and Maintenance in Adaptive Interiors

Edited by **Amy Campos** California College of the Arts, USA, **Deborah Schneiderman** Pratt Institute, USA, **Keena Suh**, **Karyn Zieve** Pratt Institute, USA

This volume explores issues of repair, maintenance, sustenance, and adaptation within the context of interior design and its histories. This will be of great interest to all students and academics of interior design, as well as architecture, architectural conservation, visual culture, history of art, and all those interested in the theory and philosophy of the reuse of interiors.

Virtual Reality

Architecture, Culture, and the Body

Tatjana Crossley

Series: *Routledge Research in Architecture*

This book investigates how immersive environments, across architecture, art, and media, shape spatial perception, cultural identity, and the construction of reality. It offers a spatial-psychoanalytical reading of virtual reality (VR), examining how architecture and representation engage with the body, sensorial experience, and subjectivity. Virtual Reality is written for theorists, practitioners, academics, and students of architecture, art, and design. It situates architectural practice within the unfolding discourse on virtuality, identity, and the cultural implications of space-making.

What Student Architects Should Do

Simon Unwin University of Dundee, UK

Series: *Analysing Architecture Notebooks*

As a first year student the challenges of learning how to do architecture can be daunting. Though not prescribing a particular way (there are as many ways to do architecture as there are architects) this Notebook outlines what you should do to cultivate your own distinctive capacity for architectural design. Architecture is a rich and varied subject, a multifaceted and multidimensional skill. Informed by decades of discussing architecture and its challenges with students, this Notebook will help you lay foundations for a rewarding career as a creative architect.

2ND EDITION

Windows

History, Repair and Conservation

Edited by **James Campbell** University of Cambridge, UK, **Michael Tutton**

In *Windows: History, Repair and Conservation*, readers are guided through the history, dating, development, care, repair and conservation of windows by expert authors in their fields. Each chapter covers a different aspect of the subject, from the dating of windows and their separate parts, through to recording and curation of historic windows, their ironmongery and surrounds. *Windows: History, Repair and Conservation* was the first major book devoted to the understanding of windows. This new revised edition brings the book up to date and provides additional chapters to provide a complete overview of the subject that will inform research and practice for years to come.

Achieving Sustainable Highway Infrastructure in Developing Countries

Creating a Viable Public-Private Partnership Model

Isaac Abiodun

This book investigates the challenges being experienced in the traditional procurement methods for road infrastructure in developing countries and explores the features of Public Private Partnerships as an alternative procurement method with the potential of achieving a more sustainable highway network in Nigeria and countries of Africa. The framework developed and explained in this book will be of benefit to infrastructure leaders and policy makers, regulators, operators, maintenance agencies and contractors in developing countries and researchers and academics studying infrastructure procurement and delivery methods.

An Indoor Air Quality Management Framework for Municipal Buildings in Developing Economies

Mpho Ndou, Clinton Aigbavboa University of Johannesburg, South Africa, **Wellington Thwala** University of Johannesburg, South Africa, **Abdul-Majeed Mahamadu**

Series: Routledge Research Collections for Construction in Developing Countries

This book delves into the pivotal issue of Indoor Air Quality (IAQ) management in municipal buildings within developing economies, addressing a pressing need in today's digital age, where individuals spend over 70% of their time indoors. With a strong focus on enhancing environmental quality, this book presents theoretical frameworks and practical recommendations designed explicitly for stakeholders in the higher education sector, encompassing both public and private institutions.

Applications of Immersive Technology in Architecture, Engineering and Construction

A Handbook

Edited by **Abhinesh Prabhakaran, Abdul-Majeed Mahamadu, Colin A. Booth, Patrick Manu** University of the West of England, UK

This edited book addresses a gap in the literature by advancing current understandings of the applications of immersive technology within the architecture, engineering, and construction (AEC) sector. It is the first dedicated compendium of research-informed text that focusses on the multifaceted applications of immersive technology throughout the lifecycle of the provision of built assets right from concept design to end-of-life. Readers will understand how the technologies are applied, the resulting array of impacts including benefits, drawbacks, challenges and future directions for applications, research, and development.

Behavioral Economic Analysis of Institutional Changes

Lessons Learned from China's Land System Reforms

Helen Bao, Lei Feng

Series: Routledge Studies in International Real Estate

This book focuses on the transformation of the rural land system in China over the last 70 years. Utilizing a comprehensive approach that includes theoretical modeling, empirical testing, questionnaire surveys, and case studies, the book aims to construct a unified analytical framework for dynamic institutional change that is based on New Institutional Economics (NIE) and incorporates recent advancements in behavioral economics. It is essential reading for academics, researchers, and students of land reform in China, and economists with an interest in new institutional economics, behavioral economics, land economics and the Chinese economy more broadly.

Building Decisions

How Choosing by Advantages Drives Project Success

Paz Arroyo, Annett Schöttle, Randi Christensen

This book presents a framework and practical guidelines for everyday decision-making. The authors introduce the reader to a specific decision-making system, Choosing by Advantages (CBA), and explain the CBA Tabular decision-making method. Providing detailed explanations using relatable examples such as choosing a phone and renovating a kitchen, the book also uses case studies of large construction projects from the authors' professional careers, including a museum in San Francisco, a tunnel in England, and the main railway station in Munich, to explain the CBA method. These varied examples will help the reader to improve their own decision-making process through critical reflection.

Calibrating Coastal Resilience

Sonia R Chão

Calibrating Coastal Resilience presents a conceptual reimagining of place in the era of climate change. Using case studies from South Florida, the book illustrates the unique climate risks for this region with a focus on the preservation of historic neighborhoods and buildings and reinforcement of built structures. A valuable resource for professionals and students of architecture, urban planning, historic preservation, and local government, this title offers communities clear guidelines and actionable steps toward creating place-based resilience planning strategies to safeguard the natural and built landscapes of their region.

4TH EDITION

Commercial Real Estate Analysis for Investment, Finance and Development

David M. Geltner , Norman G. Miller , Alex Van De Minne , Piet Eichholtz , Thies Lindenthal , Lily Shen

Series: The American Real Estate Society (ARES) Real Estate Thought Leadership Collection

Commercial Real Estate Analysis for Investment, Finance and Development, a fully revised fourth edition of the authors' leading textbook, presents the foundations of real estate investment analysis with the rigor of general finance and economics. This book introduces the essential building blocks of the field: market assumptions, valuation, financial analysis, and development. Drawing from extensive academic and industry experience, the authors approach the investment analysis process using a combination of theory and practical tools in a discussion tailored to advanced students.

3RD EDITION

Construction Mathematics

Surinder Viri South and City College Birmingham, UK, **Roy Baker** formerly of City of Wolverhampton College, UK, **Narinder Kaur Viri**

An introductory level mathematics text, written specifically for students of construction and related disciplines. The third edition of this popular textbook is fully updated to match new curricula, including the new T Levels and expanded to include 3 new chapters on Differentiation, Integration, Maximum and minimum. It addresses all the mathematical requirements of Level 2 construction NVQs and the BTEC Level 1/Level 2 Tech Award in Construction and the Built Environment and the T Level Design, Surveying and Planning. It is also the ideal primer for any reader who wishes to refresh their mathematics knowledge whilst studying a construction related HNC or BSc.

2ND EDITION

Dampness in Dwellings

Causes, Effects and Remedies

Stephen Battersby Environmental Health Consultant, UK, **Véronique Ezratty**

Series: Routledge Focus on Environmental Health

This updated edition provides a definition of dampness in each of its forms, it details the various potential sources, and causes that can result in damage to the building, and damage to the health of the occupiers. It is both practical, and provides an outline of the possible solutions looking at aspects of building design and construction that can reduce or avoid the risk of dampness. It also discusses why dampness is a risk to the health of occupiers and so justifies the need to protect health by reducing or removing it. Dampness in Dwellings provides a pivotal resource for active professionals in housing, medical and legal sectors.

Digital Technologies for Engineering Construction Information Productivity

Fonbeyin Henry Abanda

This book goes beyond other digital construction books by examining how emerging digital construction technologies and other popular technologies developed by, for example, Microsoft, can be used in improving the productivity of construction information. The book discusses both the theory and practice through use case illustrations in integrated software environments and successfully blends applications and workflows of construction technologies with more common and non-industry specific software systems. This book is essential for students, academics, educators, construction professionals and construction software developers.

Energy Efficiency Applications in Buildings

Volume 1: Theories, Methods, and Tools

Bertug Ozariso , Hasim Altan , Young Ki Kim , Wei Shi

Energy Efficiency Applications in Buildings presents an investigation into energy use and measures to improve the energy efficiency of existing buildings in the UK. Divided into two volumes, the books present energy consumption and thermal comfort in the construction sector as a complex socio-technical problem that involves the analysis of an intrinsic interrelationship amongst dwellings, occupants and the environment. Volume 1 presents the background to the research, methods, and tools used by the research team. Volume 2 describes the case studies, building performance, and post occupancy evaluations, before making strategic policy and retrofitting recommendations.

2ND EDITION

Fundamentals of Building Performance Simulation

Ian Beausoleil-Morrison Carleton University Ottawa, Ontario, Canada

Fundamentals of Building Performance Simulation, 2nd Edition compares the theory and practice of a multi-disciplinary field to the essentials for classroom learning and real-world applications. This textbook equips students and emerging and established professionals in engineering and architecture to predict and optimize buildings' energy use. The textbook will be accompanied by student and instructor digital resources including chapter introduction videos by the author, software and simulation walkthrough videos, weather data, photographs, drawings and measured data to support the culminating trials.

Guide to the JCT Design and Build Contract - 2024 Edition

Seán Mac Labhraí

This book provides a comprehensive guide to the 2024 edition of the JCT Design & Build Contract. It offers a straightforward reference to help practitioners understand the rights and obligations of the parties and administer the contract in an accurate and timely manner. Written to meet the needs of busy construction practitioners working with the JCT contract, this is a handy reference for project managers, quantity surveyors, commercial managers, design managers, and Employer's Agents, their consultants and advisors.

Human Rights and the Architecture of Conflict

Tim Cunningham

Based on interviews with Unionists and Republicans and analyses of never-before-seen documents, Human Rights and the Architecture of Conflict reveals how developers in Belfast collaborated with public officials to marginalize enemy communities. Newly unsealed records link these development decisions to Jim Crow-era policies in the American South that inspired them. A final chapter traces their evolution after recrossing the Atlantic as developers and politicians raced to fortify cities in the aftermath of 9/11.

Living with Water

Development and Urbanism in South Asia

Edited by **Mohammed Mahbubur Rahman** Kingdom University, Bahrain, **Nawrose Fatemi**

Considers the dynamics of water and the built environment in South Asia, exploring its urban and ecological landscapes in case studies from Bangladesh, India, Pakistan, and Sri Lanka. Offers practical strategies to increase climate resilience in cities and ecosystems of the region. This interdisciplinary resource augments urban planning methods with attention to the role of vernacular architecture, traditional water systems, and local knowledge in shaping resilient built and natural environments. Promoting resilient ecology and sustainable resource management, it offers guidance in the creation of water-sensitive development, integrated urban design, wetlands restoration, and more.

Local Air Quality Control and Health

Theory and Practice

Mark Hardwick, Nahum Kidan, Nathaniel Smith, Steve Manning

Series: *Routledge Focus on Environmental Health*

This highly accessible book identifies the major air pollutants which cause human health concerns and examines the sources of these pollutants. Part 1 covers the theory and underlying principles of air pollution, part 2 regulation, standards, and the current context and part 3 the EHP role and practical applications to control or prevent pollution. Aimed at students in Environmental and Public Health, and EHPs practising in the field of air quality control.

Managing Mass Timber

A Guide to Delivering Large-Scale Mass Timber Construction Projects

Anthony M Mirando, Lameck Onsarigo

Managing Mass Timber provides practitioners and students with a deep operational knowledge of constructing large scale mass timber structures. The book is structured on widely taught solid theoretical frameworks related to construction project management and concentrates on the five pillars of construction management in the context of mass timber, namely Safety, Quality, Cost, Schedule, and Sustainability. This textbook is the first to enable readers in construction management and engineering, as well as related professional fields, to understand and manage the mass timber construction process out in the field.

Practical Construction Planning and Control Using Microsoft Project

An Illustrative Guide

Ahmed M. Abdel Aziz

Fills a clear gap in the teaching literature by specifically demonstrating the Critical Path Method (CPM) using Microsoft Project (MSP). The thirteen chapters cover planning, scheduling, resources and costs, project updating for time and cost, project progress measurement using earned value analysis and project reports. Successfully combining the details of CPM as a management technique with guidance on the software, it presents a hands-on self-study guide. An ideal teaching tool for use on Construction Management and Project Management degree programs and for Professionals who are looking to learn construction project scheduling using widely available Microsoft Project software.

Project Management Tools and Techniques

A Guide to Good Practice

Aidan Turner

This new textbook presents a unique approach to the teaching of PM by blending theory, application, and case studies. Each chapter presents a different tool or technique used by project managers, covering the what, how and why and illustrating the techniques with a case study. It allows students to apply the topics discussed directly to a work environment and covers project feasibility, lifecycle, scheduling, budgets, risk, complexity, leadership, handover and more. Suitable for use on a variety of global project management courses in disciplines across engineering, built environment and business. It is also a useful reference for newly established PMs looking for a handy toolkit.

Structural Design and Optimization of Lifting Self-forming GFRP Elastic Gridshells based on Machine Learning

Soheila Kookalani, Hamidreza Alavi, Farzad Pour Rahimian
Teesside University, UK

This book aims to develop structural design and optimization methods of lifting self-forming Glass fiber reinforced polymer (GFRP) elastic gridshells based on machine learning (ML). This research introduces novel frameworks for shape prediction, form-finding, structural performance assessment, and shape optimization of lifting self-forming GFRP elastic gridshells using ML methods. The aim is to increase the opportunities for successful projects involving such structures. This book will be of interest to researchers and academics interested in advanced design methods and ML technology in architecture, engineering and construction fields.

Sustainability Certifications, Labels and Tools in the Built Environment

How to Evaluate, Certify and Reduce the Energy and Environmental Impacts of Buildings

Edited by Francesco Asdrubali, Umberto Berardi

This book is aimed at covering all aspects of the evaluation, certification and reduction of the energy and carbon footprint of the built environment from the scale of the city and its neighbourhoods, to the building level and finally to the level of single building materials and components. Many protocols, tools and labels have been proposed in recent years, both at international and local level, and the aim of the book is to classify, describe and discuss all the different approaches and options.

The Financialization of Latin American Real Estate Markets

A Research Companion

Edited by Alfonso Valenzuela-Aguilera State University of Morelos, *Luis Alberto Salinas Arreola*, *José Gasca Zamora*

Series: Routledge Studies in International Real Estate

The Financialization of Latin American Real Estate Markets: A Research Companion provides an authoritative overview of the real estate asset class in Latin America with chapters covering Mexico, Brazil, Argentina, Colombia, Nicaragua and Chile. The focus is on the current academic research and its relevance for practical applications and is divided into four key themes: real estate-related wealth and macroeconomics, housing price dynamics and affordability, financial crises and structural change, and non-residential real estate.

8TH EDITION

The Income Approach to Property Valuation

Nick Nunnington Nottingham Trent University, UK, **Thomas Dimopoulos**, **Fernanda Antunes Batista da Silva**

The 8th edition of the longstanding and reputable textbook The Income Approach to Property Valuation elevates its practicality, broadens its international appeal, and cements its market leading status by incorporating the latest advancements in AI, PropTech and data analysis. The new edition is a comprehensive guide that explores various aspects of property valuation and investment in the context of the wider, international real estate market. It still introduces the basic frameworks, financial and investment approaches, and methodologies as it has always done, but with a much more hands on, explorative approach.

Urban Heat Mitigation Strategies

An Architecture Perspective

Paola Favaro , Konstantina Vasilakopoulou

Urban Heat Mitigation Strategies: An Architecture Perspective explores heat mitigation strategies integrated into the urban architecture of global cities, aiming to enhance citizens' quality of life through thoughtful design decisions blending architecture, science and engineering. The projects examined exemplify top-tier approaches in architecture, urban planning, landscape design, and engineering across diverse city precincts worldwide. Inspired by architect and urban designer Lewis Mumford's 1970s call for urban spaces that support citizens, these initiatives focus not just on aesthetics but also on effective social and climate change mitigation strategies.

A Time of Disastrous Anticipations

Essays on Life in the Shadow of Catastrophe

Edited by **Reidar Staupe**, **Monika Gabriela Bartoszewicz**

Series: *Routledge Studies in Hazards, Disaster Risk and Climate Change*

This book explores the pervasive anticipation of catastrophe in contemporary society, examining how temporal expectations shape personal and collective experiences and influence our perspectives and responses. Targeted at scholars, students, and professionals in sociology, disaster studies, and public policy, this book is also valuable for policymakers and practitioners interested in understanding the societal dimension of disaster anticipation.

Aesthetics and the City

Edited by **Joe Blakey** Joe Blakey works at Department of Geography, School of Environment, Education and Development, University of Manchester, **Amy Barron** Amy Barron works at Department of Geography, School of Environment, Education and Development, University of Manchester

Series: *Routledge Studies in Urbanism and the City*

Aesthetics and the City engages aesthetics to explore the role of the city in urban experience. Drawing on diverse theories and global case studies, this edited collection examines how aesthetics relates to how cities and urban spaces are perceived, organised, and transformed. This book focuses on the concepts of 'aesthetics' and 'the city' and will appeal to scholars and students in urban studies, human geography, planning, politics, and sociology.

Amber Tourism

From Attractions and Motivations to Sustainability and Territorial Branding

Waldemar Cudny, **Andrzej Stasiak**, **Bogdan Włodarczyk**

Series: *Routledge Insights in Tourism Series*

This book explores the multifaceted nature of amber tourism, illustrating how amber, both a natural and cultural resource, has evolved into a tourist attraction. Combining theoretical insights with diverse case studies, the book examines the key factors shaping its significance in the tourism industry. The book will appeal to students and researchers in sustainable tourism, tourism development, tourism management, heritage management and place branding.

Ambiances

A Sensitivity to Ordinary Situations

Edited by **Jean-Paul Thibaud**, **Nicolas Tixier**, **David Zerbib**

Series: *Ambiances, Atmospheres and Sensory Experiences of Spaces*

How do ambiances shape our sensory, social, and built environments? This book offers interdisciplinary perspectives to understand the profound ways in which ambiances redefine our experiences and perceptions of ordinary spaces. This book offers an essential guide to the study of ambiances, providing a foundational and forward-looking exploration, valuable for researchers and upper level undergraduates of architecture, urban studies, urban planning, human geography, anthropology and philosophy.

Authenticity and Urbanism

A Critical Inquiry

Ali Madanipour

This book investigates authenticity, an important but controversial cultural concept, and its relevance for urban socio-spatial processes. Defining authenticity as an evaluative relationship with an origin, it unpacks a range of origins from a critical, non-essentialist perspective: self, author, substance, event, time, place and society. Students and scholars in urban studies, geography, urban design, planning and architecture, as well as in sociology and cultural studies would find this interface between ideas and practices informative and insightful.

Christopher Columbus and the Genesis of New World Colonialism, 1493-96

An Historical Geography of his Second Voyage

Al M. Rocca

Series: Routledge Research in Historical Geography

This book explores the role of geography's five themes: location, place, human-environmental interaction, movement, and region, in Christopher Columbus's second voyage. It explores the impacting events that led to deteriorating relations between Columbus, the Spanish settlers (adventurers) and the indigenous Taino and Carib people, creating a social paradigm of confusion, displacement, destruction, and the genesis of New World Colonization.

Contested Waste

Environmental conflicts and waste picker resistance in the Global South

Edited by Federico Demaria, Daniele Vico, Lucía Fernández Gabard

Series: Routledge Studies in Political Ecology

'Contested Waste' examines socio-environmental conflicts involving waste pickers in the Global South, uncovering the systemic injustices that underpin contemporary waste policies. Driven by the privatisation of waste management, these conflicts expose the "recycling paradox": while waste pickers make critical, uncompensated contributions to sustainability, they are further excluded by new policies. Essential for scholars, policymakers, and activists in environmental justice, development, and urban studies, this book reveals the structural drivers of waste conflicts and the transformative power of grassroots resistance in shaping sustainable and inclusive urban futures.

Co-authoring Feminist and Queer Geographies

Collaborations, Mentorships, Solidarities, Friendships

Cover Image
Not Available

Edited by Alison Bain, Lynda Johnston, Misgav Chen, Joseli Maria Silva

Series: Routledge Spaces of Gender, Sexualities and LGBTQ+ Series

The book explores co-authored dynamics of collective knowledge production in feminist and queer geographies. It explores how to use co-authorship as a generative feminist practice of care, endurance, and institutional transformation in support of feminism's next generation of intellectual communities. This is an interdisciplinary book at the interstices of Geography, Anthropology, Cultural Studies, Education, Sociology, Women's and Gender Studies, and LGBTQ+ Studies. Its intended audiences are scholars of pedagogy, feminist and queer theory, and sexual and gender minority life. It targets upper-level undergraduates, graduate students, researchers, writers, and educators.

Decoloniality in the Break of Global Blackness

Movement, Method, Poethics

Edited by Michaeline A. Crichlow, Patricia M. Northover

Series: Routledge Research on Decoloniality and New Postcolonialisms

This book, contextualized by the violence of globalization, investigates the fungible, fugitive and untenable experiences of black being and time through a decolonial poethics of global Blackness. The book will be of interest to academics, researchers, and students in the fields of social sciences, cultural studies, post-colonial studies as well as cultural practitioners, art educators, artists, cultural activists and those institutions which seek to decolonise imaginaries, thought, practices and methods. Given its diverse offerings, it will also be of interest to upper-level undergraduates, graduate students and academics.

Foreign Policy in Greenland

20 Years of Development

Maria Ackrén

Series: Routledge Research in Polar Regions

The book, Foreign Policy in Greenland, will shed light on what kind of competences Greenland has in IR and how Greenland undertakes foreign policy, while still being a self-governing territory underneath Danish jurisdiction. This book will undertake a systematic analysis of the foreign policy papers from 2003 and onwards. What kind of activities are Greenland undertaken in international affairs? Can Greenland be an influential player in International Relations? This book will be of interest for those with an interest in international affairs and law as well as those with an interest in international politics and foreign policy.

Gentrification and Public Health

Edited by Ana Isabel Ribeiro, José Pedro Silva, Pedro Gullón, Thomas Astell-Burt

Series: Geographies of Health Series

This book explores the profound impacts of gentrification on public health, examining how this process reshapes socioeconomic and physical environments, exacerbates health disparities, and influences lived experiences. It does so through diverse theoretical, methodological, and empirical perspectives provided by leading researchers from around the globe. This book is designed for researchers across social and health sciences, undergraduate and graduate students, as well as policymakers, urban planners, and public health professionals interested in understanding and addressing the health impacts of gentrification.

Linking Sustainability to Competitiveness

Alessandro Muolo , Luca Salvati

This book identifies and discusses opportunities and constraints in applying the sustainability paradigm to urbanization. It integrates this wide concept with 'local competitiveness' and focuses on the role of both general and specific political action in shaping the economic structure of a region. This book is written for academics and students—from undergraduates to doctoral candidates—who want a clear, practical look at how local economies, sustainability, and competitiveness come together. It is also helpful for professionals, policymakers, and for anyone curious about how economic growth might become a long-term sustainable political goal.

Multivocality in World Heritage

Rjukan-Notodden Industrial Heritage Site, Norway

Edited by **Inger Birkeland** University College of Southeast Norway, **Steffen F. Johannessen** , **Guro Nordby** , **Benjamin Richards**

Series: Routledge Cultural Heritage and Tourism Series

This book examines multivocality in 21st-century World Heritage management through an in-depth interdisciplinary exploration of the complexity and plurality of voices on the ground at a specific World Heritage site. Through an interdisciplinary approach, the book presents a rich variety of cases grounded in a single World Heritage site, to provide new insights and perspectives on World Heritage as complex local phenomena entangled in global processes. This book will be of interest to researchers and students in the multidisciplinary field of heritage, heritage policymakers and bureaucrats.

Non-representational and more-than-human research

Vitalist methodologies for the end of data

Edited by **Phillip Vannini** Royal Roads University, Canada

This book fosters new links between non-representational theories and more-than-human perspectives. Offering multidisciplinary perspectives, from geography and anthropology, to social theory and qualitative research methodologies, it reimagines the boundaries of research by arguing for a new concept of "data." This innovative book provides a courageous contemporary theoretical and methodological intervention. It will be valuable for students, researchers and arts practitioners across the social sciences, and will serve as the beginning of new methodological dialogues for years to come.

Planning as Political Theatre

Chronicle of Two Megaprojects Foretold

Dorina Pojani, Ranja Hautamäki

Series: *Routledge Focus on Urban Studies*

This book examines two large and highly controversial urban infill projects in two peripheral European capitals - Tirana and Helsinki - through the lens of dramaturgy and political theatre. The authors argue that the planning processes in both cities have been farcical, following the so-called 'disillusionment arc' in storytelling - that is, coming to terms with the inevitability of private developments where vast sums of money are at stake and power does not rest with the people. Beyond these case studies, the book introduces the concept of 'planning distortion' which blends socio-institutional phenomena such as corruption, neoliberalism, and undemocratization.

3RD EDITION

Planning for Sustainability

In the Time of Populism, Inequality, and Climate Crisis

Stephen Wheeler University of California, USA

Planning for Sustainability presents a wide-ranging, intellectually well-grounded and accessible introduction to the concept of sustainability planning. It lays out a hopeful and constructive view of the future in a time of growing challenge, and will be essential reading for students and practitioners of urban planning, urban design, landscape architecture, environmental policy, and related fields.

Queerburbia

LGBTQ2S Suburban Place-Making

Alison L. Bain, Julie A. Podmore

Series: *Routledge Studies in Urbanism and the City*

To subvert the metronormativity of queer urban studies and re-place queer suburbanism, *Queerburbia* examines LGBTQ2S place-making/unmaking/remaking on the peripheries of Canada's three largest city-regions. *Queerburbia* offers a comparative case study of how large Canadian city-regions become queerer through LGBTQ2S suburban place-making/unmaking/remaking. Practically, it offers civic leaders, urban planners, and policymakers insights into the complex dynamics of municipal LGBTQ2S misrecognition and critical allyship strategies. It targets upper-level undergraduates, graduate students, researchers and practitioners of municipal social inclusion.

Reassembling Digital Placemaking

Participation and Politics

Isabel Fangyi Lu

Series: *Routledge Research in Place, Space and Politics*

This book presents digital placemaking as a new testing ground for urban democracy. Drawing on examples from Australia, China and Taiwan, it explores the participatory practices of digital placemaking and their implications on blurring formal and informal boundaries of decision-making and urban politics. This book will interest researchers, policymakers and professionals in urban studies, media studies, cultural studies, urban communication, creative placemaking, community engagement, urban advocacy and urban governance.

Researching Displacement Together

Co-producing Knowledge with Women in Colombia

Sonja Marzi, Rachel Pain University of Durham, UK, **Jen Tarr**

This book showcases how to co-produce research when we are unable to meet in the same geographical space. It details a remote and hybrid audio-visual participatory methodology through which women share their experiences of displacement, gender and the city. It will interest researchers and practitioners working inside and outside Universities who are interested in developing remote, hybrid and audio-visual participatory methodologies as well as to those who want to understand more about displacement and the challenges of urban resettlement from women's perspectives.

Routledge Handbook of Nature and Environmental Aesthetics

Edited by **Glenn Parsons**, **Ned Hettinger**, **Sandra Shapshay**

This handbook provides the first comprehensive overview of philosophical thinking about the aesthetics of the natural and human-made environments, exploring the topic's foundations, key ideas, and current debates. The Routledge Handbook of Nature and Environmental Aesthetics will be essential reading for students and scholars working on the aesthetics of environment, as well as anyone who wants to think deeply about environmental beauty. Scholars working in related fields outside academic philosophy, such as geography, landscape studies, environmental psychology, and environmental studies will also find it an invaluable guide to contemporary debates.

Strengthening Human and Societal Resilience in Uncertain Times

Ona Rakauskienė, Dalia Streimikiene, Lina Volodzkienė

The aim of this monograph is to examine the impact of a new set of uncertainties on the socio-economic situation of people and societies and to provide research-based innovative approaches and methods for building socio-economic resilience in order to reduce vulnerability and promote the resilience of people and societies to shocks. This book is helpful for many researchers and academics dealing with related fields, policymakers on all levels, as well as practitioners and entrepreneurs.

The Routledge Handbook of Cultural Ecosystem Services

Edited by **Pamela D. McElwee**, **Karen E. Allen** Furman University, USA., **Rachelle K. Gould** University of Vermont, USA., **Minna Hsu** Whittier College, USA., **Jun He**

The Routledge Handbook of Cultural Ecosystem Services provides an overview of Cultural Ecosystem Services (CES), which are the nonmaterial aspects of benefits that people derive from nature. This book can serve as a comprehensive guide to researchers who are new to CES and wish to understand more about the field, and as a set of go-to instructions for experienced CES researchers. It can also inform policymakers who wish to better incorporate CES into their work.

Transport Diplomacy

Planning Narratives and Mobility Cooperation

Luc Ampleman

This book provides a concise guide to navigating, mapping, and understanding the complexity of political mechanisms and narratives behind transport cooperation. This offers practitioners, decision-makers, and researchers a common conceptual approach to the diplomatic dimension of transport planning. In doing so, it envisages transport planning as not only a procedural set of techniques to implement informed mobility solutions, but as a field of managing conflicting narratives and rhetoric by actors with diverging or compatible interests. This book will appeal to those working in transport, mobilities and planning.

Understanding and Addressing Disaster Risk

Who Speaks? Who Suffers?

Ben Wisner , Irasema Alcántara-Ayala , JC Gaillard

University of Auckland, NZ., **Ilan Kelman** University College London, UK, and University of Adger, Norway,

Victor Marchezini

In Understanding and Addressing Disaster Risk, the authors explain how people modify the environment and exert power over each other in ways that make nature potentially harmful and put people in harm's way. This book is useful for and useable by decision makers, policy makers, researchers and students to shatter the vicious cycle of repeating known mistakes which compound detrimental outcomes.

A New Index for Public Space

After Distancing

Tali Hatuka, Andrea Mubi Brighenti University of Trento, Italy

A New Index for Public Space: After Distancing offers readers a re-evaluation of the notion of publicness as a lens to unpack the complexity of urban space. A 'new index' is proposed to reconstitute the promises and the predicaments of public space to better prepare for the contemporary challenges of post-pandemic, conflict-ridden society. This book is the outcome of a conversation across disciplines—specifically, urban design and social theory—revolving around the recognition that public space is inherently fragile, messy, conflicted, and evolving. It will be of interest to urban planners, architects, urban designers, and those working in community development.

Aesthetic Femininity and Domestic Modernity in Late Victorian Advice Literature

Shu-chuan Yan

Series: Routledge Research in Interior Design

Aesthetic Femininity and Domestic Modernity in Late Victorian Advice Literature considers how the domestic interior is constituted, imag(in)ed, contested, and mediated in the public forum of advice literature. It interrogates the construction and negotiation of aesthetic femininity and domestic modernity within the larger contexts of the New Journalism, the New Art Criticism, a new girls' culture, and the emerging New Woman phenomenon in Britain.

American Chinatowns

Race, Identity, and Postwar Urban Redevelopment

Chao Li

This book offers a captivating exploration of the vibrant yet contested landscapes of Chinatowns across the United States. Through a critical and nuanced lens, Li examines how postwar urban redevelopment, racial dynamics, and identity politics have profoundly transformed these iconic neighborhoods. Blending rich historical research with sharp analysis, this book uncovers the interplay of race, urban planning ideologies, and social equity, shedding light on how Chinatowns navigate resilience and reinvention amid shifting urban paradigms. This book invites readers to rethink the meaning of place, heritage, and equity in the urban fabric.

Architecture, Landscape, and Design in Post-Mining Territories

Edited by Post-Mining Network

This edited collection explores how architects, planners and landscape architects can engage with former mining sites and communities. Chapters investigate how to move from an extractivist system towards a territorialist project, working for the reappropriation of territorial resources after centuries of the subordination of local and immigrant populations. Fully illustrated throughout, photos showcase architectural and landscape achievements and drawings of future projects. This book is essential to practitioners, students, associations, and political and technical actors in the post-mining communities.

Artificial Intelligence for Urban Planning

Thomas W. Sanchez

This book aims to introduce planners to AI, outlining essential concepts, terminologies, and methodologies. AI now promises to reshape urban planning, but as with many technological innovations, AI also introduces ethical, practical, and organizational challenges. Chapters address some of these complexities and introduce urban planners to core AI topics. The book shows how planners can effectively use AI in their daily practices, engage constructively with technical specialists, and critically assess the appropriateness of these technologies in different planning contexts. This book will be of interest to both urban planning professionals and researchers.

Barcelona

Urban Commons and Local State Assemblages

Iolanda Bianchi

Series: Built Environment City Studies

This book explores the complex relationship between urban commons - understood as a repertoire of collective action that fosters a politics of antagonism - and the local state. It critiques the dominant neo-institutionalist and neo-Marxist perspectives for their deterministic and siloed views, as well as their insufficient attention to the municipal scale. The book proposes a more nuanced, urban-based, outcome-oriented approach rooted in assemblage theory.

Beyond Health Capacity

Spatial Practices in Inclusive Design

Edited by **Ulysses Sean Vance**

This book sheds light on the systemic challenges communities with limited access to medical support and health maintenance have endured. It emphasizes how approaching medical interventions through non-traditional health facilities can positively impact health's social and environmental impact. This book reflects on past and present efforts interrogating the practical application of inclusive design practices in resolving the spatial challenges of health reform. By focusing on examples during and after the pandemic, each chapter offers an overview documenting these experiences as approaches to these new competencies and proposing new criteria for the future of healthcare.

Bridging the Digital Divide in the US

Planning Innovative State and Local Approaches

Edited by **Mildred E. Warner, Natassia Bravo, (Ada) Shen**

Series: Community Development Research and Practice Series

The US faces a deep digital divide that is most marked in rural, low income and minority communities. This book presents a multi-level governance framework which explores how local leaders use policy opportunity and community resilience in broadband infrastructure. Case studies from across the US show how local and regional initiatives address the digital divide – how they harness local resources, state and federal funding, and how they navigate regulatory restrictions and financial constraints. The federal policy landscape for broadband is changing, and this book provides clear insights on how policy can support the people and places left behind.

Citizen Participation in Sustainable Urban Development

A Framework for Engagement from the Nordics

Edited by **Tuomas Ahola, Nina Tura, Ville Ojanen, Agnar Johansen** SINTEF, Norway

This book assesses the ambitious goals for sustainability set by cities and nations, and details ways to achieve those goals through effective forms of collaboration between citizens and multiple stakeholders, such as municipal decision-makers, entrepreneurs, and academic researchers. Each chapter discusses how citizens are currently involved in urban development and what opportunities there are for further deepening the collaboration in context of urban development between citizens and municipalities. Cases from the Nordics focus on the adoption and use of digital technologies in provision of municipal services as well as in citizen participation.

Community Change in Action

A Roadmap for Students

Sarah L. Young Kennesaw State University, USA, **Carly L. Redding**

Series: Community Development Research and Practice Series

Community Change in Action guides students through the process of turning their personal passion into goal-driven action for community development. Using an evidence-based curriculum, the book breaks down exactly how to initiate and drive social change in a way that speaks to the unique characteristics of Gen Zs. Taking best practice approaches to youth leadership, community development, and social change beyond the classroom, this book inspires and illustrates how Gen Z students can take their passion and turn it into social action.

Community Development in Sub-Saharan Africa

Edited by **Grey Magaiza, Savathrie Margie Maistry**

Series: Community Development Research and Practice Series

This book explores the dynamics of community development thinking, processes, and approaches in contemporary sub-Saharan Africa. It emphasizes examples of community resilience and recovery using locally-informed approaches that respect local cultures and ways of being. The book also highlights the formative role of community development practice in sub-Saharan Africa, focusing on how local actions are critical in reducing poverty, enhancing local innovations and sustainability, and more. The primary audience is scholars, students, policymakers, and practitioners with interests in community development, African Studies, and international development.

Critical Planning Futures

New Directions in Planning Theory

Edited by **Philip Allmendinger**, **Mark Tewdwr-Jones**,
Matthew Wargent

Planning lies at the heart of successful and sustainable places, yet planning scholarship often appears stuck in routinised patterns of thought. *Critical Planning Futures* brings together an international range of voices from diverse disciplinary backgrounds to explore new directions in planning theory, interrogate planning's orthodoxy, and push the boundaries of contemporary theory using ideas both from within planning and beyond. This book will be a vital resource for planning specialists, though the breadth of ideas will be of interest to academics and researchers in a wide range of disciplines, including urban studies, geography, political science, and sociology.

Designing the Complex City

A Systemic Approach to Spatial Design

Elena Porqueddu

This book highlights how designers can address the emergent self-organizing nature of complex urban environments. By using key concepts from systems thinking, complexity sciences, life sciences, cognitive sciences, and social sciences, the book frames a systemic spatial design approach aimed at enhancing the potential of different spatial design disciplines to navigate place-specific emergent transformations without overdetermining their formal outcome. A range of case studies, developing at different scales, show how embracing this design approach can lead to effective intervention in complex adaptive cycles of urban decay and self-regeneration.

Details and Materials for Resilient Sites

A Climate Positive Approach

Meg Calkins

Providing comprehensive information for closing material loops and reducing carbon impacts of site construction, this ground-breaking book is an essential resource for landscape architects and engineers to meet the environmental challenges of the 21st Century. It provides strategies, tools, and detailed information for the practice of climate positive design. Exemplary case studies from around the world are highlighted, and key resources such as assessment tools, information transparency tools, and benchmarking measures are provided.

Disasters and Social Capital

Risk Reduction and Geographical Legacies in the Philippines

Justin Veuthey

Series: Disaster Risk Reduction and Resilience

This book analyzes social capital and preparations for natural hazards in the Philippines. In an analysis at several geographical scales, Veuthey shows how inequality, via social capital, makes societies more at risk of having natural hazards turn into disasters. The book argues that a cautious use of the concept of social capital, which is cognizant of the historical and geographical complexities of the context it is applied to, has the potential to improve the way people collectively prevent hazards from turning into disasters. It is essential reading for students, scholars, disaster risk management practitioners, and policy makers.

Displaced Urbanism

Edited by **Gihan Karunaratne**

Series: Routledge Research in Planning and Urban Design

This book critically interrogates dominant narratives surrounding displacement by offering an in-depth examination of how it unfolds across diverse urban and rural settings worldwide. It addresses the intricate realities of displacement and its impact on the built environment.

Everyday Life and Urban Studies

Moving With Lefebvre Towards the 21st Century

Sabine Knierbein

Everyday Life and Urban Studies revisits the ordinary routines that shape urban life during the last century and early new millennium. This book seeks to re-integrate Lefebvre's Critique of Everyday Life into studies of urbanization. This work combines analytical-methodological exploration, pedagogic mission, and theoretical advances to carve out an everyday-theory-based approach to urban studies situated at the interface of the spatial arts, the humanities, and the social sciences. The book is essential for students, faculty, and researchers in the fields of urban studies, city planning, urban design, human geography, sociology, cultural studies, and political science.

Getting Political in the Neoliberal City

Planning and Design for Social and Environmental Justice

Edited by **Burcu Yiğit Turan , Melissa Cate Christ , Cristina Cerulli**

This book explores the politicization of space and the socio-political engagement of cities that are increasingly being shaped by capitalism and neoliberal governance. It will be invaluable reading to planners, designers, artists and other actors to understand equality, democracy, and social justice today.

Global City Typologies

Transactional Forces in Urbanised Development

Nigel C. Lewis

Global City Typologies explores the historical, cultural, and socio-economic transactional forces in the development of existing cities through to newly planned and emerging cities. Individual chapters address different sets and typologies of global cities to analyse their comparative evolution and standing today. The book is fully illustrated throughout with modern and historical maps, which enables visualisation of the forces that have shaped ongoing development of these major global cities. This is an essential book for students and professionals in urban design and planning, administrators, economists, designers, and developers.

Healthy Landscapes

Theory and Design Approaches to Promote Health in Urban Communities

Bin Jiang , Lan Luo , Xueming Liu

This book responds to the need for a comprehensive and detailed theoretical framework and systemic design guidelines to improve mental, physical, and social health in urban environments. It begins by reviewing practical experience, as well as theoretical and scientific evidence, from several related disciplines from around the world. This book will be an invaluable resource for students of landscape architectural design, architecture, and urban design. It will also be an essential tool for design professionals and urban administrators who want a comprehensive understanding of the fundamental theories of healthy communities with design guidelines supported by scientific evidence.

How Good Are Parklets?

Reclaiming Street Space Through Temporary and Tactical Urbanism

Edited by **Quentin Stevens**

Parklets are innovative, dynamic public spaces that are installed onto on-street car-parking spots. This book is the first to critically examine the parklet's purposes, formats, and impacts. It traces the parklet's history, from its invention in 2005 as an experiment that tactically reclaimed street space for broader public use, to its surge in popularity worldwide after the COVID-19 pandemic for outdoor dining, community gathering, and play. Drawing together archival research, expert interviews, typological analysis, mapping, field observation and design research, the book examines parklets' design, production, and implementation across varying urban contexts.

Informal Housing in the Global North

Exploring Practices, Actors and Processes in a Transforming Housing System

Edited by **Jakub Galuszka**

Series: *Explorations in Housing Studies*

Informal Housing in the Global North proposes analytical and conceptual approaches to investigate the progressing 'informalisation' of contemporary housing in the Global North and beyond. Amidst the ongoing housing crisis, the reading of informalities in the so-called North has increasingly disrupted the conventional understanding of local cities as fully regulated, well-structured and formal. By juxtaposing contested, successful, and 'under-the-radar' ordinary housing phenomena across various income levels, this volume seeks to unpack and document the embeddedness of informality in mid- and high-income cities.

Insurgent Urbanisms in the Americas

Edited by **Kristine Stiphany , Edna Ely-Ledesma**

Insurgent Urbanisms are often seen as spontaneous, grassroots responses to the inequities embedded in urban policies, projects, and systems, operating entirely outside the structures of government. But are they truly autonomous? This book offers a new perspective on the empirics of struggles to design cities that are inclusive and equitable. Each chapter's account of insurgency provides empirical detail about how acts of resistance evolve across housing occupations, grassroots knowledge-sharing, ecological revolutions. This book will be of interest for Latin American and Hispanic studies and for students, instructors, and practitioners of urban planning and design.

Integrated Landscapes in Policy, Practice and Everyday Life

Edited by **Kathryn Moore**, **Anastasia Nikologianni**, **Alex Albans**, **Paul Cureton** Lancaster University, UK

Exploring the ways in which an integrated landscape vision can help deliver regional, national and international agendas, this book investigates how a new idea of landscape can reimagine governance, policy, economics, culture, identity, health, transport and development priorities by connecting in a more powerful and meaningful way with local aspirations and demands. Divided into three main sections, it includes illustrated case studies from the UK, Europe, East Asia, South Asia, and more. As part of a strategy to capture, build and disseminate expertise in this approach, the book aims to develop an interdisciplinary body of work that will appeal to academics and professionals.

3RD EDITION

Introduction to Housing

Edited by **Katrin B. Anacker** George Mason University, USA, **Andrew T. Carswell**, **Sarah D. Kirby**

This foundational text on housing tenure, housing policy, homelessness, and housing in a global context has been thoroughly updated to reflect changes in the United States during and after the COVID-19 pandemic. This third edition delves into the complexities of housing and related issues, to provide a deep understanding of housing's relationship to national economic factors and housing policies. It features individual chapters authored by experts in the field, offering insights into the physical, social, psychological, economic, and policy dimensions affecting the housing landscape both in the United States and internationally, while proposing solutions to the challenges presented.

London's 'Big Bang' Moment and its Architectural Conversations

The Built Environment as a Subject of Public Discourse

Stephen Rosser

Series: *Routledge Research in Architecture*

This book explores the topic of architecture as a component of public discourse, focusing on the reception of four high-profile developments in the City of London (the UK capital's financial district) dating from the final years of the twentieth century. During this time, the City's mode of operation, culture and built environment were all transformed as a result of the market deregulation process labelled 'Big Bang'. It was also a period which saw the subject of architecture attracting public and media attention, becoming a prominent feature of national conversation.

Modern Architecture and an International Sensibility

A Curious Cross-Atlantic Constellation

Naina Gupta

Series: *Routledge Research in Architecture*

Modern Architecture and an International Sensibility: A Curious Constellation presents an alternative history of internationalism and modernism, with a specific focus on the role of architecture and spatial practices. Beginning at the tail-end of the peace movements - the turn of the twentieth century - and ending with the Nuremberg trials, the book highlights the part played by individual agency, social reform and architecture in moulding a working everyday-definition of what it meant to be international during this time.

Nature-Based Solutions for Urban Renewal in Post-Industrial Cities

Edited by **Silvia Barbero**, **Axel Timpe**

This book, based on the experiences and insights gained during the Horizon 2020 project proGREG, offers a detailed overview of targeted nature-based solutions and their impacts on various key sustainability areas, guiding readers through the spatial analysis, co-design, and implementation processes of cities in Europe and Asia. Chapters shed light on the challenges and opportunities encountered in each location and share essential lessons learned and a wide range of indicators crucial for assessing the benefits of nature-based solutions. This book will be valuable for urban planners and policymakers worldwide.

Nature-Based Solutions in Cities of the Global South

Masoumeh Mirsafa, **Fabiano Lemes de Oliveira**

This book explores the practice of Nature-Based Solutions (NBS) in the cities of the Global South. This book promotes implemented urban NBS projects in the Global South to help identify region-specific challenges and opportunities, and to develop more effective and equitable solutions. The presented case studies support resilient planning in the Global South and significantly inform urban debates in the Global North. This book offers pragmatic policy and planning recommendations, providing decision-makers with clear guidance on implementing NBS in urban settings and transforming knowledge into actionable strategies for sustainable and resilient urban development.

Planning for Healthy Communities

Equitable Approaches

Joongsub Kim

Series: Health and the Built Environment

This book investigates multi-disciplinary approaches to addressing the health of disadvantaged communities through equitable community development systems (CDSs). The core concepts underlying the book are three dimensions of support infrastructure (people: human-centering; place: place-cultivating; and ecosystem: sustainable capitalization), leveraging several theories (community capital, social justice) from community development. This book is based on the results of a recent grassroots, citywide engagement-driven initiative in Detroit, and on best-practice case studies in Chicago, Indianapolis, Cleveland, Boston, Philadelphia, Minneapolis, Richmond, and Portland.

Planning Rural Landscapes

Green Infrastructure and Ecosystem Services Nexus

Edited by Natália Cunha, Manuela Magalhães

Series: Routledge Research in Planning and Urban Design

Appealing to a broad audience, this book bridges different issues, from landscape to ecosystems, planning to implementation, and policies to local community willingness. This book outlines a methodology for defining Green Infrastructure (GI) in rural landscapes, showing how it underpins Ecosystem Services (ES) and aligns with various EU directives. There are presented examples in Portuguese rural landscapes alongside international initiatives from several countries.

Post-War Public Housing and Well-Being

Modernity, Economic Recovery, and Social Change

Edited by Izumi Kuroishi

This collection illustrates the evolving role of housing as a symbol of modernity, a tool for economic recovery, and a response to societal transitions. It argues that understanding earlier efforts to integrate well-being in the 20th century can provide valuable insights for contemporary actors in the built environment who are working to address these issues today. With case studies from the UK, US, Singapore, Japan, Germany, China, and Spain, this volume provides insights into how these countries have shaped the values, designs, and institutions of their dwellings. This book is essential for scholars and practitioners in cultural history, architecture, planning, and urban studies.

Redesigning Urban Centers

Adapting to Changing Real Estate Markets

Jonathan Barnett University of Pennsylvania, USA

This book describes how places which offer clean, safe, and attractively designed streets and public spaces, along with reinvented zoning, are drawing real estate investors and developers to six kinds of urban and suburban centers in metropolitan regions. Case studies from the Philadelphia metro region and across the U.S demonstrate how designs which integrate offices, housing, shopping, hotels, and entertainment transform places where people have to be into places where people want to be. This book will interest leaders of business improvement districts and Main Street organizations, as well as instructors, students, and practitioners of planning and urban design.

Resilient Urbanism

Edited by Gihan Karunaratne

Series: Routledge Research in Planning and Urban Design

As urban populations grow unprecedentedly, cities worldwide face pressures from rapid expansion, climate change, and social inequalities. Resilient Urbanism critically examines how cities, towns, and informal settlements adapt to these multifaceted challenges, exploring urban resilience in the 21st century. This volume investigates resilience across a variety of urban contexts, from megacities in the Global South to suburban and coastal regions, through interdisciplinary essays.

Retaining and Transitioning Businesses in Communities

Strategies in a New Era

Edited by **Norman Walzer** Northern Illinois University, DeKalb, Illinois, USA; Purdue University, USA, **Christopher D. Merrett**

Series: *Community Development Research and Practice Series*

This edited collection presents successful business succession planning in smaller rural communities where profit margins are low, markets are shrinking, and there are few potential buyers. Finding innovative ways to successfully transition these businesses to new owners is at the heart of community and economic development efforts if many of these communities are to thrive in the future. Chapters outline options for successfully transitioning businesses that have worked in Canada, England, and the U.S. This book is essential for academics, policymakers, and practitioners working on community and economic development issues, especially in areas with aging populations.

Routledge Handbook of Resilient Urban Planning for Small and Medium-Sized Cities

Edited by **Seth Asare Okyere**, **Stephen Kofi Diko**, **Louis Kusi Frimpong**, **Matthew Abunyewah**, **Stephen Leonard Mensah**

Series: *Routledge International Handbooks*

Small and medium-sized cities (SMCs) are becoming the new frontiers of global urban growth and population change. This handbook aims to increase attention to the resilience of SMCs and explore the unique challenges they face, as well as provide practical recommendations for built environment practitioners to understand and respond to these challenges in global contexts. Chapters cover topics such as climate-induced risks, heat resilience planning, access to urban infrastructure and services, socio-environmental inequities, urban safety, health resilience, walkability, and more. This handbook is essential for scholars and practitioners working in the built environment.

Spiritual Wellness and the Built Environment

Phillip James Tabb Texas A&M University, USA

This book explores spiritual wellness as a foundational attribute to urban planning and design. Chapters reflect the beginning of this evolving movement in home and community design that tackle our uniquely modern problems of sedentary lives, unhealthy diets, stress, social isolation, pollution, nature deprivation, and inaccessibility to spiritually nurturing places. These specific planning and design strategies are presented through case studies from around the globe that highlight the importance of spiritual wellness considerations at all scales of the built environment from rooms to cities. This book is essential to help planners and designers, implement a wellness design approach.

2ND EDITION

The Dynamic Landscape

Design, Ecology and Management of Naturalistic Urban Planting

Edited by **Nigel Dunnett**, **James Hitchmough**

Building on the hugely successful first edition, Dunnett and Hitchmough bring this volume up to date with fully revised chapters, new additions and enhanced visual features. Organised into clearly structured sections, presenting an overview of the building blocks and the process for design, The Dynamic Landscape advances a fusion of scientific and ecological planning design philosophy that addresses the need for more sustainable designed landscapes. This second edition provides an important synthesis of current thinking and high-quality imagery to illustrate and support the text. The book will be an invaluable addition to any professional landscape designer's library.

The History of Urban Planning in Spain, Portugal and Morocco

Muslim and Christian Traditions

Carmen Hass-Klau

This book includes a historic overview of urban planning on the Iberian Peninsula and in Morocco from 700 AD until the 20th century. Chapters detail the untold story of Muslim refugees, who founded towns in Morocco, and how the conflicts between Morocco and Spain started not only politically but also in terms of town planning, when Spain took over the Moroccan north. The book also traces the slow change from Islamic to Christian cities. It will be of interest to students and instructors of planning history, urban planning, and human geography and to people who are generally interested in history and cities.

The Shoup Doctrine

Essays Celebrating Donald Shoup and Parking Reforms

Edited by **Daniel Baldwin Hess**

In *The Shoup Doctrine: Essays Celebrating Donald Shoup and Parking Reforms*, forty city planners, economists, journalists, and parking professionals analyze three major parking reforms proposed by Donald Shoup. This book celebrates Shoup's decades-long contributions to research, practice, and education, and demonstrates how his ideas about how parking reform can support affordable housing development, lessen air pollution, and reduce automobile dependency. It will be of interest to urban planners, developers, elected officials, students, and citizen-advocates who are passionate about reducing automobile dependency and creating more sustainable and vital cities.

Urban Density Contextualized

Design Strategies for Building Density in Cities

Sungduck Lee, Emily Talen

Urban Density Contextualized provides planners with the tools to understand, assess, and implement urban density successfully. It systematically explores the social context of urban density, and how it plays a role in urban design and planning strategies. Chapters include the following topics: density and housing, accessibility, affordability, zoning, typology, and history, as well as case studies of design strategy from across the US. It is essential for urban planners, architects, landscape architects and others working in design and planning fields.

Urban Planning Challenges and Innovations in Sub-Saharan Africa

Edited by **Abubakari Ahmed, Millicent A. Akaateba, Bernard A. A. Akanbang**

Urban planning practice in Sub-Saharan Africa increasingly encounters complexities due to the confluence of urbanisation, climate change, and their interconnected drivers and consequences. This book explores the unique challenges faced by growing cities in Sub-Saharan Africa, including urban crime, informality, land governance, development control, and the degradation of green spaces, as well as how these issues are addressed in planning education and emerging innovations. Providing a comprehensive overview of these issues, this book serves as a resource for urban planners, policymakers, scholars, and students dedicated to the sustainable development of cities in Sub-Saharan Africa.

Waterfront Regeneration in a Time of Climate Change

Recent Japanese and International Experiences

Edited by **Raffaele Pernice, Tetsuya Yaguchi**

Series: Routledge Research in Planning and Urban Design

The current climate crisis and the rapid transformation of the natural environments will inevitably pose a threat to human settlements around the world. This book explores possible local strategies and global solutions in the safeguarding of coastal cities and the often-neglected urban waterfronts, in terms of a more effective integration with the city, whilst paying attention to the mitigation of the risks related to climate change.
