2ND EDITION

Condemned to Die

Life Under Sentence of Death

**Robert Johnson** American University

Condemned to Die is a book about life under sentence of death in American prisons. The great majority of condemned prisoners are warehoused on death rows before they are put to death. Whatever the real or imagined merits of capital punishment, there is neither a mandate nor a justification for inhumane confinement prior to imposition of sentence. Yet warehousing for death, sometimes leavened with brutality, is the universal fate of condemned prisoners in the United States, a group that comprises almost 3,000 individuals today. The enormous suffering caused by this human warehousing is the subject of this book.

The Supreme Court's Role in Mass Incarceration

William T. Pizzi

The Supreme Court's Role in Mass Incarceration illuminates the role of the United States Supreme Court's criminal procedure revolution as a contributing factor to the rise in U.S. incarceration rates. Noting that the increase in mass incarceration began climbing just after the Warren Court years and the rate kept climbing for the next four decades despite the fact that the crime rate declined substantially, the author posits that part of the explanation is the Court's failure to understand that a trial system with robust rights for defendants is not a strong trial system unless it is also reliable and efficient.

American Criminal Courts

Legal Process and Social Context

Casey Welch, John Randolph Fuller

American Criminal Courts is an introductory-level text that offers a comprehensive study of the legal processes that guide criminal courts and the social contexts that introduce variations in the activities of actors inside and outside the court. Specifically the text focuses upon legal processes and social contexts. By focusing on the tension between the law (legal processes) and the actors inside and outside the courts system (social contexts), this text demonstrates how the courts are a product of "law in action," and it presents the course content in a way that enables students to understand not only the "how" of the U.S. criminal court system but also the "why."

May It Please the Court

Judicial Processes and Politics In America

Brian L. Porto Vermont Law School, South Royalton, USA

This short, practical, comprehensive and engaging introduction to our judicial system is designed primarily for undergraduate students in criminal justice, liberal arts, political science and beginning law. It differs from other texts not only by delivering an insider's view of the courts but also by demonstrating how the judicial process operates at the intersection of law and politics. Unlike other textbooks that portray an incomplete, inaccurate, and dull image of the judicial process, this book conveys the human drama of civil and criminal litigation. The updated reinforcing epilogue, case studies and discussion questions at the end of each chapter reflect real and possible court cases.

The Impact of Supreme Court Decisions on US Institutions

A Sociology of Law Primer

Robert Costello, Colleen Eren

This book introduces readers to the purpose, history, and functioning of the Supreme Court, and shows the Court's impact on the five key sociological institutions in American society: government/politics, education, religion/belief systems, family, and the economy and work. It gives a clear picture of the influence that Supreme Court decisions have on other key concepts in sociology, such as gender, sexual orientation, race, class/inequality, immigration, and deviance. The gains familiarity with concepts found in both sociology and constitutional law/criminal justice texts, and is able to bridge the relationship between these two fields.

Police Ethics

The Corruption of Noble Cause

Michael Caldero, **Jeffrey Dailey**, **Brian Withrow** Texas State University, San Marcos

Police Ethics, Fourth Edition, provides an analysis of corruption in law enforcement organizations. The authors argue that the noble cause — a commitment to "doing something about bad people" — is a central "ends-based" police ethic that can paradoxically lead to community polarization and increased violence when officers violate the law on behalf of personally held moral values. This timely new edition discusses agency-wide corruption prevention strategies and ethical issues relating to the relationship between police departments and minority communities. In the post-Ferguson environment, this is a crucial text for students and law enforcement professionals alike.

Reaffirming Juvenile Justice

From Gault to Montgomery

Alida V. Merlo, **Peter J. Benekos**

This book will expand students' understanding of the evolution of juvenile justice in the last 50 years. Designed to coincide with the 50th anniversary of the landmark case, *In re Gault*, which the U.S. Supreme Court decided in 1967, the authors frame the transformations that have occurred in the intervening years. Topics covered include an overview of the dramatic changes to field following the spike in youth violence in the 1990s, the "superpredator" myth, and sanctions for juvenile offenders—particularly the 2005 abolition of the death penalty and subsequent decision on life without parole. The book also covers child and youth victimization and recent prevention and treatment initiatives.

Sentencing Youth to Life in Prison

Justice Denied

Kathi Milliken-Boyd, **James Windell** Wayne State University, Detroit, and Oakland University, Rochester, Michigan, USA

This book analyzes the impact of the U.S. Supreme Court rulings deeming juvenile life without parole sentences to be cruel and unusual. These decisions brought about controversy and resistance in the criminal justice field, while at the same time providing hope for those 2,300 people who never thought they had a chance to experience life as an adult outside prison. Looking in depth at the lives of some of the individuals serving life terms, and understanding both the prosecutors who oppose review and resentencing of juvenile lifers, this book provides a comprehensive understanding of the issues involved in the sentencing of juveniles to life without the possibility of parole.

In light of the Black Lives movement and protests in many cities, the role of race in crime and justice is now ever-more salient. Within theoretical criminology, however, race has oddly remained on the periphery. It is often introduced as a control variable in tests of theories and is rarely incorporated as a central construct in mainstream paradigms. This volume seeks to explore theoretical issues in a depth and breadth that is not common under one cover. Again, given the salience of race and crime, this volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper-level undergraduate courses.

Restorative and Responsive Human Services

Edited by **Gale Burford , John Braithwaite , Valerie Braithwaite**

In Restorative and Responsive Human Services, Burford, Braithwaite, and Braithwaite bring together material showing that other fields can learn rich lessons from human services about the importance of being relational, healing, and empowering—in other words, through restorative practices. Restorative justice must be strategically integrated with a range of other strategies enabling restorative justice and learning as options of first choice. This requires integration of restorative justice with responsive regulation, a practice that this book shows how to do for challenges that range from sexual misconduct in universities to righting the wrongs of Jim Crow laws.

Restorative Justice

Ideas, Values, Debates

Gerry Johnstone University of Hull, UK

First published in 2002, Restorative Justice: Ideas, Values, Debates is renowned worldwide as an accessible, balanced and invaluable analysis of the argument that restorative justice can provide an attractive alternative to traditional responses to crime. The second edition includes a new chapter identifying and analysing fundamental shifts and developments in restorative justice thinking over the last decade. It suggests that the campaign for restorative justice has not only grown rapidly in the last decade, but has also changed in its focus and character. What started as a campaign to revolutionise criminal justice has evolved into a social movement that aspires to implant restorative values into the fabric of everyday life. This new edition explores the implications of this development for restorative justice's claim to provide a feasible and desirable alternative to mainstream thinking on matters of crime and justice.

The Future of Correctional Rehabilitation

Moving Beyond the RNR Model and Good Lives Model Debate

Ronen Ziv

Following Martinson's "nothing works doctrine," scholars have worked to develop an evidence-based corrections theory and practice to show "what works" to change offenders. Perhaps the most important contribution to this effort was made by Donald Andrews, James Bonta, and Paul Gendreau, who developed the Risk-Need-Responsivity Model (RNR model), which became the dominant theory of correctional treatment. RNR was more recently challenged by Tony Ward, Shadd Maruna, and others, through the "Good Lives Model" (GLM). This text probes the extent to which the models offer compatible approaches, and suggests how to integrate the RNR and GLM approaches to build a new vision for offender treatment

Critical Criminology Today

Counter-Hegemonic Essays

Vincenzo Ruggiero Middlesex University, UK

This book argues that critical criminology today can be reimagined if new concepts are elaborated which bring academic efforts close to the practices of social movements. Building on an original collection of anti-hegemonic essays focused on specific criminological areas, including femicide, organized crime, drug use, punishment, state-corporate terrorism and financial crime, this book identifies the radical potential inherent in the choice of areas, topics and variables that critical criminologists can address today. An accessible and compelling read, this book will appeal to all those engaged with critical criminology, sociology, and cultural studies.

Feminism and Global Justice

Kerry Carrington Queensland University of Technology, Australia

Imagining a Greater Justice

Criminal Violence, Punishment and Relational Justice

Samuel H. Pillsbury

Imagining a Greater Justice offers a well-informed look at violence, race, and restorative justice, including often-ignored moral and ethical issues. The Rich Get Richer and the Poor Get Prison

Thinking Critically About Class and Criminal Justice

Jeffrey Reiman American University, USA, **Paul Leighton** Eastern Michigan University, Ypsilanti, USA

For 40 years, this classic text has taken the issue of economic inequality seriously and asked: Why are our prisons filled with the poor? Why aren't the tools of the criminal justice system being used to protect Americans from predatory business practices and to punish well-off people who cause widespread harm? This new edition continues to engage readers in important exercises of critical thinking: Why has the U.S. relied so heavily on tough crime policies despite evidence of their limited effectiveness, and how much of the decline in crime rates can be attributed to them?

Life Without Parole

Worse Than Death?

Ross Kleinstuber Professor at the Univ. of Pittsburgh, **Jeremiah Coldsmith** PhD in Sociology, **Margaret Legey** Professor & Chair of Criminology at the College of New Jersey, **Sandra Joy** Sandra Joy is a Professor of Sociology at Rowan University.

Series: Routledge Frontiers of Criminal Justice

This book is an in-depth critical examination of all pertinent aspects of life without parole (LWOP). Empirically assessing key arguments that advance LWOP, including as an alternative to the death penalty, it reveals that not only is the punishment cruel while not providing any societal benefits, it is actually detrimental to society. Over the last thirty years, the use of life without parole (LWOP) has exploded in the United States. While the use of capital punishment over that same time period has declined, it must be recognized that LWOP is in fact a hidden death sentence.

Reaffirming Rehabilitation

Francis T. Cullen , Karen Gilbert

Reaffirming Rehabilitation , 2nd Edition, brings fresh insights to one of the core works of criminal justice literature. This groundbreaking work analyzes the rehabilitative ideal within the American correctional system and discusses its relationship to and conflict with political ideologies. Many rejected the value of rehabilitation after Robert Martinson's proclamation that "nothing works." Cullen and Gilbert's book helped stem the tide of negativism that engulfed the U.S. correctional system in the years that followed. Now Cullen traces the social impact on U.S. corrections policy. This new edition is appropriate as a textbook in corrections courses.

Sentencing Youth to Life in Prison

Justice Denied

Kathi Milliken-Boyd , James Windell Wayne State University, Detroit, and Oakland University, Rochester, Michigan, USA

This book analyzes the impact of the U.S. Supreme Court rulings deeming juvenile life without parole sentences to be cruel and unusual. These decisions brought about controversy and resistance in the criminal justice field, while at the same time providing hope for those 2,300 people who never thought they had a chance to experience life as an adult outside prison. Looking in depth at the lives of some of the individuals serving life terms, and understanding both the prosecutors who oppose review and resentencing of juvenile lifers, this book provides a comprehensive understanding of the issues involved in the sentencing of juveniles to life without the possibility of parole.

The Future of Correctional Rehabilitation

Moving Beyond the RNR Model and Good Lives Model Debate

Ronen Ziv

Following Martinson's "nothing works doctrine," scholars have worked to develop an evidence-based corrections theory and practice to show "what works" to change offenders. Perhaps the most important contribution to this effort was made by Donald Andrews, James Bonta, and Paul Gendreau, who developed the Risk-Need-Responsivity Model (RNR model), which became the dominant theory of correctional treatment. RNR was more recently challenged by Tony Ward, Shadd Maruna, and others, through the "Good Lives Model" (GLM). This text probes the extent to which the models offer compatible approaches, and suggests how to integrate the RNR and GLM approaches to build a new vision for offender treatment

The Supreme Court's Role in Mass Incarceration

William T. Pizzi

The Supreme Court's Role in Mass Incarceration illuminates the role of the United States Supreme Court's criminal procedure revolution as a contributing factor to the rise in U.S. incarceration rates. Noting that the increase in mass incarceration began climbing just after the Warren Court years and the rate kept climbing for the next four decades despite the fact that the crime rate declined substantially, the author posits that part of the explanation is the Court's failure to understand that a trial system with robust rights for defendants is not a strong trial system unless it is also reliable and efficient.

No-Body Homicides

The Evolution of Investigation and Prosecution

Mark Stobbe

No-Body Homicides examines how police and prosecutors have become more successful in obtaining convictions for homicide when the remains of the victim are unavailable as evidence. Based on an examination of over 600 cases in the United States and Canada, this book shows the length some killers will go to avoid punishment and the determination of police and prosecutors to bring them to justice. No-Body Homicides will be of practical interest to police or prosecutors confronted with a missing persons case that could be sinister. It is also written to be appropriate as a supplementary text in an undergraduate criminology class or for an aficionado of "True Crime."

Reframing Police Education and Freedom in America

Martin Alan Greenberg Academy of Criminal Justice Sciences, USA, **Beth Allen Easterling** Roanoke College, USA

Series: Routledge Series on Practical and Evidence-Based Policing

This book untangles the components of police education and advocates a robust community-based training model with significant civilian oversight. The recommended approach recognizes that the citizenry needs to be included in the provision of basic police education. The police must be the role models for society, demonstrating that freedom and rights come with obligations, both to the community as a whole, and to individuals in need within that community. Ultimately, the quality of police training and the public's safety depend upon not only the quality of the educational institutions and police candidates, but on the building of a community's trust in its police.

Street Cop

Policing in Context

George Klein

This book provides an ethnography of street-level policing in the United States and offers an analysis with valuable lessons for today's law enforcement officers. Author George C. Klein, sociologist and former police officer, explores the characteristics of policing in a suburb outside of large Midwestern city in the United States. The Wicked Problems of Police Reform in Canada

Laura Huey, **Lorna Ferguson** Western University, Canada, **Jennifer L. Schulenberg**

Series: Routledge Series on Practical and Evidence-Based Policing

This book looks at police reform in Canada, arguing that no significant and sustainable reform can occur until until steps are taken to answer the question of "What exactly do we want police to do?" Adding challenge to this is that setting boundaries on what we expect the police to do requires grappling with the complex social problems we ask them to resolve. This book is suitable for a wide range of audiences within and outside Canada, including law enforcement and community leaders; scholars and policy experts who specialize in policing; students of criminal justice, organizations, and management; and citizen consumers of information about policing.

Terrorism in America

Edited by **Robin Maria Valeri , Kevin Borgeson**

Terrorism in America examines the beliefs, actions, and impacts of American-based terrorists and terror organizations. It draws on theories from criminology, psychology, and sociology to explore the ideologies of right-wing, left-wing, and extremist religious groups—how and why they convert followers, recruit financially, and take extreme action against others. No other text offers such in-depth, nuanced coverage of the radical ideologies behind these attacks, or the ensuing fear domestic terrorism creates, as well as the strategies to combat violent extremism. Interviews, case studies, and chapter themes make this highly readable for criminal justice students, professors, or practitioners.

The Freedom Fighter

A Terrorist's Own Story

Murat Haner

The Freedom Fighter: A Terrorist's Own Story explores why so many Kurdish people—especially young adults—join the Kurdistan Workers' Party (PKK) and conduct terrorist acts. Inspired by the ground-breaking classic, The Jack-Roller: A Delinquent Boy's Own Story, by Clifford R. Shaw, the author explores the issue of radicalization into terrorist organizations through the life-history method, enabling a PKK terrorist—or "freedom fighter"—to tell his story. Over a five-month period, the author interviewed "Deniz," a high-level PKK terrorist in a Turkish prison, who during his time in the PKK rose from the lowest level to near the top in terms of terrorist operations.

Criminological Theory

Assessing Philosophical Assumptions

Anthony Walsh

Criminologists can benefit from questioning the underlying assumptions upon which they rest their work. Philosophy has the ability to clarify our thoughts and even dissolve some dichotomies we thought were cast in stone. One of those dichotomies is free will vs. determinism. Criminology must reckon with both free will and agency, as posited by some theories, and determinism. Criminological Theory: Assessing Philosophical Assumptions examines philosophical concepts such as these in the context of important criminological theories or issues that are foundational but not generally considered in the literature on this topic.

A Revised Edition

A. Javier Treviño

An important classic, familiar to virtually all criminologists, Clinard and Quinney's Criminal Behavior Systems: A Revised Edition begins with a discussion of the construction of types of crime and then formulates and utilizes a useful typology of criminal behavior systems. The author examines the criminal career of the offender in each category, public and legal attitudes toward these individuals, support systems they may have, attitudes of the offenders, and other features. The discussion of each category of crime is thorough and enlightening, and takes the reader far in understanding the huge problem of crime and establishing intelligent definitions to study it.

Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? The book provides a comprehensive coverage of psychological theories of crime and criminality, emphasising the connections among approaches, and to show how, taken together, they provide a more complete picture of crime and criminality.

The Spatial Scale of Crime

How Physical and Social Distance Drive the Spatial Location of Crime

John R. Hipp

Combining insights from two distinct research traditions—the communities and crime tradition that focuses on why some neighborhoods have more crime than others, and the burgeoning crime and place literature that focuses on crime in micro-geographic units—this book explores the spatial scale of crime. Criminologist John Hipp articulates a new theoretical perspective that provides an individual- and household-level theory to underpin existing ecological models of neighborhoods and crime.

The Theoretical Foundations of Criminology

Place, Time and Context

Jayne Mooney

This book brings criminological theory to life by presenting the core theories of criminology as historical and cultural products and theorists as producers of culture located in particular places, writing in specific historical periods and situated in precise intellectual networks and philosophical controversies. It provides an invaluable contribution to the growing conversation over criminology's 'origin story' and the level that this is grounded in the idiosyncrasies of the North Atlantic world and its historical development. This book will be invaluable reading to students and academics engaged in studies of criminology and criminal justice.

Violence in the Heights

The Torn Social Fabric of Inner-City Neighborhoods

Eileen M. Ahlin Penn State Harrisburg

Series: Criminology and Justice Studies

Given the media attention and research focus on big cities with large minority populations, people have grown accustomed to associating violence with these attributes. Violence in the Heights counters that narrative to provide a fresh perspective on inner-city violence with a close look at violence and associated social disorder in a cluster of neighborhoods in a mid-sized, predominantly white city. This book will interest mainstream readers interested in learning about urban affairs and the human-interest story as it will track why inner-city residents stay in their neighborhoods or move to other communities when violence increases.
