9TH EDITION

Abnormal Child and Adolescent Psychology

Allen C. Israel University at Albany, SUNY, USA, **Jennifer Weil Malatras**, **Rita Wicks-Nelson**

Abnormal Child and Adolescent Psychology is a comprehensive introduction to the field. It covers theoretical and methodological foundations and examines the characteristics, epidemiology, etiology, developmental course, assessment, and treatment of disorders of childhood and adolescence. This edition also features a new full-color design and over 150 color figures, tables, and photos. The text is written in a clear and engaging style and is approachable for students with varying academic backgrounds and experiences, as well as being supplemented with online resources for students and instructors.

2ND EDITION

Abnormal Child and Adolescent Psychology

A Developmental Perspective, Second Edition

Linda Wilmschurst

Abnormal Child and Adolescent Psychology is organized around five prominent and recurring themes: the course of normal development proceeds in an orderly and predictable direction; maladaptive behaviors represent deviations from the normal path; maladaptive behavior is represented by a continuum of severity based on the degree to which behaviors deviate from the norm; individual, interpersonal, contextual and cultural factors interact in a reciprocal way to influence normal development and abnormal deviations; theoretical input from diverse perspectives can guide our understanding of underlying processes that precipitate behaviors and the different developmental pathways that might result.

4TH EDITION

Anxiety

S Rachman, **Stanley J. Rachman**

Series: Clinical Psychology: A Modular Course

This new edition of Anxiety, part of the popular Clinical Psychology: A Modular Course Series, details the growth of positive psychology, with its emphasis on learned optimism and resilience, is influencing clinical psychology and psychological therapy, and explains the new concept of prospection, a key element in positive psychology based on the human ability to imagine thoughts and images about the future. The recent infusion of positivity into theorising about anxiety, has introduced a welcome balance into our understanding of this phenomenon.

Behavioural Addiction in Women

An International Female Perspective on Treatment and Research

Edited by **Fulvia Prever**, **Gretchen Blycker** University of Rhode Island, USA, **Laura Brandt** The City College of New York, USA

Behavioural Addiction in Women gives insight into ongoing research efforts and clinical developments across the globe, focusing specifically on women with behavioural addictions. The book brings together an international network of clinicians and researchers to offer a unique transcultural female perspective on female-specific aspects of addiction, which is underrepresented in the available literature. The book is an important first step towards building a shared knowledge base on the subject, spanning the importance of female-specific diagnostic criteria to new therapeutic strategies. The book will be of great interest to researchers and clinicians in the field of addiction.

2ND EDITION

Clinical Psychology

A Modern Health Profession

Wolfgang Linden University of British Columbia, USA,
Paul L. Hewitt University of British Columbia, USA, **Don Saklofske**

Clinical Psychology invites students to think like a clinical psychologist and develop an integrated sense of how science, experience, ethical behavior, and intuition get woven into our professional identity. The text uniquely portrays clinical psychology as a modern health care profession that bridges physical and mental health and takes a holistic stance. Committed to training future professionals, this text navigates students through the career path of a clinical psychologist and provides guidance on evolving education and training models. It contains a dedicated chapter on ethics, covering contemporary issues faced on the job.

3RD EDITION

Depression

Constance Hammen University of California, Los Angeles, USA, **Ed Watkins** University of Exeter, UK

Series: *Clinical Psychology: A Modular Course*

Depression is intended for students and professionals seeking a readable and up-to-date summary of research-based information on this disorder. With the help of clinical examples, the authors present chapters covering the presumed cause of depression, including genetic and biological factors, life stress, family, and interpersonal contributors to depression. The new edition retains the features that have made previous editions so popular, while providing updated research throughout, and highlighting areas of new development and change.

Depression

Current Perspectives in Research and Treatment

Gary Christopher

Depression, now recognized as a significant source of disability across the globe, is something many of us will be familiar with. This book explores the way people have discussed depression and examines how scientific understanding has led to ways to better appreciate and treat the condition. This book is an essential read for practicing and trainee clinical psychologists, but its accessible and readable style will appeal to a broader audience of those looking to further understand depression.

Evaluating the Brain Disease Model of Addiction

Edited by **Nick Heather, Matt Field, Antony Moss, Sally Satel**

This ground-breaking book advances the fundamental debate about the nature of addiction. As well as presenting the case for seeing addiction as a brain disease, it brings together all the most cogent and penetrating critiques of the brain disease model of addiction (BDMA) and the main grounds for being skeptical of BDMA claims. The result is a landmark volume in the study of addiction which will be essential reading for advanced students and researchers in addiction as well as professionals such as medical practitioners, psychiatrists, psychologists of all varieties, and social workers.

Investigating Clinical Psychology

Pseudoscience, Fringe Science, and Controversies

Edited by **Jonathan N. Stea, Stephen Hupp** Clinical Psychologist and Professor of Psychology at Southern Illinois University Edwardsville (SIUE), USA.

Series: *Investigating Psychology Pseudoscience*

Investigating Clinical Psychology takes a deep dive into the field of clinical psychology through the lens of pseudoscience and fringe science. An expert panel of authors honor the role of science in the field while also exploring and guarding against the harms that pseudoscience can cause. Aligning with many major undergraduate textbooks for easy course integration, *Investigating Clinical Psychology* is valuable supplemental reading in undergraduate and graduate courses in clinical psychology. It is also a beneficial reference for clinicians in practice, as well as anyone interested in pseudoscience psychology within the mental health sector.

Positive Health

The Basics

Jolanta Burke, Pádraic J. Dunne, Elaine Byrne, Ciaran A. O'Boyle

Series: *The Basics*

This introductory book offers a clear guide to the new field of Positive Health which incorporates a shift towards perceiving body and mind as an integrated system. The book combines lifestyle medicine research and practice, such as healthy eating, good sleep hygiene, and physical activity, with positive psychology research and practice, including cognitive, arts-based and positive affect tools, to delve into the psychology of positive health, physiology and health behaviour. It is essential for introductory courses on Positive Health, and supplementary reading for courses on positive psychology or wellbeing, for all healthcare professionals and policy makers.

Single Case Methods in Clinical Psychology

A Practical Guide

Stephen Morley Professor of Clinical Psychology at University of Leeds

This text provides a comprehensive introduction to quantitative single case methods, including experimental single case designs, for those studying clinical, health and counselling psychology and training for a professional qualification. It introduces students to the basic principles needed to appreciate and conduct single case research using quantitative methods. Students are required to prepare case studies for assessment; formal single case research designs can be used to investigate one-off clinical problems and they can also be the method of choice for research projects.

3RD EDITION

The Handbook of Child and Adolescent Clinical Psychology

A Contextual Approach

Alan Carr University College Dublin, Ireland

The third edition incorporates important advances in the field to provide a reliable and accessible resource for clinical psychologists. Thoroughly updated throughout, each chapter dealing with specific clinical problems includes cases examples and detailed discussion of diagnosis, classification, epidemiology and clinical features. New material includes the latest advances in: child and adolescent clinical psychology; developmental psychology and developmental psychopathology; assessment and treatment programmes. This book is invaluable as both a reference work for experienced practitioners and as an up-to-date, evidence-based practice manual for clinical psychologists in training.

Making an Impact on Mental Health

The Applications of Psychological Research

Edited by James N. Kirby, Paul Gilbert

Series: Routledge Psychological Impacts

Advancements in research in psychological science have afforded great insights into how our minds work. Making an Impact on Mental Health analyzes contemporary, international research to examine a number of core themes in mental health, such as mindfulness and attachment, and provide an understanding of the sources of mentally ill health and strategies for remediation. The originality of this work is the embedding of psychological science in an evolutionary approach. This work is invaluable reading for advanced students in clinical psychology and professionals in the mental health field.

3RD EDITION

Clinical Psychology

Edited by Graham Davey Emeritus Professor, University of Sussex, UK, **Nick Lake** Sussex Partnership NHS Foundation Trust, UK, **Adrian Whittington** Sussex Partnership NHS Foundation Trust, UK

Series: Topics in Applied Psychology

Clinical Psychology, Third Edition offers an introduction to clinical psychology as it is operating on the ground – delivering clinical interventions, supervision, consultation, leadership, training and research, in rapidly changing health and care services. Given the popularity of clinical psychology for many undergraduate and graduate students, the contents of this text have been designed around teaching and learning features that can be used as the basis for an intermediate or advanced-level course that will allow students to learn both breadth and depth about clinical psychology.

Becoming a Consumer Psychologist

Ashwani Monga Rutgers University, USA, **Rajesh Bagchi** Virginia Tech, USA

This book provides a guide to what it takes to become a consumer psychologist, and achieve success in the field. Because consumer psychologists take on a variety of roles such as professor, market research professional, or consumer insights manager, it is often hard to know who to approach for career advice on consumer psychology. Becoming a consumer psychologist opens up diverse opportunities in the marketing function of firms, in academic departments, and in organizations that aim to enhance consumer welfare.

2ND EDITION

Behavioral Economics

The Basics

Philip Corr City University, London, UK, **Anke Plagnol** City University, London, UK

Series: The Basics

The second edition of Behavioral Economics: The Basics, summarizes behavioral economics, which uses insights from the social sciences, especially psychology, to explain real-world economic behavior. This is a comprehensive overview of the whole field, covering all the main areas, presented in a rigorous yet accessible form. It should especially appeal to students, those with an interest in applying behavioral economic knowledge in their professional life, and anyone who wants to know how they are being influenced every day of their lives by (usually unseen) behavioral insights.

2ND EDITION

Psychological Foundations of Marketing

The Keys to Consumer Behavior

Allan Kimmel, **Allan J. Kimmel**

This is the only textbook to provide an applied, critical introduction to the role of psychology in marketing, branding and consumer behavior. Addressing issues of motivation, perception and decision-making, the book features case studies throughout to highlight how psychological research can be applied in the marketplace. Updated to include analysis of the effects of digital media and technology, as well as the role of personality and social context, the book is ideal for both students and professionals, building to provide a complete primer on how psychology informs and explains marketing strategies, and how consumers respond to them.

Investigating School Psychology

Pseudoscience, Fringe Science, and Controversies

Edited by **Michael I. Axelrod** University of Wisconsin, Eau Claire, USA, **Stephen Hupp** Clinical Psychologist and Professor of Psychology at Southern Illinois University Edwardsville (SIUE), USA.

Series: *Investigating Psychology Pseudoscience*

Investigating School Psychology provides a fascinating exploration of the field of school psychology through the lens of pseudoscience and fringe science. Contributions from leaders in the fields of school psychology, clinical psychology, and education honor the role of science in the field while also exploring and guarding against the harms that pseudoscience can cause. This book is valuable supplemental reading in undergraduate and graduate courses in education and school psychology, and is also a beneficial reference for practicing school psychologists to distinguish between science and pseudoscience in their practice.

Handbook of Health Psychology

Edited by **Tracey A. Revenson** Hunter College and the Graduate Center of the City University of New York, USA, **Regan A. R. Gurung** University of Wisconsin, Green Bay, USA

This rich resource provides a thorough overview of current knowledge and new directions in the study of the biological, psychological, social, and cultural factors that affect health, health behavior, and illness. Chapters review the latest theories and research with an emphasis on how research is translated into behavioral interventions. It considers the intersections of populations (women's and sexual minority health), cultural groups (African American, Asian American, and Latino), risk and protective factors (obesity), and diseases (diabetes, HIV), making it essential reading for scholars of health psychology, public health, epidemiology, gender studies, and cultural psychology.

Health Psychology

The Basics

Erica Cook University of Bedfordshire, UK, **Lynne Wood** University of Bedfordshire, UK

Series: *The Basics*

This accessible primer on health psychology covers the key theories and models of the discipline. Through the use of real-life case studies and examples, it covers a broad range of topics related to the field of health psychology including: health promotion, risky health behaviour and health in healthcare settings. It explains how health psychology serves to not only promote positive health and reduce maladaptive health behaviours, but also support those who are chronically ill. It is an essential introductory text suitable for students, professionals and general readers interested in this important and emerging topic area.

2ND EDITION

Stress, Cognition and Health

Real World Examples and Practical Applications

Tony Cassidy

The new edition of this bestselling textbook provides a comprehensive overview of the latest research on stress and health, moving beyond the former deficit model to a resource growth model. It examines all aspects of the topic, from how the external world and the impact of technology makes demands upon individuals, through biological and psychological processes, to outcomes in terms health and wellbeing. The process is set within a dynamic, multilevel systems and developmental lifespan perspective. The book includes a history of the evolution of stress research and the biological systems and immune responses that translate external pressures into health outcomes.

Behavioral Economics and Healthy Behaviors

Key Concepts and Current Research

Edited by **Yaniv Hanoch** School of Psychology, Plymouth University, UK, **Andrew Barnes** Virginia Commonwealth University, US, **Thomas Rice** UCLA, US

This important book provides the first overview of the role that behavioural economics can play in tackling the most pernicious health issues we face today. Each chapter discusses the core theoretical concepts while synthesizing what research has shown us so far. Covering a range of key topics, from the prevention of HIV and the promotion of exercise to the cessation of smoking and adherence to medication in chronic conditions, it is the first collection to consolidate how this dynamic field can inform our health-related behaviours. It will be essential reading for students and researchers in psychology and economics, as well as policy makers and practitioners working in public health.

Coping with Chronic Illness

Theories, Issues and Lived Experiences

Silvia Bonino

This valuable book combines psychological theories of health with the lived experience of coping with chronic health conditions, focusing on the 'ill person' as an actor of their own development. It considers all aspects of living with illness, from issues that impact on everyday functioning such as pain and fatigue, to the rebuilding of identity and the building of therapeutic relationships. It is important reading for those living with chronic health conditions, as well as for healthcare professionals to gain awareness of the psychological issues that exist alongside living with illness. It is also relevant for postgraduate students of health psychology.

Management of Distressing Bodily Symptoms in Health

The BodyMind Approach using a Biopsychosocial Model

Helen Payne Professor, University of Hertfordshire, UK,
Susan Brooks

This book presents a solution to the problem of lack of treatment for medically unexplained symptoms and body distress disorder by providing a comprehensive introduction to The BodyMind Approach and outlines guidance on applying TBMA to facilitated groupwork with patients/clients. This is essential reading for healthcare professionals and mental health practitioners as well as those who are, or wish to train, as a TBMA facilitator. It will also be a compelling read for a variety of other professions, including, but not limited to, dance movement psychotherapists, arts psychotherapists, counsellors, health coaches, clinical psychologists, GPs, pain clinic staff and nurses.

Men's Health Equity

A Handbook

Edited by **Derek M. Griffith** Vanderbilt University, USA,
Marino A. Bruce Vanderbilt University, USA, **Roland J. Thorpe, Jr.** Johns Hopkins Bloomberg School of Public Health, USA

Behavioral, social, and policy interventions to improve the health of the overall population have been less successful in reaching or improving the outcomes of men when compared with women. The field of men's health disparities explores how and why inequalities among men exist and presents evidence informing efforts to improve the health of men and reduce inequalities among them. Scholars in this field seek to use a critical lens to systematically explore the root causes of patterns of illness and disease, the specific needs of groups of men, and what can be done to improve men's health and well-being.

The Psychology of Health and Illness

A Multicultural Perspective

Leslie Frazier

The Psychology of Health and Illness is a thoroughly updated version of Leslie Frazier's previous textbook on health psychology, which provides an engaging and contemporary approach to understanding health psychology from a truly international perspective. Combining both biopsychosocial and lifespan developmental perspectives, the book integrates core theory, research, and practice on global and cross-cultural health issues. This is essential reading for undergraduate students on Health Psychology courses as well as those in related fields such as nursing and the allied health professions.

Autism Spectrum Disorder in the Criminal Justice System

A Guide to Understanding Suspects, Defendants and Offenders with Autism

Dr Clare S. Allely

This book focuses on autism spectrum disorder (ASD) in the criminal justice system. Rather than being the perpetrators of offending, individuals with ASD are more likely to be the victim of crime. However, there is nevertheless a small subset of individuals with ASD who do offend, and this book provides an in-depth understanding of how certain features of ASD may provide the context of vulnerability to engaging in a number of types of offending behaviours. This book is ideal for criminal defense lawyers and practitioners in psychology, psychiatry, and social work as well as policy makers and reformers.

Challenging Bias in Forensic Psychological Assessment and Testing

Theoretical and Practical Approaches to Working with Diverse Populations

Edited by **Glenda C. Liell, Martin J. Fisher, Lawrence F. Jones**

Series: Issues in Forensic Psychology

Challenging Bias in Forensic Psychological Assessment and Testing is a ground-breaking work that addresses the biases and inequalities within the field of forensic psychology. It gives valuable insights into individuals practices and wider criminal justice approaches at an international level, while providing tangible solutions to tackle the disparities. It's a must read for professionals working in criminal justice, forensic psychology, legal psychology and related fields. It is also a compelling resource for students and researchers of forensic psychology with particular interest in social diversity and inclusion.

Conducting Interviews with Child Victims of Abuse and Witnesses of Crime

A Practical Guide

Mireille Cyr Mireille Cyr is a licensed psychologist and a professor in the Department of Psychology at the Université de Montréal.

This book is a practical and thoughtful guide for the forensic interview of children, presenting a synthesis of the empirical and theoretical knowledge necessary to understand the account of child victims of abuse or witnesses of crime. It is a complex task to interview children who are suspected of being abused in order to gather their stories, requiring the mastery of many skills and knowledge. This book is innovative by the constant links that are made between the results of the research into interviewing and understanding the accounts of child victims of abuse or witnesses of crime and its significance for the interventions made to the field.

Case Studies in Forensic Psychology

Clinical Assessment and Treatment

Edited by **Ruth J. Tully** Forensic Psychologist, UK, **Jennifer Bamford**

This fascinating text gives insights and reflections from practising forensic psychologists working with a range of different offender populations. Covering issues around personality disorder, psychopathy, learning disability and those at risk of offending, the cases include both assessment for legal purposes and clinical treatment, using a range of treatment models. Ideally suited for any student of forensic psychology, clinical psychology or criminology, each case is contextualised with a discussion of the broader issues involved alongside a focus on 'what works'. The book will also appeal to practitioners in this rapidly expanding field.

Forensic Case Histories

Understanding Serious Offending Behaviour in Men

Jackie Craissati Oxleas NHS Trust, South East London, UK

Forensic Case Histories examines men's violent and sexual offending behaviors, outlined through a series of real offender narratives, from a psychological perspective and in an accessible manner that will engage any audience, from the criminology-intrigued layperson to the specialist in the field. Both educational and accessible, this book will appeal not only to specialists but to any layperson curious to understand more about criminal acts. It is especially valuable to students and instructors of criminal justice, mental health, and related fields.

Forensic Psychology

Edited by **Neil Gredecki** Alpha Hospitals and Manchester Metropolitan University, UK, **Polly Turner**

Series: Topics in Applied Psychology

Drawing on psychological theory and research, this text outlines the core roles of the forensic psychology profession, providing students with a broad overview of the field and bringing to life the work of the forensic psychologists. Written by leading UK practitioners and researchers working in a range of contexts, it invites students to reflect on how psychological literature helps us to understand people in contact with the justice system. As such, this volume details the contribution of forensic psychology to a range of presentations and organizational and professional issues, and is an ideal resource for courses in Forensic Psychology.

Making an Impact on Policing and Crime

Psychological Research, Policy and Practice

Edited by **Clifford Stott** Keele University, UK, **Ben Bradford** University of Oxford, UK, **Matthew Radburn**, **Leanne Savagar-Shaw**

Series: Routledge Psychological Impacts

Making an Impact on Policing and Crime documents the application of cutting-edge research to real-world policing and explains how psychologists' insights have been adapted and developed to offer effective solutions across the criminal justice system. The experts featured in this collection cover a range of psychological topics surrounding the field, including the use of CCTV and 'super-recognisers' and forensic questioning of vulnerable witnesses. This collection is a vital resource for practitioners in policing fields and the court system and professionals working with offenders, as well as students and researchers in related disciplines.

Psychological Criminology

An Integrative Approach

Richard Wortley UCL Jill Dando Institute of Security and Crime Science, UK

Series: Crime Science Series

Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? The book provides a comprehensive coverage of psychological theories of crime and criminality, emphasising the connections among approaches, and to show how, taken together, they provide a more complete picture of crime and criminality.

Sport, Exercise, and Performance Psychology

Theories and Applications

Edited by **Angus Mugford**, **Andrew Friesen** Barry University, USA

This book brings together world-class professionals to share theoretical understanding applied to sport, exercise, and performance domains. It highlights how to be more effective in developing psychological skills, context, and understanding for educators, students, and professionals. From both academic and practitioner perspectives, this book takes readers through contextual understanding and into a wide variety of important areas. Specifically, the chapters focus on the mind-body relationship and performance challenges, and on core mental skills applied across different sport, exercise, and performance examples.

The Peer Guide to Applied Sport Psychology for Consultants in Training

Edited by **Mark W. Aoyagi**, **Artur Poczwadowski** University of Denver, USA, **Jamie L. Shapiro**

The Peer Guide to Applied Sport Psychology for Consultants in Training provides a platform for the influential voices of peers, with whom graduate students relate and connect on a visceral level. Mimicking the environment of a thriving classroom, each chapter is primarily authored by graduate students and recent graduates with an academic mentor serving a secondary role. The chapter topics were selected by the editors as areas where graduate students are commonly challenged, and correspondingly, where peer support and guidance are most valued. A unique addition to the sport psychology literature, this volume is a key resource for developing and established consultants alike.

Becoming an Industrial-Organizational Psychologist

Dennis Doverspike The University of Akron, USA,
Catalina Flores

This book explains how to become an industrial-organizational psychologist and what different careers in industrial-organizational psychology look like. Starting with preparing for entry into graduate school, the book proceeds to discuss how to be successful in graduate school, and how to tailor academic and career trajectories toward industrial-organizational psychology. Different types of careers are discussed alongside stories of how current industrial-organizational psychologists found their careers.

Essentials of Employee Recruitment

Individual and Organizational Perspectives

Edited by Jerel E. Slaughter, David G. Allen

Series: Essentials of Industrial and Organizational Psychology

This book provides an insightful and comprehensive summary of the field of employee recruitment. Written from a scientific evidence-based perspective, and with contributions from global experts, it reviews the relevant research in the various areas of recruitment, considers the most pressing current issues in studying recruitment topics, and designs future research agendas for the field. This is the ideal text for scholars and graduate students in industrial and organizational psychology and human resource management. It will also interest practitioners working in the area, along with executive and line managers tasked with responsibility for talent management.

Essentials of Job Attitudes and Other Workplace Psychological Constructs

Edited by Valerie I. Sessa Montclair State University, USA,
Nathan A. Bowling Wright State University, USA

Series: Essentials of Industrial and Organizational Psychology

Although the topic of job attitudes and other workplace psychological constructs such as perceptions, identity, bonds, and motivational states is important, there are no books addressing the topic as a whole; *Essentials of Job Attitudes and Other Workplace Psychological Constructs* seeks to fill that void in a comprehensive edited volume that compiles chapters by experts on each construct. This is an ideal text for students and professionals in industrial and organizational psychology, organizational behavior, and human resource management.

The Science and Best Practices of Behavioral Safety

The Source for Reducing Injuries on the Front Line

Timothy D. Ludwig Appalachian State University, USA,
Matthew M. Laske

This book presents the scientific principles and real-world best-practices of behavioral safety, one of the most mature and impactful applications of behavioral science to reduce injuries in industrial workplaces. The book is essential reading for safety professionals, process safety engineers, and leaders in companies who have implemented behavioral safety, are considering it, or as an aid to learning more about the scientific background behind effective and practical safety practices. Researchers, expert consultants, and students who are already familiar with the practice will also find the book a valuable source to further develop their expertise.

3RD EDITION

Values and Ethics of Industrial-Organizational Psychology

Joel Lefkowitz Baruch College, City University of New York

Series: *Applied Psychology Series*

This foundational text integrates work from moral philosophy, developmental/moral psychology, applied psychology, political and social economy, and political science, as well as business scholarship. The 3rd edition utilizes ideas from the first two to provide readers with a practical model for ethical decision making and includes examples from I-O research and practice, as well as current business events. This is the ideal resource for Ethics and I-O courses at the graduate and doctoral level. Academics in Organizational Behavior and Human Resource Management will also benefit from this book, as well as anyone interested in Ethics in Psychology and Business.

Work Psychology

The Basics

Laura Dean University of Sheffield, UK, **Fran Cousins** University of Leicester, UK

Series: *The Basics*

Work Psychology: The Basics provides an accessible, jargon-free introduction to the fundamental principles of work and occupational psychology. Covering key theories and models in this dynamic area, it offers a solid understanding of both academic theory and practical applications. Supported by a helpful guide on the routes to chartered status in the UK and working in the area, as well as a glossary of key terms and suggestions for further reading, this is the ideal introductory text for students. It will also interest those looking to understand the subject more generally and complete training in the area.

10TH EDITION

An Introduction to Theories of Learning**Matthew H. Olson, Julio J. Ramirez**

This text defines learning and shows how the learning process is studied, places learning theory in historical perspective, and presents essential features of the major theories of learning with implications for educational practices. The authors retained the best features of earlier editions and incorporated current research, including coverage of active learning and the testing effect, data showing the neurobiological basis of the cognitive map and spatial learning, new research on brain plasticity and its role in learning as well as the impact of poverty on brain and cognitive development, and new evidence that challenges the notion of learning styles.

7TH EDITION

Behavior Analysis and Learning

A Biobehavioral Approach

**Erin B. Rasmussen, Casey J. Clay, W. David Pierce, Carl D. Cheney**
University of Alberta, Canada, Utah State University, USA

Using a behavioral perspective, Behavior Analysis and Learning provides an advanced introduction to the principles of behavior analysis and learned behaviors, covering a full range of principles from basic respondent and operant conditioning through applied behavior analysis into cultural design. The text uses Darwinian, neurophysiological, and biological theories and research to inform B. F. Skinner's philosophy of radical behaviorism. This edition expands the focus on neurophysiological mechanisms and their relation to the experimental analysis of behavior, providing updated studies and references to reflect current expansions and changes in the field of behavior analysis.

12TH EDITION

Behavior Modification

What It Is and How To Do It

**Garry Martin, Joseph J. Pear**

This text is a comprehensive, practical presentation of the principles of behavior modification and guidelines for their application. It introduces forms of behavior modification ranging from helping children learn necessary life skills to solving personal behavior problems. The material assumes no prior knowledge of behavior modification or psychology. Cases and examples clarify issues and make the principles real. Questions for Learning support students in checking their knowledge, and Application Exercises assist students in the development of the practical skills they will need to complete behavior modification projects effectively.

9TH EDITION

Learning and Behavior**James E. Mazur, Amy L. Odum**
Southern Connecticut State University, USA

Learning and Behavior reviews how people and animals learn and how their behaviors are changed because of learning. It describes the most important principles, theories, controversies, and experiments that pertain to learning and behavior that are applicable to diverse species and different learning situations. Both classic studies and recent trends and developments are explored, providing a comprehensive survey of the field. Although the behavioral approach is emphasized, many cognitive theories are covered as well, along with a chapter on comparative cognition. Real-world examples and analogies make the concepts and theories more concrete and relevant to students.

6TH EDITION

Learning and Memory

Basic Principles, Processes, and Procedures

**W. Scott Terry**

Learning and Memory provides a balanced review of the core methods and the latest research on animal learning and human memory. Topical coverage ranges from the basic and central processes of learning, including classical and instrumental conditioning and encoding and storage in long-term memory, to topics not traditionally covered, such as spatial learning, motor skills, and implicit memory. Each chapter begins with an outline and concludes with a detailed summary. Applications and extensions are showcased in text boxes as well as in distinct applications sections in every chapter, and review and recapitulation sections are interspersed throughout the chapters.

6TH EDITION

Motivation

Biological, Psychological, and Environmental

**Lambert Deckers** Ball State University, USA

This textbook provides a complete overview of motivation and emotion, using an overarching organizational scheme of how biological, psychological, and environmental sources become motivation—the inducement of behavior, feelings, and cognition. It combines classic studies with current research and uses numerous real-world examples to engage students and make often-difficult theoretical concepts come to life. By understanding and applying the principles of motivation described in the text, students will not only discover insights into what motivates their own behavior but also how to instigate self-change.

8TH EDITION

Principles of Behavior

Richard W. Malott Western Michigan University, USA

Known for both its narrative style and scientific rigor, *Principles of Behavior* is the premier introduction to behavior analysis. Through an exploration of experimental, applied, and theoretical concepts, the authors summarize the key conversations in the field. The text can also function as the first step in a student's journey into becoming a professional behavior analyst at the BA, MA, or PhD/EdD level. Each chapter of the text is integrated with the Behavior Analyst Certification Board (BACB) task list, serving as an excellent primer to many of the BACB tasks.

2ND EDITION

The Science of Learning

Joseph J. Pear University of Manitoba, Canada

This text comprehensively and systematically covers the large body of knowledge and powerful methodologies and applications that have developed in the science of learning since the late 19th Century. It starts with the most fundamental principles and progresses toward greater complexity. The connections with biology and evolutionary science are referenced throughout, and there is coverage of both humans and animals in their natural settings. It may be used as a primary text in courses on learning, behavior analysis and conditioning, and is a resource for professional and trainee behavior analysts and those in biology, education, and clinical psychology.

4TH EDITION

Consciousness

An Introduction

Susan Blackmore , Emily T. Troscianko University of Oxford, UK

Now in its fourth edition, this highly popular text is the definitive introduction to consciousness, exploring the key theories and evidence in consciousness studies ranging from neuroscience and psychology to quantum theories and philosophy. Complete with key concept boxes, profiles of well-known thinkers, and questions and activities designed for both independent study and group work, *Consciousness* provides a complete introduction to this fascinating field, and is essential reading for students of psychology, philosophy, and neuroscience.

* For full contents and more information, visit: www.routledge.com/9781032292564**Foundations of Consciousness**

Antti Revonsuo University of Turku, Finland; University of Skövde, Sweden

The conscious mind is life as we experience it; we see the world, feel our emotions and think our thoughts thanks to consciousness. Yet for 21st century science one of the greatest challenges is to explain what consciousness really is. This book provides an easy introduction to the foundations of consciousness, asking how does consciousness, our subjective self or soul, arise from the activities of the brain? Addressing the philosophical and historical roots of the problems alongside the current scientific approaches to consciousness in psychology and neuroscience, this book examines key questions as well as delving deeper to look at altered and higher states of consciousness.

Cognitive Psychology

The Basics

Sandie Taylor University of South Wales, UK, **Lance Workman**

Series: The Basics

Cognitive Psychology: The Basics provides a compact introduction to the core topics in the field, discussing the science behind the everyday cognitive phenomena experienced by us all. The book considers laboratory and applied theory and research alongside technological developments to demonstrate how our understanding of the brain's role in cognition is improving all the time. It is an essential introductory text suitable for all students of Cognitive Psychology and related disciplines. It will also be an ideal read for any reader interested in the role of the brain in human behavior.

Fundamentals of Cognitive Science

Minds, Brain, Magic, and Evolution

Thomas Hardy Leahey

Fundamentals of Cognitive Science draws on research from psychology, philosophy, artificial intelligence, linguistics, evolution, and neuroscience to provide an engaging and student-friendly introduction to this interdisciplinary field. Whilst structured around traditional cognitive psychology topics, the book also looks at cognitive neuroscience, embodied cognition, and magic to illustrate cognitive science principles. Using extended case studies to address the most important themes, this book is suitable for upper level undergraduate and graduate courses in psychology and related fields. Please visit www.fundamentalsofcognitivescience.com for further resources.

4TH EDITION

Human Memory

Gabriel A. Radvansky University of Notre Dame, USA

Divided into three clear sections, this book provides an accessible introduction to the latest theory and theory on human memory. Beginning with coverage of the history of memory, the first section also introduces basic neuroscience and methodology. Core topics are then discussed, including sensory registers, mechanisms of forgetting, and short-term/working, nondeclarative, episodic, and semantic memory. The book concludes by looking at advanced topics in memory, such as formal models of memory, memory for space and time, autobiographical memory, memory and reality, and more. Full of student-friendly pedagogy, the book is an essential guide for all students of human memory.

3RD EDITION

Memory

Alan Baddeley The University of York, UK, **Michael W. Eysenck** Royal Holloway, University of London, UK, **Michael C. Anderson** MRC Cognition and Brain Sciences Unit, Cambridge, UK

The third edition of Memory provides students with a comprehensive and accessible introduction to the study of human memory and its applications. Written by leading researchers in the field, this bestselling textbook delivers an authoritative overview of key topic areas. The book is updated to include the latest research in neuroscience, visual short-term and working memory, visual attention and memory across the lifespan. Across the text, the scientific theory is connected to real-world questions and every-day human experiences. Memory 3e is an essential resource for all those interested in this important field and embarking on their studies in the subject.

Cognitive Neuroscience of Language

David Kemmerer Purdue University, USA

This text provides an up-to-date, wide-ranging, and pedagogically practical survey of the neural underpinnings of language. It guides students through all of the major areas of investigation, beginning with the fundamental aspects of brain structure and function and then following with key topics such as aphasia, the perception and production of speech, the meaning of words, morphology, syntax, discourse, reading and writing, sign language, and the bilingual brain. This edition has been thoroughly updated throughout, and now includes a dedicated chapter on the neural substrates of bilingualism.

2ND EDITION

Talking the Talk

Language, Psychology and Science

Trevor A. Harley University of Dundee, UK

This book provides an accessible and comprehensive introduction to psycholinguistics, which is the study of the psychological processes involved in language. It shows how it's possible to study language experimentally, and how psychologists use these experiments to build models of language processing. Structured around questions that people often ask about language, the emphasis of Talking the Talk is on how scientific knowledge can be applied to practical problems. It also stresses how language is related to other aspects of psychology, particularly in whether animals can learn language, and the relation between language and thought.

4TH EDITION

The Psychology of Language

From Data to Theory

Trevor A. Harley University of Dundee, UK

"I want this book for me, not just for my students. For the student, it's a thorough, but lively, introduction to language use in a wider context. For me, it's a valuable reminder of psycholinguistics's evolution from its concerns with the psychological reality of grammar, to its current spot at the center of modern cognitive neuroscience." - Gary S. Dell, University of Illinois at Urbana-Champaign This revised edition of the popular textbook provides a comprehensive introduction to the psychology of language for undergraduates, postgraduates, and researchers. It contains everything the student needs to know about how we acquire, understand, produce, and store language.

2ND EDITION

Face Perception

Andy Young York University, UK, **Vicki Bruce** Newcastle University, UK

Human faces are unique biological structures that convey a complex variety of important social messages. Even strangers can tell things from our faces – our feelings, our locus of attention, something of what we are saying, our age, sex and ethnic group, whether they find us attractive or approachable. Written in a clear and accessible style, this is invaluable reading for all students and researchers interested in studying face perception and social cognition.

4TH EDITION

Foundations of Sensation and Perception

George Mather University of Lincoln, UK

Foundations of Sensation and Perception offers a comprehensive and accessible introduction to the science of sensation and perception. The fourth edition of this bestselling textbook includes an extensive updating of the text to reflect the latest research, a greater focus on balance and the body senses, and a major reorganisation of the chapters for ease of use. It will be an invaluable resource for a wide range of undergraduate students in psychology, neuroscience, and related disciplines.

6TH EDITION

Sensation and Perception

Hugh J. Foley

Sensation and Perception offers students a comprehensive overview of the psychology behind human senses, from skin senses such as touch to chemical senses such as taste and smell, to our complex visual and auditory sensory systems. Featuring strong pedagogy, abundant student-friendly examples, and an engaging conversational style, this book makes technical scientific information accessible to those who are beginning to specialize in cognitive psychology. In the sixth edition, new areas of coverage include multisensory integration, neural plasticity, and cognitive neuroscience, and new pedagogy and online resources further enhance the book.

Numerical Cognition

André Knops

Series: The Basics

Numerical Cognition: The Basics provides an accessible and concise introduction to the cognitive and neural mechanisms underlying our ability to perceive, process and combine numerical information. The book covers the full breadth of this growing field, including the evolutionary origins of numerical capacities, life-span development, the cognitive mechanisms and strategies during mental arithmetic, and dysfunctional development. Written in student-friendly language, and featuring pointers to useful websites, the book seeks to explain the psychological and neurofunctional mechanisms that underpin one of the most crucial cultural techniques in modern societies.

2ND EDITION

Thinking Visually

Stephen K. Reed

This book documents the many ways pictures, visual images, and spatial metaphors influence our thinking. The book discusses recent empirical, theoretical, and applied contributions that support the view that visual thinking occurs not only where we expect to find it, but also where we do not. Much of comprehending language, for instance, depends on visual simulations of words or on spatial metaphors that provide a foundation for conceptual understanding. It will be an essential read for all students and researchers interested in Visual Thinking.

International Handbook of Thinking and Reasoning

Edited by **Linden J. Ball** University of Central Lancashire, UK, **Valerie A. Thompson** University of Saskatchewan, Canada

Series: *Routledge International Handbooks*

The International Handbook of Thinking and Reasoning brings together some of the world's leading experts in decision sciences in a single comprehensive and authoritative volume. The book considers current thinking and reasoning research, both in relation to empirical evidence and theoretical analyses. Emerging trends and cutting-edge debates in the field are positioned in relation to established findings and theories, giving a clear sense of the way in which new ideas are challenging traditional viewpoints. The handbook is essential reading for all researchers of Thinking, Reasoning, and Decision Sciences.

2ND EDITION

Problem Solving

Perspectives from Cognition and Neuroscience

S. Ian Robertson

@text: Problem solving is an integral part of everyday life, yet few books are dedicated to this important aspect of human cognition. Problem Solving provides a clear introduction to the underlying mental processes involved in solving problems, examining the methods and techniques used by both novices and experts. Alongside a comprehensive update throughout, this edition also features new content on creative problem solving, insight, and neuroscience. Each chapter is written in an accessible, student-friendly style and features a range of pedagogy, including activities, chapter summaries and further reading.

6TH EDITION

Thought and Knowledge

An Introduction to Critical Thinking

Diane F. Halpern Claremont McKenna College, USA, **Dana S. Dunn** Moravian College, USA

Thought and Knowledge applies theory and research from the learning sciences to teach students the critical thinking skills that they need to succeed in today's world. The text is grounded in psychological science and brought to life through humorous and engaging language and numerous practical and real-world examples and anecdotes. Critical thinking skills are presented in every chapter, empowering students to learn more efficiently, research more productively, and present logical, critical, and informed arguments. The skills are reviewed at the end of the chapter, and a complete list of skills with definitions and examples are included in the appendix.

A New Approach to Human Social Evolution

Persistence of Ancient Drives in Behaviour and Development

Jorge A. Colombo

This book provides an important examination into the role of evolution of human traits of dominance as central to understanding social and political events, proposing a new view on human social evolution. This book examines basic biological universal needs and behavioral profiles of non-human living beings, from which humans share essential survival components. It invites readers to think critically about the psychological evolution of the human brain. Using comparative psychology, it argues that the core of human behavior lies in the ancient, animal, universal set of survival resources hidden under various socialisation profiles.

12TH EDITION

Behavior Modification

What It Is and How To Do It

Garry Martin University of Winnipeg, Canada, **Joseph J. Pear**

This text is a comprehensive, practical presentation of the principles of behavior modification and guidelines for their application. It introduces forms of behavior modification ranging from helping children learn necessary life skills to solving personal behavior problems. The material assumes no prior knowledge of behavior modification or psychology. Cases and examples clarify issues and make the principles real. Questions for Learning support students in checking their knowledge, and Application Exercises assist students in the development of the practical skills they will need to complete behavior modification projects effectively.

Evolution and the Human-Animal Drive to Conflict

A Psychobiological Perspective

Jorge A. Colombo

Evolution and the Human-Animal Drive to Conflict examines how fundamental, universal animal drives, such as dominance/prevalence, survival, kinship, and "profit" (greed, advantage, whether of material or social nature), provide the basis for 'the evolutionary trap' that promotes the unstable, conflictive, dominant-prone individual and group human behaviours. This book will interest academics and students in social, cognitive, and evolutionary psychology, the neurosciences, paleoanthropology, philosophy, and anthropology.

9TH EDITION

Learning and Behavior

James E. Mazur Southern Connecticut State University, USA, **Amy L. Odum**

Learning and Behavior reviews how people and animals learn and how their behaviors are changed because of learning. It describes the most important principles, theories, controversies, and experiments that pertain to learning and behavior that are applicable to diverse species and different learning situations. Both classic studies and recent trends and developments are explored, providing a comprehensive survey of the field. Although the behavioral approach is emphasized, many cognitive theories are covered as well, along with a chapter on comparative cognition. Real-world examples and analogies make the concepts and theories more concrete and relevant to students.

6TH EDITION

Learning and Memory

Basic Principles, Processes, and Procedures

W. Scott Terry

Learning and Memory provides a balanced review of the core methods and the latest research on animal learning and human memory. Topical coverage ranges from the basic and central processes of learning, including classical and instrumental conditioning and encoding and storage in long-term memory, to topics not traditionally covered, such as spatial learning, motor skills, and implicit memory. Each chapter begins with an outline and concludes with a detailed summary. Applications and extensions are showcased in text boxes as well as in distinct applications sections in every chapter, and review and recapitulation sections are interspersed throughout the chapters.

8TH EDITION

Principles of Behavior

Richard W. Malott Western Michigan University, USA

Known for both its narrative style and scientific rigor, Principles of Behavior is the premier introduction to behavior analysis. Through an exploration of experimental, applied, and theoretical concepts, the authors summarize the key conversations in the field. The text can also function as the first step in a student's journey into becoming a professional behavior analyst at the BA, MA, or PhD/EdD level. Each chapter of the text is integrated with the Behavior Analyst Certification Board (BACB) task list, serving as an excellent primer to many of the BACB tasks.

3RD EDITION

The New Behaviorism

Foundations of Behavioral Science

**John Staddon**

This ground-breaking book presents a brief history of behaviorism, along with a critical analysis of radical behaviorism, its philosophy and its applications to social issues. This third edition is much expanded and includes a new chapter on experimental method as well as longer sections on the philosophy of behaviorism. It offers experimental and theoretical examples of a new approach to behavioral science. This new behaviorism provides a unified framework for the science of behavior that can be applied both to the laboratory and to broader practical issues such as law and punishment, the health-care system, and teaching.

2ND EDITION

The Science of Learning

**Joseph J. Pear** University of Manitoba, Canada

This text comprehensively and systematically covers the large body of knowledge and powerful methodologies and applications that have developed in the science of learning since the late 19th Century. It starts with the most fundamental principles and progresses toward greater complexity. The connections with biology and evolutionary science are referenced throughout, and there is coverage of both humans and animals in their natural settings. It may be used as a primary text in courses on learning, behavior analysis and conditioning, and is a resource for professional and trainee behavior analysts and those in biology, education, and clinical psychology.

3RD EDITION

Animal Learning and Cognition

An Introduction

**John M. Pearce** University of Cardiff, UK

This book provides an up to date review of the principal findings from more than a century of research into animal intelligence. This new edition has been expanded to take account of the many exciting developments that have occurred in the last ten years. Expanded areas include: extinction (to which an entire chapter is now devoted) navigation in insects episodic memory in birds imitation in birds and primates the debate about whether primates are aware of mental states in themselves and others. Selected Contents: The Study of Animal Intelligence. Associative Learning. The Conditions for Learning: Surprise and Attention. Instrumental Conditioning. Extinction. Discrimination Learning. Category Formation. Short-Term Retention. Long-Term Retention. Time, Number, and Serial Order. Navigation. Social Learning. Animal Communication and Language. The Distribution of Intelligence.

An Introduction to Human-Animal Relationships

A Psychological Perspective

Clive R. Hollin

An Introduction to Human-Animal Relationships is a comprehensive introduction to the field of human-animal interaction from a psychological perspective across a wide range of themes. This key text brings an important perspective to the field of human-animal studies and will be useful to students and scholars in the fields of psychology, sociology, animal welfare, anthrozoology, veterinary science, and zoology.

Career Paths in Human-Animal Interaction for Social and Behavioral Scientists

Edited by **Lori Kogan** Colorado State University, USA,
Phyllis Erdman Washington State University, USA

Career Paths in Human-Animal Interaction for Social and Behavioral Scientists is an essential text for students and professionals wanting to pursue a career in Human-Animal Interaction (HAI). It is exclusively designed to navigate this field and provide information on the best education, training, and background one might need to incorporate HAI into a successful career. The book clearly outlines the career paths available to social science students and professionals, from careers connected to human services of psychology, therapy, social work and journalism to research or other scholarship.

Primateology, Ethics and Trauma

The Oklahoma Chimpanzee Studies

Robert Ingersoll, **Antonina Anna Scarnà**

Primateology, Ethics and Trauma offers an analytical re-examination of the research conducted into the linguistic abilities of the Oklahoma chimpanzees. It uncovers the historical reality of this research. It has been 50 years since the first language experiments on chimpanzees. Ingersoll and Scarnà discuss how this research failed to address the emotional needs of the animals. Research into trauma has made scientific advances since those studies. It is time to consider the research from a different perspective, examining the neglect and cruelty that was inflicted on those animals in the name of psychological science.

Virtual Human-Animal Interactions

Supporting Learning, Social Connections and Well-being

Christine Yvette Tardif-Williams Brock University, Ontario, Canada, **John-Tyler Binfet** University of British Columbia, Canada

Interest in the field of human-animal interactions is burgeoning and researchers and educators are keen to understand the science undergirding research that helps us understand interactions between people and animals. Recently, exciting and innovative research is focusing on how people's virtual interactions with animals can enhance their learning, social interactions, and well-being.

Comparative Psychology and Educational Outcomes

Lessons from Project Nim

Joyce E. Butler

Comparative Psychology and Educational Outcomes is designed to empower educators to lead with wisdom, strengthen their belief that all students can learn at high standards, and create a vision of excellence that becomes actionable, allowing us to be difference makers in the lives of all learners. Connecting evidence-based strategies with day-to-day practice, this book is aimed at educational leaders (principals, superintendents, special education directors, teachers) in their role as practitioners and those working toward their certifications in the university setting.

Comparative Psychopathology

Connecting Comparative and Clinical Psychology

Daniel Marston Liberty University, **Margaret Gopaul** Yale University, University of Connecticut, **Terry Maple**

This book introduces readers to a more comprehensive and empirically based approach to psychopathology than any other approach in use by psychological professionals today. It incorporates all areas of psychological research, experimental and observation as well as clinical and medical. This approach presents a method that does not entirely replace methods like those in the DSM-5 but improves them. By reading this text, readers will find essential information about how incorporating comparative psychology into understanding psychopathology can make that understanding stronger and how this approach can help psychology can help make for a truly better and just world.

Adolescent Coping

Promoting Resilience and Well-Being

Erica Frydenberg University of Melbourne, Australia

Series: Adolescence and Society

This thoroughly revised edition presents the latest developments in the field of coping. It includes new coverage of positive psychology and updated research in neuroscience, mindfulness and the impact of social media, whilst retaining the focus on resilience and the achievement of happiness. The book includes coping in the family, how culture and context or gender determine how young people cope and decisional, problem solving and social coping. Each chapter is framed with quotes from young people and take-home messages, with implications for practice or applications. It will be of use for students of psychology, social work, mental health and education, and practitioners in these fields.

Adolescent Development

Longitudinal Research into the Self, Personal Relationships and Psychopathology

Wim Meeus Utrecht University, The Netherlands

This ground-breaking book overviews the longitudinal study of adolescent development. It offers a comprehensive introduction to theories on adolescent development, and a non-statistical overview of longitudinal models used to study development. Key topics include the development of the self, adolescent identity and personality; parent-adolescent relationships; friendships; and psychosocial problems such as anxiety, depression, delinquency, aggression and substance use. Meeus identifies fundamental patterns of adolescent development to determine why most adolescents develop into mature and organized individuals, whilst a substantial minority show an inability to mature.

Bullying in Youth Sports Training

New perspectives and practical strategies

Miguel Nery , Carlos Neto , António Rosado , Peter K. Smith Goldsmiths University of London, UK

This book explores how often bullying occurs, how long it lasts, where and when bullying takes place, the coping strategies used by victims, and the roles of bystanders and bullies. It provides new insights into theories of youth sport bullying and highlights the particular characteristics specific to bullying in sport. The book features both theoretical and practical approaches to bullying in youth sport training, providing anti-bullying guidelines based on the results of the research. It is essential reading for scholars and students in child development and sport sciences as well as sports coaches and professionals in mental health, education and social work.

Childhood, Identity and Masculinity

The Boarding School Boys

Soosan Latham York University, Toronto, Canada, **Roya Ferdows**

This volume examines the lives of ten Iranian men who were sent to boarding schools in England during the 1960s and 1970s. The reflective narratives explore issues of physical and emotional abuse received from administrators and peers, as well as the pressure of meeting expectations and becoming a man. It will be of interest to scholars of developmental psychology, childhood trauma, education, cultural psychology, men's studies, and gender. Individuals and parents interested in, and considering boarding school education will also find the narratives informative and educational.

Developmental Trauma

Theory, Research and Practice

Daniel Cruz

Developmental Trauma offers a comprehensive introduction to the research findings that help us understand the effects on human development of early childhood trauma and adaptation to stress. It explains how DTD differs from PTSD and emerges from a toxic seed planted at the beginning of an individual's lifespan development. Ideal for students of child and adolescent psychology, developmental psychology, clinical psychology, primary care and health psychology, education, social work, and urban studies. It is relevant for graduate students in applied fields such as clinical and counseling psychology, and those working with diverse children, and public health and policy.

Emotional Development from Infancy to Adolescence

Pathways to Emotional Competence and Emotional Problems

Dale F. Hay Professor of Psychology, Cardiff University
Series: *International Texts in Developmental Psychology*

This undergraduate textbook offers a broad introductory survey of all aspects of emotional development. Taking a chronological approach, each chapter focuses on a specific emotion and covers the theories and research relating to its development, from infant emotional capabilities to the changes in self-understanding and self-conscious emotions of adolescence. The book includes coverage of differences in temperament, developmental psychopathology, emotion regulation and development of emotional understanding, and highlights the importance of early experiences such as attachment. It is core reading for social and emotional development courses in developmental psychology.

Gen Z

Between Climate Crisis and Coronavirus Pandemic

Klaus Hurrelmann Hertie School of Governance, Germany, **Erik Albrecht**

Gen Z is a vital, thought-provoking portrait of an astonishing generation. Drawing on firsthand interviews and empirical evidence, it offers insight into the boom in political activism amongst those born post-2000, exploring its roots and wide implications for the future of our society. Gen Z is a compelling study of how fighting the climate crisis is only the beginning for these young people. It offers insight for all those interested in the study of adolescence and emerging adulthood, as well as teachers, youth workers, civil society activists, policymakers, politicians and parents who want to understand young people's aspirations for the future.

4TH EDITION

Identity in Adolescence 4e

The Balance between Self and Other

Laura Ferrer-Wreder Department of Psychology, Stockholm University, **Jane Kroger**

Series: *Adolescence and Society*

This 4th edition has been completely revised to address the huge social shifts in the concept of identity over the past decade. The notion of a stable identity is questioned as ideas about the fluidity of sexual, cultural and gender identity are discussed, and coverage of identity crises throughout the lifespan demonstrates how identity development now goes beyond the adolescent period.

This unique text encourages young adults to reflect on their prospective longevity for setting goals and making decisions, become aware of the aspirations and concerns of other generations, and consider personal direction in relation to peer group norms. The sources for learning about mental health and relationships include a blend of academic research, insights from literature, student interviews with older and younger relatives, and personal observations.

Online Peer Engagement in Adolescence

Positive and Negative Aspects of Online Social Interaction

Edited by **Nejra Van Zalk**, **Claire P. Monks**

Series: *Studies in Adolescent Development*

This book provides an in-depth insight into what is currently known and relatively unknown about youths' online-exclusive, offline-exclusive, and conjoint social networks. It delivers state-of-the-art current reviews of the literature in the field, along with implications for future research directions and practical applications. With a focus on what spending time with online-exclusive peers entails, in terms of both potential positive as well as negative consequences for friendship quality, intimacy, and well-being, it offers a more nuanced commentary on youths' online peer engagement. It is important reading for students and researchers in adolescent development and psychology.

Psychosocial Development in Adolescence

Insights from the Dynamic Systems Approach

Edited by **E. Saskia Kunnen**, **Naomi M. P. Ruiter**, **Bertus F. Jeronimus**, **Mandy A. E. Gaag**

Series: *Studies in Adolescent Development*

This is the first book of its kind to conceptualise adolescent development using Dynamic Systems Theory (DST). Drawing on multiple variants of DST, international experts illustrate why this approach, which allows for non-linear trends and different trajectories of development, is particularly suitable for examining this period of transition. With a specific focus on applications, each chapter covers key topics in both normative and non-normative development to address the mechanisms that underlie the developmental process of individual adolescents in different domains.

Understanding Adolescents' Political Agency

Examining How Political Interest Shapes Political Development

Håkan Stattin

Series: *Studies in Adolescent Development*

This ground-breaking volume shows that young people largely shape their own political development, and that to understand young people's political development we must consider their political agency. Launching a new field of research internationally, this volume is essential reading for researchers, students, educators and policy developers interested in young people's political and civic attitudes, engagement, communication, core values and the emergence of intrinsic political sophistication.

2ND EDITION

Wired Youth

The Online Social World of Adolescence

Ilan Talmud, Gustavo Mesch

Series: *Adolescence and Society*

This fully updated new edition offers a research-based analysis of the online social world of adolescence. Combining perspectives from sociology, psychology and education with a focus on social constructionism, technological determinism and social networking, the authors present an empirically anchored review of the field. The book covers topics such as youth sociability, relationship formation, and cyberbullying to examine how young people use the internet to construct or maintain their inter-personal relationships. It is suitable for advanced students of adolescent psychology, youth studies, media studies and the psychology and sociology of interpersonal relationships.

Youth and Internet Pornography

The impact and influence on adolescent development

Richard Behun, Eric W. Owens

Series: Adolescence and Society

This much-needed book provides an in-depth, non-judgemental look at how consumption of Internet pornography and Sexually Explicit Internet Material (SEIM) impacts the social, physical, emotional, and sexual development of adolescents. The book blends theory and application, offering a thorough understanding of the theoretical constructs and research, alongside clinical illustrations and guided practice exercises. It will be essential reading for professionals and policy makers hoping to mitigate outcomes in counselling, youth and social work and education, as well as supplementary reading for courses in human sexuality and development.

Youth Civic and Political Engagement

Martyn Barrett University of Surrey, UK, **Dimitra Pachi**

Series: Adolescence and Society

Grounded in a detailed review of relevant literature, Barrett and Pachi outline the numerous available definitions of civic and political participation, before evaluating how psychological, social and macropolitical factors might influence the way in which young people choose to engage with their communities. Youth Civic and Political Engagement provides a unique overview of empirical findings drawn from various geographical regions and disciplines, incorporated with the authors' own research.

Youth in Superdiverse Societies

Growing up with globalization, diversity, and acculturation

Edited by **Peter F. Titzmann, Philipp Jugert**

Series: Studies in Adolescent Development

This important volume brings together a variety of theoretical, methodological and international approaches to the study of multiculturalism and diversity in adolescence. The first part looks how adolescents from both immigrant and non-immigrant populations negotiate diversity and multiculturalism. The second part presents new methods and innovative migration research, and the final part focuses on interventions, highlighting approaches that help in dealing with multicultural societies in classrooms and schools or other settings. It is valuable reading for students studying ethnic identity in psychology sociology, education, anthropology, linguistics and political science.

Adulthood

An Introduction

Rita M. Curl-Langager

Adulthood: An Introduction offers a thorough foundation to learn, consolidate, and apply developmental concepts and current knowledge to the psychology of adult development. It illustrates major ideas with carefully selected research that is widely referenced and topically pertinent to development in early, middle, and late adulthood. Designed to encourage students to think critically about topics of adulthood in both academic and applied settings, *Adulthood* is appropriate for undergraduate students in psychology and related disciplines such as addiction studies, speech pathology, criminal justice, nursing, and business.

An Interdisciplinary Approach to Aging, Biohacking and Technology

Hacking Your Age

Edited by **L.F. Carver**

An Interdisciplinary Approach to Aging, Biohacking and Technology focuses on a broad range of issues that covers everything from the most basic ways technology and biohacking influence people's everyday lives to concerns about equity, globalization, and how we humans produce, consume, and are consumed by our technologies. Critically examining the journey of ageing and exploring techniques such as biohacking, this book is for students studying ageing and technology, including courses such as psychology, sociology, philosophy, cultural studies, health studies and gerontology. It will also be of interest to scholars curious about an interdisciplinary approach to age and technology.

Intergenerational Contact Zones

Place-based Strategies for Promoting Social Inclusion and Belonging

Edited by **Matthew Kaplan, Leng Leng Thang, Mariano Sánchez, Jaco Hoffman**

This is the first book to explore the foundations and applications of intergenerational contact zones (ICZs) from an international perspective. The book is filled with poignant examples of how ICZs breathe new life into communities and social practices. It focuses on practical descriptions and developments around ICZ to nurture practitioners' and researchers' capacity to translate and infuse the notion of ICZ into their work. Containing over 25 short chapters that showcase a wide range of possibilities with ICZs, this book is a how-to tool kit to help various professionals and user groups as they begin to consider ways to develop and nurture engaging intergenerational spaces.

2ND EDITION

Research Design in Aging and Social Gerontology

Quantitative, Qualitative, and Mixed Methods

Joyce Weil University of Northern Colorado, USA

This comprehensive book provides a review across methodological approaches and data-collection methods commonly used with older adults in real-life settings. It addresses the role of normative age-related sensory, cognitive, and functional changes, as well as the influence of generational cohort (age-period-cohort). This text is intended for upper-level undergraduates and masters students in aging and gerontology as well as students in human development, applied anthropology, psychology, public health, sociology, and social work settings. Healthcare professionals, social workers, and care managers who work with older adults will also find this text a valuable resource.

Women and Retirement

Challenges of a New Life Stage

Susan Moore , Doreen Rosenthal University of Melbourne, Australia

This is the first book of its kind to examine women's retirement within a lifespan perspective. Based on the authors' extensive research study with 1000 retired Australian women, the book presents models of various retirement trajectories and compares women's experiences with the more widely researched retirement experiences of men. Problems that women face in managing this life stage in fulfilling ways while juggling family, financial, friendship, ageing and health issues are examined, and guidelines for successful retirement are offered. It is invaluable for courses on aging and health within psychology, women's studies and sociology, and of use to health and social care professionals.

2ND EDITION

Child Development

Theories and Critical Perspectives

Rosalyn H. Shute Flinders University, Australia and Federation University, Australia, **Phillip T. Slee** Flinders University, Australia

Series: International Texts in Developmental Psychology

Child Development: Theories and Critical Perspectives presents an overview of well-established and recent theories of child development, placing them in historical, philosophical and cultural contexts. It also considers how theory can best be translated into practice with children and adolescents. The second edition has been written in light of considerable recent advances in the field of child development, and now includes many reflections on, and from, a range of cultures. It will be essential reading for students taking advanced courses in developmental psychology, and also for students in education, social work and social policy.

2ND EDITION

Children and Television

Barrie Gunter University of Leicester, UK (Emeritus), **Jill Gunter**

Series: Psychology Press & Routledge Classic Editions

Does violence on TV lead to violent behaviour? Children and Television presents research evidence into the effects of television on children and their responses to it. This Classic Edition includes a new introduction to the current context of the book, exploring the emergence of new TV channels, enhanced home recording capacity, archiving and streaming services replacing traditional forms of viewing with non-linear viewing, and their impact on children.

Children as Agents in Their Worlds

A Psychological-Relational Perspective

Sheila Greene Trinity College Dublin, Ireland, **Elizabeth Nixon** Trinity College Dublin, Ireland

This book approaches the topic of children's agency from a fresh perspective, emphasising what psychological and developmental science can bring to a debate which has been dominated by sociology and anthropology. It reviews research on agency from family, school and wider society domains, pinpointing both strengths and weaknesses and drawing out ways in which theory and practice in relation to children as agents in their own lives might be developed. Combining a psychosocial approach with perspectives from sociology, anthropology and education it offers a stronger theoretical base for research and policy and will be essential reading for students and professionals in these fields.

Developmental Play Assessment for Practitioners (DPA-P) Guidebook and Training Website

Project Play

Karin Lifter, **Emanuel J. Mason**, **Amanda M. Cannarella**, **Ashley D. Cameron**

Developmental Play Assessment for Practitioners (DPA-P) Guidebook and Training Website: Project Play offers a comprehensive assessment of naturally occurring play activities for evaluating young children's developmental progress accurately, so that useful interventions can take place as early as possible. It will be of great benefit for early intervention personnel, speech-language pathologists, physical therapists, occupational therapists, and school psychologists.

Developmental Trauma

Theory, Research and Practice

Daniel Cruz

Developmental Trauma offers a comprehensive introduction to the research findings that help us understand the effects on human development of early childhood trauma and adaptation to stress. It explains how DTD differs from PTSD and emerges from a toxic seed planted at the beginning of an individual's lifespan development. Ideal for students of child and adolescent psychology, developmental psychology, clinical psychology, primary care and health psychology, education, social work, and urban studies. It is relevant for graduate students in applied fields such as clinical and counseling psychology, and those working with diverse children, and public health and policy.

2ND EDITION

Developments

Child, Image, Nation

Erica Burman

How does developmental psychology connect with (what used to be called) the developing world? What do cultural representations indicate about the contemporary politics of childhood? How is concern about child sexual exploitation linked to wider securitization anxieties? In other words: what is the political economy of childhood, and how is this affectively organized? This new edition of Developments: Child, Image, Nation, fully updated, is a key conceptual intervention and resource, reflecting further on the contexts and frameworks that tie children to national and international agendas.

Emotional Development from Infancy to Adolescence

Pathways to Emotional Competence and Emotional Problems

Dale F. Hay Professor of Psychology, Cardiff University

Series: International Texts in Developmental Psychology

This undergraduate textbook offers a broad introductory survey of all aspects of emotional development. Taking a chronological approach, each chapter focuses on a specific emotion and covers the theories and research relating to its development, from infant emotional capabilities to the changes in self-understanding and self-conscious emotions of adolescence. The book includes coverage of differences in temperament, developmental psychopathology, emotion regulation and development of emotional understanding, and highlights the importance of early experiences such as attachment. It is core reading for social and emotional development courses in developmental psychology.

Handbook of Children's Rights

Global and Multidisciplinary Perspectives

Edited by **Martin D. Ruck**, **Michele Peterson-Badali**,
Michael Freeman

With contributions from a wide range of international scholars, The Handbook of Children's Rights brings together research, theory, and practice from diverse perspectives on children's rights. It addresses some of the major scholarly tensions and policy debates comprising the current discourse on children's rights, including the best interests of the child, evolving capacities of the child, states' rights versus children's rights, rights of children versus parental or family rights, and balancing protection and participation. This comprehensive and cosmopolitan volume serves as an important reference for scholarly and policy-driven interest in the voices and perspectives of children and youth.

Understanding Children's Worry

Clinical, Developmental and Cognitive Psychological Perspectives

Charlotte Wilson

Series: Essays in Developmental Psychology

Wilson draws on theories from across psychology to explain how children's worry is influenced by developmental and systemic factors, examining the processes involved in pathological worry in a range of childhood anxiety disorders. Covering topics including different definitions of worry, the influence of children's development on worry, Generalised Anxiety Disorder in children, and the role parents play in children's worry, this book offers a new model of worry in children with important implications for prevention and intervention strategies. This is valuable reading for students in clinical, educational and developmental psychology, and professionals in child mental health.

4TH EDITION

The Development Of Play

David Cohen writer, psychologist and filmmaker, UK

The Development of Play explores the central role of play in childhood development. David Cohen examines how children play with objects, language, each other, and their parents to reveal how play enables children to learn how to move, think, speak and imagine, as well as to develop emotionally and socially. This new edition includes the latest research on the impact of digital technology, brain development, cultural differences in play and gendered toys, whilst providing advice on how parents can play creatively with their children. It is essential reading for Early Years, health care and education professionals as well as undergraduate students in developmental psychology and education.

Children and Sexual-Based Online Harms

A Guide for Professionals

Catherine Knibbs

This sensitive guide for professionals who work with children and young people explains the serious issues of sexual content and harm that children face online, and how they impact developmental, neurological and social development, and mental health and wellbeing. Covering technologies used by children aged two through to adulthood, it offers parents and professionals clear, evidence-based information about sexual based online harm. It will equip professionals with the knowledge to support their work and direct conversations about the harms online that children and young people face.

Children and Television Consumption in the Digital Era

Use, Impact and Regulation

Barrie Gunter University of Leicester, UK

Do children spend too much time with screen technologies? This key new volume explores the rapid evolution of television and how children in particular have led the way in non-linear viewing. It examines the wide body of literature to present evidence for positive and negative effects of children's screen experiences, exploring the perennial question of the impact on children's cognitive and behavioural development of exposure to specific types of content. Key topics explored include television's role in how children learn about social roles, antisocial and prosocial behaviour, in child health and well-being, and how parents can mediate children's screen behaviour.

Online Harms and Cybertrauma

Legal and Harmful Issues with Children and Young People

Catherine Knibbs

This vital, sensitive guide explains the serious issues children face online and how they are impacted by them on a developmental, neurological, social, mental health and wellbeing level. Covering technologies used by children aged two through to adulthood, it offers parents and professionals clear, evidence-based information about online harms, their effects, and what they can do to support their child should they see, hear or bear witness to these events online. It is essential reading for those training and working with children in psychological, educational and social work contexts, as well as parents, policy makers and those involved in development of online technologies.

An Introduction to Mathematical Cognition

Camilla Gilmore Loughborough University, UK, **Silke M. Göbel** University of York, UK, **Matthew Inglis** Loughborough University, UK

Series: International Texts in Developmental Psychology

The last decade has seen a rapid growth in our understanding of mathematical learning and performance and an increased recognition of the importance of the topic. The book traces the development of mathematical skills from basic number concepts to mathematical proofs, emphasising the hierarchical nature of mathematical development from early childhood to research-level mathematics. Drawing on diverse methodology from behavioural experiments to brain imaging, each chapter begins with a classic problem used to investigate mathematical cognition. The book provides an essential introduction to the field of mathematical cognition suitable for undergraduate or graduate students.

2ND EDITION

Cognitive Development and Cognitive Neuroscience

The Learning Brain

Usha Goswami University of Cambridge, UK

The new edition of this best-selling textbook on Cognitive Development has been thoroughly updated with the latest research in neuroscience. Going beyond Piaget and traditional theories it demonstrates how new data from brain science require a new theoretical framework for teaching cognitive development, based on learning. Coverage new to this edition includes a focus on epigenetics and the nature-nurture debate, the latest cross-cultural research and developments in the study of Theory of Mind. This book is essential for students of developmental and cognitive psychology, education, language and the learning sciences.

Development of Adult Thinking

Interdisciplinary Perspectives on Cognitive Development and Adult Learning

Edited by Eeva Kallio University of Jyväskylä, Finland

Development of Thinking in Adulthood is a timely synthesis and evaluation of the current knowledge and emerging issues relating to adult cognitive development and learning. Focusing on psychological and educational cutting-edge research as well as giving an overview of the key theorists such as Piaget and Kohlberg, the authors offer a holistic view on the development of adult thinking, representing perspectives from developmental, personality and social psychology, as well as education, comparative religion, and philosophy. It will suit students and researchers in developmental psychology and related courses as well as adult educators and teachers working in adult education.

Early Word Learning

Edited by Gert Westermann, Nivedita Mani Georg-August-Universität Göttingen, the Netherlands

Series: Current Issues in Developmental Psychology

Word learning may seem like a relatively simple task facing young language learners, when compared with the demands of learning grammar. However, closer enquiry highlights the multiple challenges in lexical acquisition. In this compilation, international experts consider word learning to be a continuous learning process, examining children's interaction with words in their entirety. This novel approach looks at the full evolution of the word from the proto-word unit devoid of meaning, to mapping meaning, to skilled recognition. The book draws on cutting-edge research in infant eye-tracking, neuroimaging techniques and computational modelling to bring together diverse perspectives.

International Handbook of Language Acquisition

Edited by Jessica Horst, Janne von Koss Torkildsen

This outstanding new international reference book covers a wide range of topics central to language development, from the underlying processes and role of language input to key areas of development such as semantics and morphology. It also includes broad coverage of topics in atypical language development and interventions targeting language skills. Through an expert balance of theoretical underpinnings with data from applied settings, the book considers differences between language learning in the lab as compared to the real world. It will be essential reading for students and researchers in psychology, and related fields such as linguistics and communication disorders.

Routledge International Handbook of Visual-motor skills, Handwriting, and Spelling

Theory, Research, and Practice

Edited by Yanyan Ye, Tomohiro Inoue, Urs Maurer, Catherine McBride

Series: Routledge International Handbooks

The Routledge International Handbook of Visual-motor skills, Handwriting, and Spelling explores the potentially controversial field of early literacy education. It aims to offer scholars and practitioners an analysis of how and why handwriting skills benefit early literacy learning, especially spelling acquisition, and how this can enrich experiences for children and educators. This comprehensive survey will be essential reading for scholars and students of developmental psychology, education, and literacy research.

Visual and Motor Cognition in Infants and Children

What Develops and What Stays the Same

Christiane Lange-Küttner

Series: International Texts in Developmental Psychology

This insightful book offers an authoritative yet accessible introduction to the development of visual abilities and motor skills in infants and children. Based on theory and cutting-edge up-to-date research about the development of non-verbal intelligence, it provides readers with essential knowledge about the foundations of typical and atypical development. The book encourages and stimulates new research ideas by discussing the most important research results to date. This text will be of interest to students and instructors as well as researchers in the fields of developmental, clinical, educational and cognitive psychology as well as neuroscience and physical education.

8TH EDITION

Developmental Science

An Advanced Textbook

Edited by **Marc H. Bornstein** NICHD, USA, the Institute for Fiscal Studies, and UNICEF, **Michael E. Lamb** Cambridge University, UK

Developmental Science: An Advanced Textbook is the most complete and up-to-date advanced introduction to the field available today. Since its initial publication, the key purpose of this Advanced Textbook has been to furnish inclusive developmental perspectives on all theoretical, methodological, and substantive areas in developmental science. This eighth edition is no exception, as it continues to underscore the dynamic and exciting status of contemporary developmental science. Ideal for advanced undergraduate and introductory graduate courses, this Advanced Textbook is accompanied by support materials for students and instructors.

Aphasia

The Basics

Jane Marshall

Series: The Basics

This book provides a comprehensive yet accessible introduction to aphasia, or loss of language, a complex condition that affects approximately a third of stroke survivors. Anyone interested in language needs to know about aphasia and will find here the perfect beginner's guide. The book provides an invaluable introduction to aphasia for students of speech and language therapy, health professionals and others with an interest in stroke care. It also offers easy-to-read answers to many of the questions posed by family members of stroke survivors.

3RD EDITION

The Handbook of Child and Adolescent Clinical Psychology

A Contextual Approach

Alan Carr University College Dublin, Ireland

The third edition incorporates important advances in the field to provide a reliable and accessible resource for clinical psychologists. Thoroughly updated throughout, each chapter dealing with specific clinical problems includes cases examples and detailed discussion of diagnosis, classification, epidemiology and clinical features. New material includes the latest advances in: child and adolescent clinical psychology; developmental psychology and developmental psychopathology; assessment and treatment programmes. This book is invaluable as both a reference work for experienced practitioners and as an up-to-date, evidence-based practice manual for clinical psychologists in training.

Understanding ADHD

A Guide to Symptoms, Management and Treatment

Anna Maria Re , Agnese Capodiecì

Series: Understanding Atypical Development

This essential guide provides accessible, concise, evidence-based guidelines on ADHD, offering a deeper scientific understanding of the condition and its consequences. Written for parents and health, education and social care professionals involved in the field, it offers ideas and insights for managing the condition in daily family life and promoting the most effective self-regulation strategies for children and adolescents. It explains the basic theories on ADHD and covers key topics including parent-child relationships, helping children understand their condition, friendships with peers, comorbidities, classroom strategies, and how families and professionals can best work together.

Bullying in Youth Sports Training

New perspectives and practical strategies

Miguel Nery, Carlos Neto, António Rosado, Peter K. Smith Goldsmiths University of London, UK

This book explores how often bullying occurs, how long it lasts, where and when bullying takes place, the coping strategies used by victims, and the roles of bystanders and bullies. It provides new insights into theories of youth sport bullying and highlights the particular characteristics specific to bullying in sport. The book features both theoretical and practical approaches to bullying in youth sport training, providing anti-bullying guidelines based on the results of the research. It is essential reading for scholars and students in child development and sport sciences as well as sports coaches and professionals in mental health, education and social work.

Developmentally Appropriate Curriculum and Instruction

Pedagogy for Knowledge, Attitudes, and Values

Edited by Ana Garcia-Nevarez, Kimberly A. Gordon Biddle

This timely and accessible volume explores how our understanding of research in child development can help cultivate the knowledge, skills, and attitudes children need for informed and thoughtful participation in society by viewing the curriculum through a developmental lens. Developmentally Appropriate Curriculum and Instruction will be essential reading for students of child development and education, as well as educators and those in teacher training who are interested in how theory and research can be effectively harnessed to improve children's outcomes.

Educational Neuroscience

Development Across the Life Span

Edited by Michael S. C. Thomas Birkbeck, University of London, UK, **Denis Mareschal** Birkbeck, University of London, UK, **Iroise Dumontheil** Birkbeck, University of London, UK

Series: Frontiers of Developmental Science

Expert contributors offer state of the art research in educational neuroscience together with evidence-based recommendations for practice. This important volume explores four key themes: Individual differences, or what makes children perform better or worse in the classroom; the nature of individual differences at different stages in development; research that has investigated activities that might give general benefits to cognition; and the translation of research findings into classroom practices. Specific topics explored include neuropsychological perspectives on socioeconomic disparities in educational achievement, executive function, and emotional development.

Educational Neuroscience

The Basics

Cathy Rogers, Michael S. C. Thomas

Series: The Basics

Educational Neuroscience: The Basics explains how the brain works and its priorities for learning, and shows how educational neuroscience, when combined with existing knowledge of human and social psychology, and with teacher expertise, can improve outcomes for students. It is a compact and lively introductory text for students of psychology, neuroscience and education and courses where these disciplines interconnect. It will also be essential reading for educational professionals, including teachers, heads, educational advisors and the many industry bodies who govern and train them, as well as anyone interested in the fascinating story of how we learn.

The Child at School

Interactions with peers and teachers, 2nd Edition

Peter Blatchford UCL Institute of Education, University of London, UK, **Anthony D. Pellegrini** University of Minnesota, USA, **Ed Baines**

Series: International Texts in Developmental Psychology

The Child at School presents a rigorous overview of child development in the school environment. It provides the theoretical foundations necessary to understand child development in school contexts, and practical guidance grounded on empirical research. Written by leading researchers, it is informed by a multi-cultural perspective, making its conclusions relevant to students and practitioners internationally. This edition includes a new chapter on how peer relationships affect learning. It will be essential for students of child development and educational psychology and for trainee and practicing teachers, social workers, clinical psychologists and policy makers.

The Psychology of School Bullying

Peter K. Smith Goldsmiths University of London, UK

Series: The Psychology of Everything

The Psychology of Bullying provides a highly accessible overview about the nature of bullying, what is known about it, its possible effects, and what can be done about it. It focuses on bullying at school with special attention given to the development of cyberbullying, and a final chapter looks at bullying in other contexts. Illustrated with examples and case studies, it examines who bullies and who gets bullied, what is known about effective coping strategies, and what friends, peers and the school can do to help. It will be essential reading for students, teachers and parents looking for psychological insights into what bullying is.

2ND EDITION

Developments

Child, Image, Nation

Erica Burman

How does developmental psychology connect with (what used to be called) the developing world? What do cultural representations indicate about the contemporary politics of childhood? How is concern about child sexual exploitation linked to wider securitization anxieties? In other words: what is the political economy of childhood, and how is this affectively organized? This new edition of *Developments: Child, Image, Nation*, fully updated, is a key conceptual intervention and resource, reflecting further on the contexts and frameworks that tie children to national and international agendas.

2ND EDITION

Fundamentals of Developmental Psychology

Peter Mitchell University of Nottingham, **Fenja Ziegler** University of Lincoln

This new edition of the highly successful Fundamentals of Development: The Psychology of Childhood has been thoroughly revised and updated to reflect the exciting new findings in the thriving area of developmental psychology. The book addresses a number of fascinating questions including: Are children born good or bad? What do children understand about the mind? What roles do nature and nurture play in child development? The book is student-friendly, with all topics described in straightforward language, amply illustrated in full colour, and organized as standalone chapters. The text will make an excellent companion to introductory courses on developmental psychology.

Lifespan Developmental Systems

Meta-theory, Methodology and the Study of Applied Problems

Ellen A. Skinner, **Thomas Kindermann**, **Andrew Mashburn** Portland State University, USA

This innovative textbook takes advanced undergraduate and graduate students "behind the curtain" of standard developmental science, so they can begin to appreciate the generative value and methodological challenges of a lifespan developmental systems perspective. With the aid of extensive online supplementary materials, it envisions applied developmental science as focused on ways to use knowledge about human development to help solve societal problems in real-life contexts, and considers applied developmental research as purpose-driven, field-based, community-engaged, and oriented toward efforts to optimize development.

The Psychology of Human Social Development

From Infancy to Adolescence

Sandie Taylor University of South Wales, UK, **Lance Workman** University of South Wales, UK

The Psychology of Human Social Development is a major new undergraduate textbook which presents the essential core topics and reflects the exciting new findings in this thriving field. The book follows a thematic approach looking at key topics in social development in childhood and adolescence, including personality development and research methods. The authors examine multiple perspectives, including the state-of-the-art social-ecological approach, and discuss normative development with issues related to "abnormal" development. It will be essential reading for psychology students on courses in Social Development and relevant for related fields such as education, gender studies and nursing.

6TH EDITION

Development in Infancy

Martha E. Arterberry Colby College, USA, **Marc H. Bornstein** UNICEF and Institute for Fiscal Studies and National Institute of Child Health and Human Development

Development in Infancy reflects many new discoveries that have transformed our understanding of infants and their place in human development, with an emphasis on 21st century research. Organized topically, the book covers physical, perceptual, cognitive, language, and social development, in addition to describing theories of development, contexts of development, research methods, and implications of research in infancy for social policies and interventions. Key issues in infancy studies—those having to do with how nature and nurture transact and with interrelations among diverse domains of development—are woven throughout the book.

Black Matters

African American and African College Students and Graduates Tell Their Life Stories

Edited by **Andrew Garrod**, **Robert Kilkenny**

Black Matters presents an anthology of stories of African American and African undergraduate and graduate students' experiences at college, offering lifespan perspectives on their formative relationships and influences, life-changing events, and the role their heritage has played in shaping their personal identities. The rich narratives in this text provide insight into the relationship between collegiate experiences and racial identities. It will be essential reading for students and scholars of psychology, education, cultural anthropology, sociology and creative writing, and for those responsible for campus climate and student experience.

Developmental Transitions

Exploring stability and change through the lifespan

Sarah Crafter Institute of Education, University of London, UK, **Rachel Maunder** University of Northampton, UK, **Laura Soulsby** Liverpool University, UK

Series: International Texts in Developmental Psychology

Bringing together different theoretical and conceptual perspectives and a broad range of empirical research, this book encompasses a range of complex transitional forms. Covering topics such as health transitions, transitions in friendships and romantic relationships, career transitions, and societal transitions, this book takes the reader beyond a focus on childhood and adolescence, to look at the whole lifespan. Developmental Transitions is essential reading for all undergraduate and graduate students of developmental and cultural psychology and is also a valuable resource for academics and practitioner audiences interested in stability and change as people age.

Socialisation During the Life Course

Klaus Hurrelmann Hertie School of Governance, Germany, **Ulrich Bauer** Bielefeld University, Germany

This comprehensive text highlights new developments in sociological, educational and psychological aspects of socialisation, examining how human beings as "subjects" – experiencing, thinking and acting individuals – confront the material, social and cultural "objects" of their environment and sustain their position. The authors provide an overview of the most important theories of socialisation, then integrate these using the Productive Processing of Reality (PPR) model. This novel approach is applied to a life course analysis, examining developmental tasks and the challenges of productive processing of the internal and external reality at various stages of development.

2ND EDITION

Father-Daughter Relationships

Contemporary Research and Issues

Linda Nielsen Wake Forest University, North Carolina, USA

Series: *Textbooks in Family Studies*

A new, fully updated edition of the first research based text to focus on father-daughter relationships, this provocative book examines factors that can strengthen or weaken these relationships. Compelling personal stories from fathers and daughters, including celebrities and politicians, bring the research to life. Controversial questions engage the reader and questionnaires demonstrate how to apply the research to one's life. How these relationships are denigrated in the media and in some mental health and legal systems, is examined along with the changing patterns of these relationships and behaviors that constitute good fathering.

Fathering in Cultural Contexts

Developmental and Clinical Issues

Jaipaul Roopnarine, **Elif Dede Yildirim**

Series: *International Texts in Developmental Psychology*

Fathering in Cultural Contexts brings together the most recent theory and research on fathering in diverse cultural communities. Exploring a range of disciplinary perspectives, fathering is considered within the major sociocultural, demographic and economic factors that influence men's involvement and their family relationships. The book highlights the changing nature of fathering, draws connections to child development and well-being, and discusses the efficacy of interventions with fathers. It will be essential reading for students in child development, family studies, psychology, education, anthropology, sociology and social work, and for professionals providing child and family services.

Parenting Across Cultures from Childhood to Adolescence

Development in Nine Countries

Edited by **Jennifer E. Lansford**, **W. Andrew Rothenberg**, **Marc H. Bornstein**

Series: *Studies in Parenting Series*

This vital volume advances understanding of how parenting changes or remains the same from childhood to adolescence in diverse cultural contexts. Revealing the Parenting Across Cultures project, it analyses annual interviews with parents and children in nine countries. It offers insight into trajectories of parenting, exploring parents' warmth, control, setting rules, and knowledge of children's activities and whereabouts. Expert authors based in the countries examined, provide researchers and students of psychology, human development, family studies, sociology, and cultural anthropology, as well as professionals working with families, with a truly global understanding of parenting.

Transforming Early Head Start Home Visiting

A Family Life Education Approach

Bridget A. Walsh University of Nevada, Reno, USA, **Jennifer A. Mortensen** University of Nevada, Reno, USA

Research on home visiting shows that Early Head Start (EHS) programs benefit from additional training and resources that streamline philosophy and content. The authors propose that alignment with Family Life Education's (FLE) strengths-based methodology brings more consistency through a model of prevention, education, and collaboration with families. This text is the first to outline a partnership between FLE and EHS home visiting. It explores a qualitative study of FLE integrated in a current EHS program and application of FLE methodology to home visiting topics.

3RD EDITION

Handbook of Parenting

Volume 2: Biology and Ecology of Parenting, Third Edition

Edited by **Marc H. Bornstein** UNICEF and Institute for Fiscal Studies and National Institute of Child Health and Human Development

This third edition of the Handbook of Parenting brings together an array of field-leading experts to understand many diverse aspects of parenting. Volume 2 relates parenting to its biological roots and sets it in its ecological framework. Part I, on the Biology of Parenting, examines the evolution of parenting and non-human parenting, as well as the biological bases of human parenting. A deep understanding of parenting also depends on the ecologies in which it takes place. Part II, on the Ecology of Parenting, examines ancient and modern histories of parenting as well as various social factors to provide an overarching relational developmental contextual systems perspective.

3RD EDITION

Handbook of Parenting

Volume 3: Being and Becoming a Parent, Third Edition

Edited by **Marc H. Bornstein** NICHD, USA, the Institute for Fiscal Studies, and UNICEF.

This third edition of the Handbook of Parenting brings together field-leading experts to understand the diverse aspects of parenting. Volume 3, Being and Becoming a Parent, considers a large cast of characters responsible for parenting and examines their psychological characteristics and social interests. Part I shows how multifaceted is the constellation of caregivers: mothers and fathers, coparents, adolescent parents, grandparents, single, divorced and remarried parents, lesbian and gay parents, and nonparental caregivers. Part II considers the intergenerational transmission of parenting, reproductive technologies, stages of parental development, and parents' well-being and emotions.

3RD EDITION

Handbook of Parenting

Volume 4: Social Conditions and Applied Parenting, Third Edition

Edited by **Marc H. Bornstein** NICHD, USA, the Institute for Fiscal Studies, and UNICEF.

The Handbook of Parenting brings together an array of field-leading experts to understand the many diverse aspects of parenting. Volume 4, Social Conditions and Applied Parenting, describes socially defined groups of parents and social conditions that promote variation in parenting. Part I, on Social and Cultural Conditions of Parenting, considers ethnic and minority parenting as well as effects of disability, employment, and poverty on parenting. Part II, on Applied Issues in Parenting, examines maternal deprivation, attachment, and acceptance/rejection, as well as serious challenges such as stress, depression, substance abuse, psychopathology, and incarceration.

3RD EDITION

Handbook of Parenting

Volume 5: The Practice of Parenting, Third Edition

Edited by **Marc H. Bornstein** NICHD, USA, the Institute for Fiscal Studies, and UNICEF.

This third edition of the Handbook of Parenting brings together an array of field-leading experts to understand the many diverse aspects of parenting. Volume 5, The Practice of Parenting, describes the nuts-and-bolts of parenting and the promotion of positive parenting practices. Part I, on Practical Parenting, reviews the ethics of parenting, the development of children's self-regulation, discipline, prosocial and moral development, and resilience as well as children's language, play, cognitive, academic achievement and peer relationships. Part II, on Parents and Social Institutions, explores childcare, activities, media, schools, healthcare, the law, public policy, and religion.

The Psychology of Prenatal Development

A Therapeutic Synopsis of Human Existence

Klaus Evertz

This important book introduces the basics of prenatal psychology and works through the current scientific findings in the psychology and psychosomatics of pregnancy and birth. Through exploring bio-psycho-social relationships, as well as historical and cultural perspectives, this interdisciplinary approach easily breaks down specialist discussions into simple concepts. This is an essential resource for students across a range of disciplines, including developmental psychology, paediatric medicine, neuroscience, infancy and early child development, nursing, social work, and early childhood education. It will also be of interest to researchers, clinicians, and related professionals.

Asian Parenting

Meanings, Characteristics, and Implications

Edited by **Xinyin Chen**

Series: *Studies in Parenting Series*

Asian Parenting provides a comprehensive and scholarly discussion of the distinct features, meanings, and implications for human development of contemporary Asian parenting, beyond Western theoretical frameworks. It is an essential text for students and scholars of psychology, sociology, cultural anthropology, education, and family studies who are interested in culture and human development. It will also guide interventions on the parts of governmental and nongovernmental organizations operating in Asian societies.

Biopsychology

The Basics

Philip Winn , Madeleine Grealy

Series: *The Basics*

Biopsychology: The Basics is a concise, accessible and illuminating introduction to the field of biopsychology. The book explores what psychology is in the broadest sense and how combining it with a biological perspective offers a deeper understanding of behavior and mental life. With suggestions for further reading and an extensive glossary of key terms, this book is an engaging and ideal introduction for those coming to the subject for the first time.

Psychobiological Footprints through Human Development

How Our Experiences Shape Who We Are

Livio Provenzi

Embark on an illuminating voyage through the biological foundations of human nature and development with Psychobiological Footprints through Human Development. This unique volume unveils the intricate dance between genetics, neuroscience, and environment, offering a holistic understanding of how we become who we are. This volume is invaluable to graduate students in the fields of developmental psychology, neuroscience, genetics, and related disciplines. Delving into the biological roots of behaviour, cognition, and emotion, it will also equip practitioners, researchers, and educators with invaluable insights to enrich their practice.

Childhood Friendships and Peer Relations

Friends and Enemies

Barry Schneider University of Ottawa, Canada

Series: International Texts in Developmental Psychology

Substantially revised and updated, this new edition provides a fascinating and timely overview of what we know about peer relationships in childhood. It provides an up-to-date and accessible overview of how children develop social competence in different environments, from school to cyberspace. The new edition is informed by new research techniques, both qualitative and quantitative, and provides increased coverage of cultural differences in peer relationships, and how bullying is perceived and managed within peer groups. It will be essential reading for students of developmental psychology and educational psychology, and anyone training for a career working with children and young people.

Multidisciplinary Perspectives on the Psychology of Exclusion

From Rejection to Personal and Social Harmony

Agnieszka Wilczyńska

This new volume considers one of the most pressing topics of a generation, the sense of social exclusion, rejection and loneliness experienced by many adolescents and young adults. It offers insights from psychological and biochemical research, explains the role of the brain, mind and body in the development of a sense of belonging over the lifespan. Illustrated with examples of the consequences of exclusion drawn from the author's clinical work, it surveys the latest research in the field and introduces an innovative framework for understanding the development of the sense of belonging.

New Perspectives on Moral Development

Edited by **Charles C. Helwig** University of Toronto, Canada

Series: Current Issues in Developmental Psychology

The contributors to this book provide an innovative and integrative approach to fundamental questions about the nature and acquisition of morality. In addressing these questions, the chapters draw on new work on the origins of morality in infancy and the early years, comparative approaches examining morality in primates, and new perspectives on moral emotions. Each chapter is framed in theory and methodology and provides examples of new research to address important questions in the field. This book is essential reading for researchers and advanced undergraduate and postgraduate students studying moral development and developmental psychology.

3RD EDITION

Nurturing Natures

Attachment and Children's Emotional, Sociocultural and Brain Development

Graham Music Tavistock and Portman Clinics, London, UK

This new edition of the bestselling text, *Nurturing Natures*, provides an indispensable synthesis of the latest scientific knowledge about children's emotional development. Integrating a wealth of both up-to-date and classical research, it is an accessible, enjoyable text that always keeps in mind children recognisable to academics, practitioners and parents. Equipped with key takeaways, reflection questions, further reading and video chapter introductions, this book is essential reading for childcare students, teachers, social workers, health visitors, early years practitioners and those training or working in child counselling, psychiatry, and mental health.

Promoting Well-Being in the Pre-School Years

Research, Applications and Strategies

Erica Frydenberg University of Melbourne, Australia, **Janice Deans**, **Rachel Liang**

This book, based on an 8-year evidence-based research study, offers real-life strategies to support social and emotional development and wellbeing for children aged 3-5 years, in both educational and family settings. Drawing on the principles from positive education, coping and resilience, it provides a range of strategies to support young children's developing understandings of what it means to be happy and to flourish as a socially responsible member of the family and wider community. It is essential reading for teachers, parents and professionals who work with young children, as well as academics in child development.

Taking Development Seriously A Festschrift for Annette Karmiloff-Smith

Neuroconstructivism and the Multi-Disciplinary Approach to Understanding the Emergence of Mind

Edited by **Michael S. C. Thomas** Birkbeck, University of London, UK, **Denis Mareschal** Birkbeck, University of London, UK, **Victoria Knowland**

This influential festschrift honours the legacy of Annette Karmiloff-Smith, a seminal thinker in the field of child development and a pioneer in developmental neuroscience. The current volume brings together many of the researchers, collaborators, and students who worked with Dr Karmiloff-Smith to show how her ideas have influenced and continue to influence their own research. *Taking Development Seriously* is essential reading for students and scholars in child development and developmental neuroscience.

The Development of Empathy

Phenomenology, Structure and Human Nature

Larysa Zhuravlova, Oleksiy Chebykin

This thought-provoking volume offers psychological perspectives on the formation of empathy and how this determines both antisocial and prosocial behaviors in individuals. It offers a theoretically grounded and empirically proven integrated approach, helping readers gain a holistic understanding of human nature, and the need for empathic interaction between people. Considering a vision for a society based on empathic relationships, which could be a deterrent to discrimination, help resolve problems of environmental issues, harmonize interpersonal relationships and resolve conflict, this new text is for advanced students of developmental, and educational psychology.

The Psychology of Attachment

Robbie Duschinsky, Pehr Granqvist, Tommie Forslund

Series: *The Psychology of Everything*

What do we actually mean by 'attachment'? How do different caregiving styles impact attachment in children? How do early caregiving experiences impact later development? The Psychology of Attachment is an essential introduction to attachment, offering an accessible explanation of the theory, unpicking common misunderstandings, and providing a balanced overview of key research findings. This unique book introduces the reader to new ways of thinking about the role of relationships, caregiving, and child development, and the way in which they shape our lives.

The Psychology of Human Social Development

From Infancy to Adolescence

Sandie Taylor University of South Wales, UK, **Lance Workman** University of South Wales, UK

The Psychology of Human Social Development is a major new undergraduate textbook which presents the essential core topics and reflects the exciting new findings in this thriving field. The book follows a thematic approach looking at key topics in social development in childhood and adolescence, including personality development and research methods. The authors examine multiple perspectives, including the state-of-the-art social-ecological approach, and discuss normative development with issues related to "abnormal" development. It will be essential reading for psychology students on courses in Social Development and relevant for related fields such as education, gender studies and nursing.

Theory of Mind in Middle Childhood and Adolescence

Integrating Multiple Perspectives

Edited by **Rory T. Devine, Serena Lecce**

From leading international experts, this landmark text explores how the neural, cognitive and social changes of middle childhood and adolescence shape ongoing development of theory of mind, and how theory of mind helps children navigate life. It considers three key themes: Biological and cognitive bases of theory of mind; how theory of mind is shaped by social experiences; atypical development and youth mental health in middle childhood and adolescence. It offers in depth understanding for all students of developmental and cognitive psychology, neuroscience, clinical psychology and psychiatry, and education, and identifies an agenda for future scholarship on this exciting topic.

Why Siblings Matter

The Role of Brother and Sister Relationships in Development and Well-Being

Naomi White University of Cambridge, UK, **Claire Hughes** University of Cambridge, UK

Series: Essays in Developmental Psychology

Why Siblings Matter is a cornerstone text on siblinghood, offering a much-needed scientific update on the supportive role of sibling relationships. Integrating findings from a 10 year longitudinal study alongside wider research, it provides a lifespan perspective examining the impact of sibling relationships on children's development and well-being. Sibling relationships in diverse populations are discussed and practical implications of the research are considered, with take-home messages for promoting positive sibling interactions. It will be invaluable for students and researchers in developmental psychology and family studies and professionals in education, health and social work.

Advancing Developmental Science

Philosophy, Theory, and Method

Edited by **Anthony S. Dick**, **Ulrich Müller** University of Victoria University of Victoria, Canada

Advancing Developmental Science reviews the state-of-the-science in theoretical, methodological, and topical research, with a unique focus on the scholarship that developed within a process-relational framework. It establishes how this broad conceptual framework differs from others, introduces definitions and key figures in different topical areas within developmental science, and lays out a rationale for the topics discussed. Comprehensive in its treatment of the foundational issues that are at the forefront of human development, this text is a necessary resource for graduate students and researchers interested in how the person changes over the life span.

4TH EDITION

Concepts and Theories of Human Development

Richard M. Lerner Tufts University, Massachusetts, USA

Concepts and Theories of Human Development is the most comprehensive and in-depth overview of the foundational theoretical contributions to understanding human development and the influence of these contributions for contemporary research and application in developmental science. The book discusses the assumptions involved in such topics as stage theories, the nature-nurture issue, the issue of continuity-discontinuity, and the important role of philosophical ideas about theories – in particular, metatheories – in understanding the links between theory and research.

Handbook of Integrative Developmental Science

Essays in Honor of Kurt W. Fischer

Edited by **Michael F. Mascolo** Merrimack College, Andover, Massachusetts, USA, **Thomas R. Bidell**

The Handbook of Integrative Developmental Science explores how dynamic skill theory can be employed to further advance theory and research in developmental science. Few models today speak so systematically to both the invariant organization and dynamic variability of development, and none rival dynamic skill theory's unique juxtaposition of breadth and precision at the theoretical, methodological, and analytical levels. This handbook brings together a diverse collection of essays that not only illustrate the comprehensive scope of dynamic skill theory, but also forge new research directions for the field.

Lifespan Developmental Systems

Meta-theory, Methodology and the Study of Applied Problems

Ellen A. Skinner, **Thomas Kindermann**, **Andrew Mashburn** Portland State University, USA

This innovative textbook takes advanced undergraduate and graduate students "behind the curtain" of standard developmental science, so they can begin to appreciate the generative value and methodological challenges of a lifespan developmental systems perspective. With the aid of extensive online supplementary materials, it envisions applied developmental science as focused on ways to use knowledge about human development to help solve societal problems in real-life contexts, and considers applied developmental research as purpose-driven, field-based, community-engaged, and oriented toward efforts to optimize development.

Models Of Cognitive Development

Ken Richardson

Series: *Psychology Press & Routledge Classic Editions*

Models of Cognitive Development offers a careful introduction, with numerous examples, to the vast diversity of models of what knowledge and reasoning are, and how they develop. It provides students, researchers, and comparative theoreticians with a cohesive understanding of the area by organising diverse schools, frameworks and approaches according to a much smaller set of underlying assumptions or preconceptions, which themselves can be historically interrelated. By understanding these, it's possible to find pathways around the area more confidently as a whole, to see the 'wood' as well as the theoretical forest and be able to react to individual models more positively.

Assessment and Diagnosis of Neurodevelopmental Disorders in Young Children

A Practical Guide

Neil Nicoll

This essential guide is a research-based practical handbook for assessing Global Developmental Delay and other neurodevelopmental disorders in young children. It explains diagnostic, support and treatment services available for children and their families, clarifying psychological and medical terminology, and global legislative and societal factors relating to assessment. Including a chapter of illustrative case studies of children with developmental disorders, this book will be essential reading for educational, clinical, and developmental psychologists working with children and their families, as well as post-graduate students training in the field.

A New Introduction to Psychological Theory and Current Debate

Sue Fletcher-Watson University of Edinburgh, **Francesca Happé**

This new edition of Happé's provides a concise overview of contemporary psychological theories about autism. Using a 'levels of explanation' framework, the authors explore the relationship between psychological (cognitive) explanatory models and biological or behavioural models and considers their clinical and educational impact. The book includes voices giving the autistic point of view, as well as an analysis of cutting edge questions for future research such as issues of neurodiversity. It is essential reading for undergraduate and postgraduate students in psychology as well as practitioners in clinical or educational psychology who require theoretical understanding.

Child and Adolescent Psychology

Typical and Atypical Development

Stephen von Tetzchner University of Oslo, Norway

The developmental pathways that children and adolescents follow can be typical or atypical, and our understanding of each is changing. This unique textbook provides an engaging and comprehensive overview of the major themes and perspectives within developmental psychology, but also integrates an understanding of the processes that result in common disorders.

Communication in Atypical Infants and Toddlers

Christina F. Papaeliou

This book presents a comparative review of the latest studies and data on prelinguistic communication and early semantic development for a range of disorders. Papaeliou offers a critical analysis of the literature, compares key theoretical approaches, and interprets data on development in atypical populations. This is ideal reading for psychologists, paediatricians, speech therapists, special educators and students in developmental psychology.

A Critical Approach to Conceptual and Historical Issues in Psychology

Soul, Self, and Science

Stanley O. Gaines, Jr. Brunel University London, UK

This book examines the evolving concept of human consciousness throughout the ages to show how humanity progressed from 'studies of the soul' to a science of the mind including the self – a primary concern of contemporary psychology. Of particular interest to postgraduate students on MSc conversion courses, the book will also interest undergraduate students completing history of psychology, conceptual and historical issues in psychology, history and systems of psychology, and related modules. This textbook was designed to comply with the QAA Subject Benchmark Statement in Psychology and the BPS accreditation guidelines for content in Conceptual and Historical Issues in Psychology

2ND EDITION

A History of Psychology

Globalization, Ideas, and Applications

Robert B. Lawson University of Vermont, USA, **E. Doris Anderson** University of Vermont, USA, **Antonio Cepeda-Benito** University of Vermont, USA

Global, interdisciplinary, and engaging, this textbook integrates materials from philosophical and biological origins to the historical development of psychology. Its extensive coverage of women, minorities, and psychologists around the world emphasizes psychology as a global phenomenon. In tracing psychology from its origins in early civilizations, ancient philosophy, and religions to modern science, technology, and applications, this book integrates overarching psychological principles and ideas that have shaped the global history of psychology, keeping an eye toward the future of psychology. Revised throughout, this new edition also includes a new chapter on clinical psychology.

2ND EDITION

A History of Psychology in Ten Questions

Lessons for Modern Life

Michael Hyland

The second edition of this student-friendly book uses the history of psychology as a backdrop to provide a commentary on key historical developments and modern dilemmas, whilst encouraging readers to think about questions affecting life today. This insightful text encourages readers to question their own lives and the wider society by providing an engaging introduction to debates in history and contemporary society. The book is also the ideal resource for undergraduate students of psychology taking CHIPS and other history of psychology modules, as well as anyone generally interested in learning more about this fascinating subject.

Investigating School Psychology

Pseudoscience, Fringe Science, and Controversies

Edited by **Michael I. Axelrod** University of Wisconsin, Eau Claire, USA, **Stephen Hupp** Clinical Psychologist and Professor of Psychology at Southern Illinois University Edwardsville (SIUE), USA.

Series: Investigating Psychology Pseudoscience

Investigating School Psychology provides a fascinating exploration of the field of school psychology through the lens of pseudoscience and fringe science. Contributions from leaders in the fields of school psychology, clinical psychology, and education honor the role of science in the field while also exploring and guarding against the harms that pseudoscience can cause. This book is valuable supplemental reading in undergraduate and graduate courses in education and school psychology, and is also a beneficial reference for practicing school psychologists to distinguish between science and pseudoscience in their practice.

The History and Evolution of Psychology

A Philosophical and Biological Perspective

Brian D. Cox Hofstra University, USA

This book discusses key figures in history in the context of their time, takes students on a carefully-formulated, chronological journey through the build-up of psychology from ancient times to the present, and seeks to draw students into the way science is done, rather than merely presenting them with historical fact. Students will learn not only the 'what', but the 'why' of the history of psychology and will acquire the necessary background historical material to fully understand those concepts. Organized around a series of paradigms, the book seeks to portray psychology as an on-going, evolving process, rather than a theory.

Introductory Psychology and the Human Condition

Cultural Adaptation in Pursuit of Self-Actualization

Jeffrey C. Levy Seton Hall University, USA

Introductory Psychology and the Human Condition provides an engaging, cohesive, and practical treatment of traditional psychological principles and theories. The book uses Maslow's human needs hierarchy and Bronfenbrenner's ecological theory of development as organizational schemas for considering how cultures have evolved to address human needs. It relates major psychological processes including biology, perception, motivation, learning, and cognition to lifespan and personality development in nomadic hunter-gatherer and technologically enhanced cultures. It is core reading for introductory students and will appeal also to a general audience interested in psychology.

Applied Psychology for Foundation Year

Key Ideas for Foundation Courses

Wendy Garnham

Applied Psychology for Foundation Year: Key Ideas for Foundation Courses introduces students to topical issues and controversies within specific areas of Applied Psychology. Bringing together current theories and studies from a number of areas within Applied Psychology through a series of interesting and current debates and controversies. This is a key textbook for both foundation year and introductory psychology courses and will be of interest to anyone wanting to delve into topical issues in contemporary psychology.

Investigating Pop Psychology

Pseudoscience, Fringe Science, and Controversies

Edited by **Stephen Hupp** Clinical Psychologist and Professor of Psychology at Southern Illinois University Edwardsville (SIUE), USA., **Richard Wiseman**

Series: *Investigating Psychology Pseudoscience*

Investigating Pop Psychology provides the basic tools required to make evidence-informed decisions and thoughtfully distinguish science from pseudoscience through the application of scientific skepticism. This book offers an engaging read which encourages students to think critically about the information they are exposed to during their academic careers and beyond.

5TH EDITION

Themes, Issues and Debates in Psychology

Richard Gross

Themes, Issues and Debates in Psychology offers a thematic approach to the central topics, theories and areas of contemporary psychological research. This book focuses on the issues that comprise a series of fundamental questions that should be asked about any and all areas of research and covers key contemporary debates. In doing so, it provides insight into key contemporary theoretical perspectives. Themes, Issues and Debates in Psychology is ideal reading for all students and is relevant to undergraduate courses in psychology.

A Student Guide to Writing an Undergraduate Psychology Honors Thesis

Ross A. Seligman , Lindsay Mitchell

A Student Guide to Writing an Undergraduate Psychology Honors Thesis takes students through the entire process of creating a full-scale research project, from selecting a topic, choosing an experimental or correlational design, to writing and presenting their paper. The book offers valuable guidance on developing broader skills like communicating with your supervisor, time management and critical writing skills. Designed for any student that is currently working on an independent research project, this book is the perfect companion for those working on their senior honours thesis in psychology.

2ND EDITION

An Evidence-based Guide to College and University Teaching

Developing the Model Teacher

Aaron S. Richmond Metropolitan State University of Denver, USA, **Guy Boysen** McKendree University, USA, **Regan A. R. Gurung** University of Wisconsin, USA

An Evidence-based Guide to College and University Teaching outlines a definition of "model teaching" based on research evidence and accepted best practices in high education. Teachers at all levels of skill and experience can benefit from clear, objective guidelines for defining and measuring quality teaching. To fulfil this need, this book outlines six fundamental areas of teaching competency—model teaching characteristics—and provides detailed definitions of each characteristic. The book is useful for teachers, trainers, and administrators responsible for promoting excellence in college teaching.

Teaching Psychology

A Step-by-Step Guide

Douglas A. Bernstein University of South Florida, USA, **Sue Frantz**, **Stephen L. Chew**

Now in its fourth edition, Teaching Psychology synthesizes the latest pedagogical research on effective teaching and translates it into recommendations for classroom application. It explores the rapidly changing academic landscape and offers innovative ideas for teaching psychology and creating inclusive classrooms where all students can experience a sense of belongingness and psychological safety. This is a cutting-edge teaching guide for psychology teachers, and a vital resource for training psychology instructors or those undertaking a teaching psychology course. It is also a useful text for more experienced faculty who wish to reevaluate their current teaching practices.

Advanced Multitrait-Multimethod Analyses for the Behavioral and Social Sciences

Edited by **Jonathan Lee Helm**

Series: *European Association of Methodology Series*

This book summarizes a range of new analytic tools for multitrait-multimethod (MTMM) data. Providing an expository yet accessible approach to cutting-edge developments for MTMM analysis, a selection of quantitative researchers reveal their recent contributions to the field including non-technical summaries and empirical examples. This book will serve as a stepping stone for applied researchers seeking to adopt MTMM analysis into their program of research, and will be relevant to researchers, both within a professional and academic context, across the social and behavioral sciences.

4TH EDITION

An Introduction to Multilevel Modeling Techniques

MLM and SEM Approaches

Ronald Heck University of Hawaii, Manoa, USA, **Scott L. Thomas** University of Vermont, USA

Series: *Quantitative Methodology Series*

This text offers a comprehensive treatment of multilevel models for univariate and multivariate outcomes. It explores their similarities and differences and demonstrates why one model may be more appropriate than another, given the research objectives. New to this edition is an expanded focus on the nature of different types of multilevel data structures, varied modelling methods for examining longitudinal data, expanded coverage illustrating different model-building sequences, an expanded set of applied examples; and use of Mplus, R, SPSS, Stata with selected examples of model-building input files included in the chapter appendices and a more complete set of files available online

2ND EDITION

Applied Power Analysis for the Behavioral Sciences

2nd Edition

Christopher L. Aberson Humboldt State University, USA

Applied Power Analysis for the Behavioral Sciences is a practical guide to statistical power analyses for psychology and related fields. The book provides a guide to conducting analyses that is appropriate for researchers and students, including those with limited quantitative backgrounds. It covers in detail practical topics such as how to estimate expected effect sizes and power analyses for complex designs. The topical coverage of the text, an applied approach, in-depth coverage of popular statistical procedures, and a focus on conducting analyses using R make the text a unique contribution to the power literature. An accompanying R package called pwr2ppl (av

Applied Structural Equation Modeling using AMOS

Basic to Advanced Techniques

Joel Collier

An integral guide for postgraduates and researchers on how to forge a strong methodology while studying their respective phenomenon of interest. Cutting out any abstract definitions and highlighting current best practices heavily prevalent in psychology literature, Collier tackles advanced topics in an accessible and engaging manner. He provides step-by-step instructions on how to run analyses, highlights where the important results are in the output, and shows how to clearly present final results.

4TH EDITION

Applying the Rasch Model

Fundamental Measurement in the Human Sciences

Trevor Bond James Cook University, Australia, **Zi Yan** The Education University of Hong Kong, HK, **Moritz Heene**

Recognised as the most influential publication in the field, ARM facilitates deep understanding of the Rasch model and its practical applications. The authors review the crucial properties of the model and demonstrate its use with examples across the human sciences. Readers will be able to understand and critically evaluate Rasch measurement research, perform their own Rasch analyses and interpret their results. Intended as a text for graduate courses in measurement, item response theory, (advanced) research methods or quantitative analysis in social sciences. Professionals in these areas will also appreciate the book's accessible introduction.

2ND EDITION

Categorical Data Analysis for the Behavioral and Social Sciences

Razia Azen The University of Wisconsin- Milwaukee, USA, **Cindy M. Walker** The University of Wisconsin- Milwaukee, USA

Featuring a practical approach with numerous examples, the second edition focuses on helping the reader develop a conceptual understanding of categorical methods, making it a much more accessible text than others on the market. The authors cover common categorical analysis methods and emphasize specific research questions that can be addressed by each analytic procedure, including how to obtain results using SPSS, SAS, and R, so that readers are able to address the research questions they wish to answer. This book is ideal for graduate students of psychology, educational psychology, human development and family studies, sociology, public health, and business.

Contemporary Issues in Exploratory Data Mining in the Behavioral Sciences

Edited by **John J. McArdle** University of Southern California, USA, **Gilbert Ritschard** University of Geneva, Switzerland

Series: *Quantitative Methodology Series*

This book reviews the latest techniques and the most popular software programs in exploratory data mining (EDM) for the analysis of data in the social and behavioral sciences to help readers assess the predictive value of combinations of variables in large data sets. Reliable EDM techniques for predicting various risk mechanisms are integrated throughout. Examples and insights from the contributors illustrate the use of the techniques in practice. Reviewing methodology and applications, the techniques covered include decision, regression, and SEM tree models, growth mixture modeling, and time based categorical sequential analysis. The book is intended for researchers and advanced students.

3RD EDITION

Detection Theory

A User's Guide

Michael J. Hautus University of Auckland, New Zealand, **Neil A. Macmillan** University of Massachusetts Amherst, **C. Douglas Creelman**

Detection Theory: A User's Guide is an introduction to one of the most important tools for the analysis of data where choices must be made, and performance is not perfect. In these cases, detection theory can transform judgments about subjective experiences, such as perceptions and memories, into quantitative data ready for analysis and modeling. This modern summary of signal detection theory is both a self-contained reference work for users and a readable text for graduate students and researchers learning the material either in courses or on their own.

D-scoring Method of Measurement

Classical and Latent Frameworks

Dimitar Dimitrov

Series: *Quantitative Methodology Series*

D-scoring Method of Measurement presents a unified framework of classical and latent measurement referred to as D-scoring method of measurement (DSM). Provided are detailed descriptions of DSM procedures and illustrative examples of how to apply the DSM in various scenarios of measurement. The DSM is designed to combine merits of the traditional CTT and IRT for the purpose of transparency, ease of interpretations, computational simplicity of test scoring and scaling, and practical efficiency, particularly in large-scale assessments.

2ND EDITION

Event History Analysis With Stata

2nd Edition

Hans-Peter Blossfeld Bamberg University, Germany, **Götz Rohwer**

This volume provides an introduction to event history models using Stata, a widely used and powerful statistical program that provides tools for data analysis. It guides students and researchers from recording event-oriented data, to data organization to application using the software to the interpretation of results. Throughout, statistical theory is explained, and the strengths and limitations of each model are described in detail. Thoroughly updated for use with Stata v.14, the volume is an invaluable resource for students and researchers in psychology, economics, sociology and political science.

Handbook of Advanced Multilevel Analysis

Edited by **Joop Hox** Utrecht University, the Netherlands, **J. Kyle Roberts** Southern Methodist University, Dallas, Texas, USA

Series: *European Association of Methodology Series*

Considered the definitive resource on advanced multilevel analysis, this new handbook features contributions from the leaders in the field. The authors address the latest applications and the difficulties that result as more complicated models are developed. Each chapter features examples that use actual datasets. These datasets, and the code to run the models, are available on the book's website. Divided into five sections, the first provides an introduction, Part 2 focuses on multilevel latent variable modeling, Section 3 addresses longitudinal models, and estimation problems are examined in section 4. The book concludes with statistical design issues. Intended for researchers in psychology, education, and the social and health sciences, as well as a text for graduate level courses. A basic knowledge of multilevel modeling is assumed.

Handbook of Computational Social Science, Volume 1

Theory, Case Studies and Ethics

Edited by **Uwe Engel** University of Bremen, Germany, **Anabel Quan-Haase**, **Sunny Liu**, **Lars E Lyberg**

Series: *European Association of Methodology Series*

This handbook is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field, showcasing novel statistical modeling and machine learning methods, and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. With its broad coverage of perspectives (theoretical, methodological, computational), international scope, and interdisciplinary approach, this important resource is integral reading for advanced undergraduates, postgraduates and researchers engaging with computational methods across the social sciences, as well as those within the scientific and engineering sectors.

Handbook of Item Response Theory Modeling

Applications to Typical Performance Assessment

Edited by **Steven P. Reise** University of California at Los Angeles, USA, **Dennis A. Revicki**

Series: *Multivariate Applications Series*

This handbook reviews classic and emerging IRT methods & applications that are revolutionizing psychological measurement, particularly for health outcome assessments used to demonstrate treatment effectiveness. Conceptual & statistical issues confronting researchers in psychology, education, & medicine are addressed including multidimensional & explanatory models. There are examples using real data, some from NIH-PROMIS. The book reviews the most significant IRT models & the obstacles that arise in their application. Chapters review the literature & describe related research methods, apply the material, and suggest future directions.

5TH EDITION

IBM SPSS for Intermediate Statistics

Use and Interpretation, Fifth Edition

Nancy L. Leech University of Colorado at Denver, USA, **Karen C. Barrett** Colorado State University, USA, **George A. Morgan** Colorado State University, USA

This book reviews how to choose the statistic based on the design, interpret output, and write about the results to help readers analyze data using SPSS 22. Readers learn to: assess data reliability; determine whether data meet the assumptions of statistical tests; and calculate and interpret effect sizes and power. Basic statistics is reviewed along with chapters on MLM, MANOVA, and factor analysis. The key SPSS windows needed to perform the analyses are provided along with annotated output, interpretation questions, and problems for review. Data sets, SPSS syntax, and instructors' materials are on the web. This text is ideal for students and researchers in a variety of disciplines.

Introduction to Item Response Theory Models and Applications

James Carlson

Series: *Multivariate Applications Series*

This is a highly accessible, comprehensive introduction to item response theory (IRT) models and their use in various aspects of assessment/testing. The book employs a mixture of graphics and simulated data sets to ease the reader into the material and covers the basics required to obtain a solid grounding in IRT. This book is an essential text for instructors and higher level undergraduate and postgraduate students of statistics, psychometrics, and measurement theory across the behavioral and social sciences, as well as testing professionals.

Introductory Statistics

A Conceptual Approach Using R

William B. Ware University of North Carolina, USA, **John M. Ferron** University of South Florida, USA, **Barbara M. Miller** Elon University, USA

This comprehensive text is aimed at undergraduate and graduate level statistics courses in education, psychology, and other social sciences. A conceptual approach, built around common issues and problems rather than statistical techniques, allows students to understand the conceptual nature of statistical procedures and to focus on cases and examples of analysis. This is one of the first statistics texts in the social sciences using R as the principal statistical package.

Longitudinal Analysis

Modeling Within-Person Fluctuation and Change

Lesla Hoffman University of Kansas, USA

Series: Multivariate Applications Series

This class-tested introduction emphasizes the relatedness of the models that builds a strong foundation of the basics to better prepare readers for the more advanced models to come. Organized by research design, the text emphasizes modeling decisions unique to longitudinal or repeated measures data. Examples with sample results sections emphasize the steps involved in reporting the model specification and the decision-making and interpretation processes. The website features the book's data sets, syntax and sample output for various programs, and exercises. Ideal for advanced students and researchers in the behavioral and social sciences, prerequisites include familiarity with GLM and SEM.

Longitudinal Multivariate Psychology

Edited by Emilio Ferrer University of California, Davis, USA
, Steven M. Boker , Kevin J. Grimm

Series: Multivariate Applications Series

This volume presents a collection of chapters focused on the study of multivariate change. As people develop and change, multivariate measurement of that change and analysis of those measures can illuminate the regularities in the trajectories of individual development, as well as time dependent changes in population averages. As longitudinal data have recently become much more prevalent in psychology and the social sciences, models of change have become increasingly important. This collection focuses on methodological, statistical, and modeling aspects of multivariate change and applications of longitudinal models to the study of psychological processes.

3RD EDITION

Multilevel Analysis

Techniques and Applications, Third Edition

Joop Hox Utrecht University, the Netherlands, **Mirjam Moerbeek** Utrecht University, The Netherlands, **Rens van de Schoot** Utrecht University, the Netherlands

Series: Quantitative Methodology Series

Applauded for its clarity, this accessible text helps readers apply multilevel techniques to their research. Hox introduces a general framework on multilevel modeling which covers both observed and latent variables in the same model. Basic models and examples are discussed in non-technical terms with an emphasis on understanding the methodological and statistical issues involved in using these models. The estimation and interpretation of multilevel models is demonstrated using realistic examples from various disciplines including psychology, education, public health, and sociology.

3RD EDITION

Multilevel and Longitudinal Modeling with IBM SPSS

Ronald H. Heck University of Hawaii, Manoa, **Scott L. Thomas** University of Vermont, USA, **Lynn N. Tabata** University of Hawaii, Manoa

Series: Quantitative Methodology Series

This text demonstrates how to use the multilevel- and longitudinal-modeling techniques available in IBM SPSS (Version 26). Adopting a workbook format, the text walks readers through setting up, running, and interpreting a variety of different types of multilevel and longitudinal models using the linear mixed-effects model (MIXED and GENLIMIXED) platforms in SPSS. This text is an essential resource for graduate students taking courses on multilevel, longitudinal, and latent variable modeling, multivariate statistics, or advanced quantitative techniques.

3RD EDITION

Multiple Regression and Beyond

An Introduction to Multiple Regression and Structural Equation Modeling

Timothy Z. Keith University of Texas, Austin, USA

Multiple Regression and Beyond offers a conceptually oriented introduction to multiple regression (MR) analysis and structural equation modeling (SEM), along with analyses that flow naturally from those methods. By focusing on the concepts and purposes of MR and related methods, rather than the derivation and calculation of formulae, this book introduces material to students more clearly, and in a less threatening way. In addition to illuminating content necessary for coursework, the accessibility of this approach means students are more likely to be able to conduct research using MR or SEM--and more likely to use the methods wisely.

2ND EDITION

Structural Equation Modeling With EQS

Basic Concepts, Applications, and Programming, Second Edition

Barbara M. Byrne University of Ottawa, Canada

Series: Multivariate Applications Series

Researchers and students who want a less mathematical alternative to the EQS manual will find exactly what they're looking for in this practical text. Written specifically for those with little to no knowledge of structural equation modeling (SEM) or EQS.

Structural Equation Modeling with Mplus

Basic Concepts, Applications, and Programming

Barbara M. Byrne University of Ottawa, Canada

Series: Multivariate Applications Series

The book opens with an introduction to the fundamental concepts of SEM and the MPlus program followed by single-group analyses and multiple-group applications and multitrait-multimethod and latent growth curve and multilevel models. Intended for researchers, practitioners, and students who wish to use SEM and MPlus in their work, a prerequisite of basic statistics through regression analysis is recommended.

Using R for Item Response Theory Model Applications

Insu Paek Florida State University, USA, **Ki Cole**
Oklahoma State University, USA

This book introduces basic concepts of IRT and detailed information on how to use R IRT programs for IRT applications. It focuses on the widely used IRT applications using R, with detailed guidance with which readers can follow and conduct IRT applications. Datasets are provided on the supplementary website so that readers can follow along with the provided code and understanding the output. It covers both unidimensional and multidimensional IRT modeling. It is intended for beginners of IRT, graduate students, applied researchers, and those who want to learn and use R IRT programs, in education, psychology and other related disciplines.

6TH EDITION

Applied Multivariate Statistics for the Social Sciences

Analyses with SAS and IBM's SPSS, Sixth Edition

Keenan A. Pituch The University of Texas at Austin, USA,
James P. Stevens Emeritus, University of Cincinnati, USA

Noted for its breadth and depth of coverage of multivariate statistics and its emphasis on power, this classic text focuses on a conceptual understanding of the material rather than on proving results. Numerous examples, along with use of SAS and SPSS, indicate what the numbers mean and how to interpret the results.

3RD EDITION

Research Methods in Applied Settings

An Integrated Approach to Design and Analysis, Third Edition

Jeffrey A. Gliner Colorado State University, Fort Collins, USA,
George A. Morgan Colorado State University, USA,
Nancy Leech University of Colorado, Denver

This crystal clear, applied text teaches readers how to plan, conduct, and write a research project and select and interpret data through its integrated approach to research methods. Although not a statistics book, readers learn to master which technique to use when and how to analyze results, making them better consumers of research. Organized around the steps of conducting a research project, independent sections and chapters can be read in any order for utmost learning flexibility. A consistent framework increases comprehension. Numerous examples, diagrams, tables, key terms, summaries, applied problems and questions, and suggested readings further promote understanding.

Teaching Statistics and Quantitative Methods in the 21st Century

Edited by **Joseph Lee Rodgers** Vanderbilt University, USA

Series: Multivariate Applications Series

This volume has two principal aims. Firstly, it provides innovative, practical and clear guidance for students who are training to teach statistics and quantitative methods to undergraduates or who are already teaching and want to improve their knowledge and skills. Secondly, it inspires students and instructors to think critically about their teaching of statistics and quantitative methods, and to be more aware of, and receptive to, the developments in their field and to be willing to incorporate these developments into their teaching. It will appeal to instructors and graduate students in all behavioral and social science disciplines that require the teaching of statistics.

Transforming Professional Practice in Education

Psychology, Dialogue, and the Practice of Becoming Human

Simon Gibbs, David Leat, Wilma Barrow

Focusing on teaching and learning in educational institutions, this text explores the value of enhancing dialogue to improve both professional relationships and practices. It focuses on the belief that education should be about being and becoming human, and that humans are relational beings who develop and flourish within reciprocal relationships. This book is important reading for clinical, educational and other applied psychologists. It is also of value to those within educational institutions, such as SENDCos and those responsible for the safety of children and young people.

Adapting Psychological Tests and Measurement Instruments for Cross-Cultural Research

An Introduction

Vladimir Hedrih

Psychologists are becoming more aware of the importance of cross-cultural adaptation of tests and the need to have adequate skills in this area. This book provides a thorough introduction to challenges faced and methods used for adapting psychological tests for application in multiple cultures. It covers an array of topics, including the conceptualization of cultural differences and its relevance for psychological testing and functioning of psychological tests, intellectual property regulations relevant for psychological testing and adaptation, personal data protection and rights of test examinees/research participants, and interpretation of individual results.

2ND EDITION

Cross-Cultural Analysis

Methods and Applications, Second Edition

Edited by **Eldad Davidov** University of Cologne, Germany, and University of Zurich, Switzerland, **Peter Schmidt** University of Marburg, Germany, **Jaak Billiet** University of Leuven, Belgium, **Bart Meuleman**

Series: European Association of Methodology Series

Intended to bridge the gap between the latest methodological developments and cross-cultural research, this interdisciplinary resource presents the latest strategies for analyzing cross-cultural data. Techniques are demonstrated through the use of applications that employ cross-national data sets such as the latest European Social Survey. With an emphasis on the generalized latent variable approach, internationally prominent researchers from a variety of fields explain how the methods work, how to apply them, and how they relate to other methods presented in the book.

Fundamentals of Research on Culture and Psychology

Theory and Methods

Valery Chirkov

This unique text covers the core research methods and the philosophical assumptions that underlie various strategies, designs, and methodologies used when researching cultural issues. It teaches readers why and for what purpose one conducts research on cultural issues so as to give them a better sense of the thinking that should happen before they go out and collect data. More than a "methods text", it is about all the steps that go into doing cross-cultural research. It discusses how to select the most appropriate methods for data analysis and which approach to use, and details quantitative, qualitative, and mixed methods for experimental lab studies and ethnographic field work.

3RD EDITION

Designing Experiments and Analyzing Data

A Model Comparison Perspective, Third Edition

**Scott E. Maxwell** University of Notre Dame, USA, **Harold D. Delaney** University of New Mexico, USA, **Ken Kelley**

This text offers an integrative conceptual framework for understanding experimental design and data analysis. Examples of published research demonstrate the applicability of each chapter's content; flowcharts assist in choosing the most appropriate procedure; end-of-chapter lists of important formulas highlight key ideas and assist readers in locating the initial presentation of equations; programming code and tips and extensive sets of exercises help develop a deeper understanding of the subject. The book and its website, with web apps, tutorials, and detailed code, are ideal for students and researchers seeking the optimal way to design their studies and analyze the resulting data.

10TH EDITION

Experimental Design in Psychology

A Case Approach

**M. Kimberly MacLin** University of Northern Iowa, USA

In easy-to-read, conversational language, Kim MacLin teaches students experimental design principles and techniques using a tutorial approach in which students read, critique, and analyze over 75 actual experiments from every major area of psychology. She provides them with real-world information about how science in psychology is conducted and how they can participate. This text is essential reading for students and researchers interested in and studying experimental design in psychology.

4TH EDITION

Principles and Methods of Social Research**William D. Crano** Claremont Graduate University, USA, **Marilynn B. Brewer** Ohio State University, USA, **Andrew Lac** Claremont Graduate University, USA

Through a multi-methodology approach, Principles and Methods of Social Research, Fourth Edition covers the latest research techniques and designs and guides readers toward the design and conduct of social research from the ground up. Applauded for its comprehensive coverage, the breadth and depth of content of this new edition is unparalleled. It is intended for graduate or advanced undergraduate courses in research methods in psychology, communication, sociology, education, public health, and marketing, and further appeals to researchers in various fields of social research, such as social psychology and communication.

4TH EDITION

Research Design and Statistical Analysis**Caren M. Rotello**, **Jerome L. Myers**, **Arnold D. Well**, **Robert F. Lorch, Jr.** University of Kentucky, Lexington, USA

This fully updated fourth edition of Research Design and Statistical Analysis provides comprehensive coverage of the design principles and statistical concepts necessary to make sense of real data. Incorporating the analyses of both experimental and observational data, and with coverage that is broad and deep enough to serve a two-semester sequence, this textbook is suitable for researchers, graduate students and advanced undergraduates in psychology, education, and other behavioral, social, and health sciences. The book is supported by a robust set of digital resources, including data files and exercises from the book in an Excel format, R scripts, and a solutions manual.

5TH EDITION

Statistical Power Analysis

A Simple and General Model for Traditional and Modern Hypothesis Tests, Fifth Edition

**Brett Myers** Griffith University, Australia, **Kevin R. Murphy** University of Limerick, Ireland

Statistical Power Analysis explains the key concepts in statistical power analysis and illustrates their application in both tests of traditional null hypotheses. It provides readers with the tools to understand and perform power analyses for virtually all the statistical methods used in the social and behavioral sciences. This edition includes new material and new power software. The programs used for power analysis in this book have been re-written in R, a language that is widely used and freely available. Statistical Power Analysis helps readers design studies, diagnose existing studies, and understand why hypothesis tests come out the way they do.

3RD EDITION

An Introduction to Psychological Tests and Scales

Kate Miriam Loewenthal, Christopher Alan Lewis
Glyndwr University, UK

Fully revised and updated, the third edition provides a clear, concise and jargon-free primer for all those embarking in fieldwork or research analysis or who wish to investigate new areas requiring psychometric assessment, providing user-friendly instructions on applying the most appropriate statistics, and suggesting the most relevant websites and books. It continues to be an invaluable tool for undergraduates and postgraduates in psychology and the social sciences. It will also be equally useful to professionals in business, management and related disciplines who wish to develop tests and other instruments for selection and survey.

2ND EDITION

An Introduction to Psychometrics and Psychological Assessment

Using, Interpreting and Developing Tests

Colin Cooper

The successor to Cooper's prize-winning book shows how psychological questionnaires and tests can be chosen, administered, scored, interpreted and developed. An evaluative guide to choosing, using, interpreting and developing tests, it provides readers a thorough grasp of the principles (and limitations) of testing, together with the necessary methodological detail. The book is written for students studying psychological assessment or psychometrics, and for researchers and practitioners who use questionnaires to measure personality, cognitive abilities, educational attainment, or mood.

Educational and Psychological Measurement

W. Holmes Finch Ball State University, USA, **Brian F. French** Washington State University, USA

This text provides the most current coverage of measurement and psychometrics in a single volume. W. Holmes Finch and Brian F. French first review the basics of psychometrics and measurement, before moving on to more complex topics such as equating and scaling, item response theory, standard setting, and computer adaptive testing. Also included are discussions of cutting-edge topics utilized by practitioners in the field, such as automated test development, game based assessment, and automated test scoring. This book is ideal for use as a primary text for graduate-level psychometrics/measurement courses, and for researchers in need of a broad resource for understanding test theory.

Improving Survey Methods

Lessons from Recent Research

Edited by **Uwe Engel** University of Bremen, Germany, **Ben Jann** University of Bern, CH, **Peter Lynn** University of Essex, UK, **Annette Scherpenzeel** Utrecht University, NL, **Patrick Sturgis** University of Southampton, UK

Series: European Association of Methodology Series

This book reviews the latest statistical and methodological research on survey research techniques to help improve the reliability of survey generated data. The various methods studied are reviewed along with the resulting empirical evidence and insights gained from the results. The evidence is based on field- or quasi-experimental research, observational or simulation studies or a combination thereof. The book examines: survey modes and response effects, interviewers and survey error, asking sensitive questions, conducting web surveys and access panels, coping with non-response, and handling missing data. This book is ideal for students or professionals who employ survey research methods.

International Handbook of Survey Methodology

Edited by **Edith D. de Leeuw** Utrecht University, The Netherlands, **Joop Hox** Utrecht University, the Netherlands, **Don Dillman** Washington State University, Pullman, USA

Series: European Association of Methodology Series

This Handbook reviews the methodological and statistical issues in designing and analyzing surveys with contributions from leading methodologists. Featuring examples from a variety of countries, the book examines: the foundations of survey design, including sources of error and ethical issues; designing surveys with tips on writing questions for multiple methods; and challenges involved in mixing these modes within one survey. Intended for advanced students and researchers in the behavioral, social, and health sciences, the book also serves as a text for graduate level courses on survey methodology. Selected Contents: The Cornerstones of Survey Research. The Psychology of Asking Questions. Ethical Issues in Surveys. Design.

2ND EDITION

Introduction to Theory-Driven Program Evaluation

Culturally Responsive and Strengths-Focused Applications

**Stewart I. Donaldson**

Introduction to Theory-Driven Programming provides a clear guide for practicing evaluation science, and numerous examples of how these evaluations actually unfold in contemporary practice. A special emphasis is placed on how to conduct theory-program evaluations that are culturally responsive and strengths-focused. The volume is of significant value to practicing evaluators, professors of introductory evaluation courses and their students, advanced undergraduate and graduate students, and serves as a text or a supplementary text for a wide range of evaluation and applied research courses.

3RD EDITION

Measurement Theory in Action

Case Studies and Exercises

Kenneth S. Shultz, David Whitney, Michael J. Zickar
Sandman Professor, Department of Psychology, Bowling Green State University, USA.

This book helps readers apply testing and measurement theories and features 22 self-contained modules which instructors can match to their courses. Each module features an overview of a measurement issue and a step-by-step application of that theory. Best Practices provide recommendations for ensuring the appropriate application of the theory. Practical Questions help students assess their understanding of the topic. Students can apply the material using real data in the Exercises, some of which require no computer access, while others involve the use of statistical software to solve the problem.

4TH EDITION

Modern Psychometrics

The Science of Psychological Assessment

John Rust, Michal Kosinski, David Stillwell
The Psychometrics Centre, University of Cambridge, UK

This popular text introduces the reader to all aspects of psychometric assessment, including its history, how to construct and administer traditional tests and the latest techniques for psychometric assessment online. Modern Psychometrics combines an up to date scientific approach with full consideration of the political and ethical issues involved in the implementation of psychometrics testing in today's society. It will be invaluable to both undergraduate and postgraduate students as well as practitioners who are seeking an introduction to modern psychometric methods.

Network Psychometrics with R

A Guide for Behavioral and Social Scientists

Edited by **Adela-Maria Isvoranu, Sacha Epskamp, Lourens Waldorp, Denny Borsboom** University of Amsterdam

A systematic, innovative introduction to the field of network analysis, *Network Psychometrics with R: A Guide for Behavioral and Social Scientists* provides a comprehensive overview of and guide to both the theoretical foundations of network psychometrics as well as modelling techniques developed from this perspective. Written by pioneers in the field, this textbook showcases cutting-edge methods in an easily accessible format, accompanied by problem sets and code. It is ideal for instructors and students of undergraduate and graduate level courses and workshops in the field of network psychometrics as well as established researchers looking to master new methods.

10TH EDITION

Program Evaluation

Methods and Case Studies

Kenneth J. Linfield Spalding University, USA, **Steven D. Kniffley, Jr.** Spalding University, Kentucky, USA

Now in its tenth edition, this key textbook provides a solid foundation in program evaluation, covering the main components of evaluating agencies and their programs, how best to address these components, and the procedures to follow when conducting evaluations. Different models and approaches are paired with practical techniques, such as how to plan an interview to collect qualitative data and how to use statistical analysis to report results. The newly enhanced MISSION! Framework, returned to throughout the book, helps solidify the seven general areas that program evaluators must consider at all times.

A Step-by-Step Guide to Qualitative Data Coding

Philip Adu The National Centre for Academic and Dissertation Excellence, The Chicago School of Professional Psychology, USA

This book provides an easy-to-follow, step-by-step guide to those new to qualitative data coding, through the use of specific, worked examples. It covers creating codes, developing categories and themes, and determining the connections amongst them. It shows how to conduct manual coding using Microsoft Word, Excel and CAQDAS using NVivo. At the end of the coding process, it details how to present findings in such a way that readers understand the characteristics of participants, how the data was coded, and how the themes and their respective meaning and supporting evidence are presented.

How Qualitative Data Analysis Happens

Moving Beyond "Themes Emerged" Volume 1

Edited by **Aine M Humble, M. Elise Radina**

This volume offers an in-depth look into how qualitative social science researchers approach their data analysis. It moves beyond the usual vague statement of "themes emerged from the data" to show readers how researchers actively and consciously arrive at their themes, revealing the complexity of making sense of thousands of pages of interview data, multiple data sources, and diverse types of data (observations, interviews, photos, diary entries). The book focuses on a diversity of topics in family research and on different methodologies, but its findings provide an invaluable resource for experienced and novice qualitative researchers throughout the social sciences.

Qualitative Analysis Using ATLAS.ti

The Five-Level QDA™ Method

Nicholas H. Woolf, Christina Silver University of Surrey, UK

Series: Developing Qualitative Inquiry

The method of Five-Level QDA® helps researchers to analyse what makes for an expert analytic performance when using qualitative data analysis software. By instituting powerful use of their chosen software, researchers learn to consciously distinguish, and translate between their analytic strategies (what you plan to do) and their software tactics (how you plan to do it). Written by experienced trainers, this practical guide to Atlas.ti, with accompanying video tutorials and online learning materials, will allow qualitative researchers at all levels to become more efficient users, and increase the effectiveness of their data analysis.

Hermeneutic Approaches to Interpretive Research

Dissertations In a Different Key

Edited by Philip Cushman

Series: Advances in Theoretical and Philosophical Psychology

This unique and insightful book brings together a collection of impactful essays written by former psychology doctoral students that feature hermeneutics as a method of qualitative inquiry. This is an illuminating reading for graduate students and scholars curious about the hermeneutic approach to research, particularly those engaged in fields like theoretical psychology, clinical psychology, psychotherapy, mental health, cultural history, and social work.

5TH EDITION

A Beginner's Guide to Structural Equation Modeling

Tiffany A. Whittaker, Randall E. Schumacker

A Beginner's Guide to Structural Equation Modeling, fifth edition, has been redesigned with consideration of a true beginner in structural equation modeling (SEM) in mind. The book covers introductory through intermediate topics in SEM in more detail than in any previous edition. This book is intended for true beginners in structural equation modeling and is designed for introductory graduate courses in structural equation modeling taught in psychology, education, business, and the social and healthcare sciences. This book also appeals to researchers and faculty in various disciplines. Prerequisites include correlation and regression methods.

4TH EDITION

An Introduction to Statistical Concepts

Debbie L. Hahs-Vaughn University of Central Florida, USA, **Richard Lomax** The Ohio State University, USA

This comprehensive, flexible text is used in both one- and two-semester courses to review introductory through intermediate statistics. Instructors select the topics that are most appropriate for their course. Its conceptual approach helps students more easily understand the concepts and interpret SPSS and research results. Noted for its crystal clear explanations, key concepts are simply stated and occasionally reintroduced and related to one another for reinforcement. Numerous examples demonstrate their relevance. This edition features even more explanation to increase understanding of the concepts and has annotated script for using R.

IBM SPSS for Introductory Statistics

Use and Interpretation, Sixth Edition

George A. Morgan Colorado State University, USA, **Karen C. Barrett** Colorado State University, USA, **Nancy L. Leech** University of Colorado at Denver, USA, **Gene W. Gloeckner** Colorado State University, USA

Designed to help students analyze and interpret research data using IBM SPSS, this user-friendly book, written in easy-to-understand language, shows readers how to choose the appropriate statistic based on the design, and to interpret outputs appropriately. The sixth edition includes updated screenshots and instructions for IBM SPSS 24 and Windows 10, and adds helpful callouts to make the book even clearer and easy to use.

9TH EDITION

Interpreting Basic Statistics

A Workbook Based on Excerpts from Journal Articles

Zealure C. Holcomb, Keith S. Cox University of North Carolina, USA, **Zealure C. Holcomb**

Interpreting Basic Statistics gives students valuable practice in interpreting statistical reporting as it actually appears in peer-reviewed journals. The questions in each exercise are divided into two parts: (1) Factual Questions and (2) Questions for Discussion. The factual questions require careful reading for details, while the discussion questions show that interpreting statistics is more than a mathematical exercise. Each exercise covers a limited number of topics, making it easy to coordinate the exercises with lectures or a traditional statistics textbook.

Interpreting Statistics for Beginners

A Guide for Behavioural and Social Scientists

Vladimir Hedrih , Andjelka Hedrih

Interpreting Statistics for Beginners teaches readers to correctly read and interpret results of basic statistical procedures as they are presented in scientific literature, and to understand what they can and cannot infer from such results. Written in an easy-to-read style and focusing on explaining concepts behind statistical calculations, the book is most helpful for readers with no previous training in statistics, and also those wishing to bridge the conceptual gap between doing the statistical calculations and interpreting the results.

Presenting Your Data with SPSS Explained

Perry R. Hinton Warwick University, UK, **Isabella McMurray** University of Bedfordshire, UK

This introductory guide provides a clear detailed explanation of how to present data in tables and graphs using the popular software application SPSS. Using practical examples the book is simple to use for students and professionals who have collected data for a dissertation, project, or any other type of research-related exercise. No assumptions are made about the statistical or IT knowledge of the reader. The book is specifically written for students and researchers in a range of disciplines who have had little or no training in statistics but who still need to present their data clearly. Hints and tricks, FAQs, hundreds of colour screenshots, and online datasets complete the package.

Psychological Statistics

The Basics

Thomas J. Faulkenberry

Series: The Basics

Psychological Statistics: The Basics is an accessible guidebook which will walk the reader through the core logic of statistical inference and provide a solid grounding in the techniques necessary to analyse data in the psychological and behavioural sciences. This is an ideal introduction for first-year undergraduates in the psychological and behavioral sciences (including neuroscience), as well as A-level and high school students approaching psychological statistics for the first time.

4TH EDITION

Quantitative Psychological Research

The Complete Student's Companion

David Clark-Carter University of Staffordshire

This book expertly guides the reader through all stages involved in undertaking quantitative psychological research, from accessing the relevant literature, through designing and conducting a study, analysing and interpreting data, and finally reporting the research. As the chapters focus on choosing appropriate statistical tests and how to interpret and report them (rather than the detailed calculations, which appear in appendices), the reader is able to gain an understanding of a test without being interrupted by the need to understand the complex mathematics behind it.

3RD EDITION

SPSS Explained

Perry R. Hinton Warwick University, UK, **Isabella McMurray** University of Bedfordshire, UK, **Charlotte Brownlow , Peter C. Terry**

SPSS Explained provides the student with all that they need to undertake statistical analysis using SPSS. It combines a step-by-step approach to each procedure with easy-to-follow screenshots at each stage of the process. The authors have many years of experience in teaching SPSS to students from a wide range of disciplines. Their understanding of SPSS users' concerns, as well as a knowledge of the type of questions students ask, form the foundation of this book.

Statistical Concepts - A First Course

Debbie L. Hahs-Vaughn

Statistical Concepts: A First Course presents the introductory chapters from An Introduction to Statistical Concepts, 4th Edition, designed for first and lower level statistics courses. The chapters review descriptive statistics including ways of representing data graphically, statistical measures, the normal distribution, and probability and sampling. This textbook contains a wide spectrum of useful features, such as conceptual, computational, and interpretative problems that ask students to critique actual studies, critical thinking problems, and templates for writing research questions.

2ND EDITION

Statistics for the Behavioural Sciences

An Introduction to Frequentist and Bayesian Approaches

Riccardo Russo

This accessible textbook is for those without a mathematical background (just some notions of basic algebra are sufficient) and provides a comprehensive introduction to all topics covered in introductory behavioural science statistics courses. This timely and highly readable text will be invaluable to undergraduate students of psychology and research methods courses in related disciplines, as well as anyone with an interest in understanding and applying the basic concepts and inferential techniques associated with statistics in the behavioural sciences.

5TH EDITION

Statistics in Plain English

Timothy C. Urdan Santa Clara University, USA

Statistics in Plain English is a straightforward, conversational introduction to statistics that delivers exactly what its title promises. Each chapter begins with a brief overview of a statistic that describes what the statistic does and when to use it, followed by a detailed step-by-step explanation of how the statistic works and exactly what information it provides. Chapters also include an example of the statistic (or statistics) in use in real-world research, "Worked Examples," "Writing It Up" sections that demonstrate how to write about each statistic, "Wrapping Up and Looking Forward" sections, and practice work problems.

6TH EDITION

Success at Statistics

A Worktext with Humor

Fred Pyrczak

Divided into 67 short sections, this text allows instructors to assign only those sections needed to meet the goals of the course. Humorous riddles allow students to check their work without providing the answers; if the answer to a riddle makes sense, then students know they have answered all questions in an exercise correctly. All major statistics typically introduced in a first-semester course are covered. Contains material on effect size, which provides technical solutions to issues raised earlier in the book (such as the limitations of inferential statistics).

3RD EDITION

The Essence of Multivariate Thinking

Basic Themes and Methods

Lisa L. Harlow

Series: Multivariate Applications Series

Focusing on the underlying themes that run through most multivariate methods, in this fully updated 3rd edition of The Essence of Multivariate Thinking Dr. Harlow shares the similarities and differences among multiple multivariate methods to help ease the understanding of the basic concepts. This book will be key reading and provide greater conceptual understanding and clear input on how to apply basic and SEM multivariate statistics taught in psychology, education, human development, business, nursing, and other social and life sciences.

Handbook of Ethics in Quantitative Methodology

Edited by **A. T. Panter** both at University of North Carolina, Chapel Hill, USA

Series: Multivariate Applications Series

This Handbook is the first to provide a practical, interdisciplinary review of ethical issues as they relate to quantitative methodology including how to present evidence for reliability and validity, what comprises an adequate tested population, and what constitutes scientific knowledge for eliminating biases. The book emphasizes the human cost of quantitative decision making to help researchers understand the implications of their choices. The chapter order parallels the chronology of the research process: determining the research design; data analysis; and communicating findings. Each chapter: explores the ethics of the topic; identifies methodological issues; reviews strategies for handling such issues and their ethical implications; provides a case example; and outlines plausible approaches to the issue including best-practice solutions. This Handbook appeals to researchers and practitioners in psychology, health, education, sociology, political science, and business.

Methodological Issues in Psychology

Concept, Method, and Measurement

David Trafimow

Methodological Issues in Psychology is a comprehensive text that challenges current practice in the discipline and provides solutions that are more useful in contemporary research, both basic and applied. This book is an invaluable asset for students and researchers of psychology. It will also be of vital interest to social science researchers and students in areas such as management, marketing, sociology, and experimental philosophy.

4TH EDITION

Strategies and Tactics of Behavioral Research and Practice

James M. Johnston Auburn University, USA, **Henry S. Pennypacker** University of Florida, USA, **Gina Green** Association of Professional Behavior Analysts, USA

Extensively revised to be more accessible and practical, this text features much more discussion of how research methods are relevant to today's practitioners, including many more examples that are based on field research and service delivery scenarios. Its comprehensive treatment of single-subject or within-subject design focuses on the strategic (the overall goal) and tactical (the methods and procedures) options available to investigators as they determine the most effective way to address research questions. Noted for its strong coverage of measurement, readers are encouraged to consider the rationale for different ways of measuring behavior and designing experimental comparisons.

4TH EDITION

Principles of Research in Behavioral Science

Fourth Edition

Mary E. Kite, **Bernard E. Whitley, Jr** Ball State University, USA

This book provides a comprehensive overview of research methods in the behavioral sciences, focusing primarily on the conceptual issues inherent in conducting research. It covers topics that are often omitted from other texts, including measurement issues, correlational research, qualitative research, and integrative literature reviews. The book also includes discussions of diversity issues as they related to behavioral science research. New to this edition are chapter boxes that focus on applied issues related to each chapter topic. Throughout the book, readable examples and informative tables and figures are provided.

8TH EDITION

Research Methods and Statistics in Psychology

Hugh Coolican Coventry University, UK

This text provides students with the most readable and comprehensive survey of research methods, statistical concepts and procedures in psychology today. Assuming no prior knowledge, this bestselling text takes you through every stage of your research project giving advice on planning and conducting studies, analysing data and writing up reports, both quantitative and qualitative. It features detailed and illustrated SPSS instructions for all these and other procedures, eliminating the need for an extra SPSS textbook. Additionally, each chapter contains a glossary, key terms and newly integrated exercises, ensuring that key concepts are understood.

2ND EDITION

A Handbook of Visual Methods in Psychology

Using and Interpreting Images in Qualitative Research

Edited by **Paula Reavey** London South Bank University, UK

This book provides an illustration of the potential for visual methods in psychology. Each chapter explores theoretical, methodological, ethical and analytical issues that shape the ways in which visual qualitative research is conducted. The contributors come from a variety of traditions including: narrative psychology personal construct theory discursive psychology and conversation analysis phenomenology psychoanalysis. The wide range of topics covered makes this volume a vital contribution to psychology, sociology and gender studies.

Human Rights Education for Psychologists

Edited by **Polli Hagenaars**, **Marlena Plavšić**, **Nora Sveaass**, **Ulrich Wagner**, **Tony Wainwright**

This book is designed to raise awareness of human rights implications in psychology, and provide knowledge and tools enabling psychologists to put a human rights perspective into practice. Including hands-on recommendations, case studies, and discussion points, the book identifies how psychologists can ensure they are practicing in a responsible way, as well as contributing to wider society with a clear knowledge of human rights issues in relation to culture, gender, organisations, and more. This is essential reading for professional psychologists as part of continuing professional development and those in training and taking psychology courses.

Psychology and Behavioral Economics

Applications for Public Policy

Edited by **Kai Ruggeri**

This book offers an expert introduction to how psychology can be applied to a range of public policy areas. It examines the impact of psychological research for public policy making in economic, financial and consumer sectors, in education, healthcare and at workplace, for energy and the environment, and in communications. This is the perfect textbook for students of psychology, economics, public health, education, and organizational sciences, as well as public policy professionals looking for fresh insight into the underlying theory and practical applications in a range of public policy areas.

Social Psychology and Justice

Edited by **E. Allan Lind** Duke University, USA

Series: *Frontiers of Social Psychology*

This volume reviews and extends theory and research on the psychology of justice in social contexts. It examines how people judge whether the treatment they experience with individuals or groups is fair, and shows how this has major consequences for attitudes and behaviors, including the decision to trust or invest emotionally in social relationships and groups. Incorporating many major theories in social psychology, including groundbreaking work from neuroscience, it brings together two traditionally distinct branches of the discipline: social cognition and interpersonal relations. Finally, it illustrates how justice concepts may be applied in law, government, business, and medicine.

2ND EDITION

The New Psychology of Leadership

Identity, Influence and Power

S. Alexander Haslam University of Exeter, UK, **Stephen Reicher**, **Michael J. Platow** The Australian National University, Australia

The result of over two decades of research inspired by social identity and self-categorization theories, this book is the perfect introduction to new theoretical and scientific insights into leadership being produced by social psychology. The authors explore the nature of group identity, the basis of authority and legitimacy, the dynamics of justice and fairness, the determinants of followership and charisma, and the practice and politics of leadership. Written in an accessible and engaging style, the book is suitable for students on courses including social psychology, organizational psychology, business and management, sociology, economics, and leadership studies.

The Psychology of Conspiracy Theories

Jan-Willem Prooijsen

Series: *The Psychology of Everything*

The Psychology of Conspiracy Theories presents an engaging introduction to the origins of widespread belief in conspiracy theories. Through a discussion of the history of conspiracy theories, the book will debunk the myth that they are a modern phenomenon, exploring the broad contexts they can appear in from politics to the workplace. It will then go on to consider why some people are more susceptible to these beliefs than others, and why such beliefs are not a pathological trait. The book draws on a wealth of examples surrounding events and issues such as the 9/11 terrorist attacks and climate change.

The Psychology of Terrorism

Neil Shortland

Series: The Psychology of Everything

What is terrorism? Can anyone be radicalized? How can we respond to terrorist acts? The Psychology of Terrorism seeks to explain why some acts of violence are considered terrorism, and others are not, and why some individuals may be more susceptible to engaging in terrorist behavior. Debunking myths and lazy stereotypes, the book delves into some of the most shocking atrocities of our times to discuss the complex psychological characteristics of individual terrorists, organised groups, and their acts. Whilst there is no simple solution, The Psychology of Terrorism shows us that a growing reverse radicalization movement and modern interventionist techniques can give us hope for the future.

The Psychology of Trust

Ken Rotenberg University of Keele, UK

Series: The Psychology of Everything

Western societies today are facing a crisis of trust. Politicians, journalists, police officers, church officials, CEOs: all are distrusted. Based on a series of popular Psychology Today blogs, this engaging summary reviews the psychological research on trust so that student, practitioner, and members of the public at large understand how people trust others. The purpose of the book is to identify the factors that cause people to trust, the contexts for trust, and the consequences of trust. It is designed to provide a concise and coherent body of knowledge regarding the role that trust plays in humans.

2ND EDITION

Attitudes and Attitude Change

Tobias Vogel School for Social Science, Department of Consumer and Economic Psychology, University of Mannheim, Germany, **Michaela Wanke**

This new edition of *Attitudes and Attitude Change* provides a comprehensive and accessible introduction to basic issues in the psychological study of attitudes. Drawing on the latest research it provides coverage of all the key issues in this area, including attitude formation and change, the functions of attitudes, attitude measurement, attitudes as temporary constructs, persuasion processes, and prediction of behaviour from attitudes. The new edition has been thoroughly revised and updated to take account of the most recent research in the field. It will be essential reading for students and researchers in social psychology.

The Science of Attitudes

Joel Cooper Princeton University, USA, **Shane Blackman** Princeton University, USA, **Kyle Keller** Princeton University, USA

This textbook is aimed primarily at advanced undergraduates and graduate students interested in how attitudes are formed and changed. It uniquely integrates classic and contemporary research to give a comprehensive and rounded view of the field from its inception to present-day theory, methodology, and controversies. It is also the first textbook on attitudes to devote entire chapters to work on implicit measurements, resistance to persuasion, and social neuroscience. The book provides a comprehensive and engaging text for upper-level students of social psychology and related fields with an interest in attitudes and attitude change, including marketing, advertising, and political science.

7TH EDITION

Community Psychology

John Moritsugu Pacific Lutheran University, USA,
Elizabeth Vera Loyola University Chicago, USA, **Frank Y. Wong** Emory University Rollins School of Public Health, USA

The applied chapters discuss how community psychology relates to mental health, social and health services, schools and children, law and crime, health and public health and community/organizational psychology. The new edition updates research and literature and presents developments in theoretical and research methodologies. This edition focuses particularly on description and consideration of critical theory, liberation theology, and decolonization as part of community psychology's intellectual and value-based evolution. A student website and instructor resources provide further ways to engage with the content and support teaching and learning.

2ND EDITION

Critical Community Psychology

Critical Action and Social Change

Carolyn Kagan, Mark Burton, Paul Duckett, Rebecca Lawthom, Asiya Siddiquee

This accessible textbook provides an overview of theoretical and practical issues around psychological work in a range of community settings. Covering key issues including migration, social justice, and the environment, the three sections of the book allow students to think, act, and reflect on their work. The book utilises examples and reflections on practice drawn from years of experience of the authors which helps students to see the application of theory and encourages them to engage in their own critical thinking. This is the ideal resource for students of different community based professions, working in a range of applied settings, at both undergraduate and postgraduate levels.

An Introduction to Culture and Psychology

A Sociocultural Perspective

Valery Chirkov

The book offers an innovative introduction to culture and psychology, taking a sociocultural approach to understand the intricacies of culture-mind-behaviour interactions. Each chapter features chapter's synopsis, boxed examples, a glossary of key terms, reflective questions, and recommended reading to help students engage further with the material. An Introduction to Culture and Psychology is essential reading for undergraduate students taking culture and psychology courses. It can also be of interest to scholars of psychology, anthropology, sociology, communication, and other related disciplines.

Cross-Cultural Analysis

Methods and Applications, Second Edition

Edited by **Eldad Davidov** University of Cologne, Germany, and University of Zurich, Switzerland, **Peter Schmidt** University of Marburg, Germany, **Jaak Billiet** University of Leuven, Belgium, **Bart Meuleman**

Series: European Association of Methodology Series

Intended to bridge the gap between the latest methodological developments and cross-cultural research, this interdisciplinary resource presents the latest strategies for analyzing cross-cultural data. Techniques are demonstrated through the use of applications that employ cross-national data sets such as the latest European Social Survey. With an emphasis on the generalized latent variable approach, internationally prominent researchers from a variety of fields explain how the methods work, how to apply them, and how they relate to other methods presented in the book.

2ND EDITION

Cultural Issues in Psychology

An Introduction to a Global Discipline

Andrew Stevenson Manchester Metropolitan University and Aquinas College, Stockport

This book offers an engaging introduction to cultural and cross-cultural psychology, and offers an interdisciplinary approach to the key research theories and controversies that impact on human behaviour in a global context. The new edition will be updated to include a new chapter on migration, and additional coverage of indigenous psychologies, ethnographic research methods, and cosmopolitanism, reflecting the latest developments in this global discipline. Also including chapters on culture and lifespan, and culture and psychopathology, this is the essential entry-level text on cultural and cross-cultural psychology for students taking psychology and related courses.

Fundamentals of Research on Culture and Psychology

Theory and Methods

Valery Chirkov

This unique text covers the core research methods and the philosophical assumptions that underlie various strategies, designs, and methodologies used when researching cultural issues. It teaches readers why and for what purpose one conducts research on cultural issues so as to give them a better sense of the thinking that should happen before they go out and collect data. More than a "methods text", it is about all the steps that go into doing cross-cultural research. It discusses how to select the most appropriate methods for data analysis and which approach to use, and details quantitative, qualitative, and mixed methods for experimental lab studies and ethnographic field work.

Theories of Culture

Arnold Groh Technical University of Berlin, Germany

What is culture? Why do cultures change over time? Are there any discernible rules or principles behind culture-related phenomena and processes? Familiarity with the most significant cultural theories of the 20th and 21st centuries is vital for anyone studying or researching in the field. This guide describes these theories and their originators, as well as the links between them and their mutual influences. It explains different ideas in clear and objective fashion and includes approaches that have been unduly neglected, but which have high explanatory value. It offers readers an up-to-date idea of what culture is, and how our understanding of it has developed over the past century.

Environmental and Architectural Psychology

The Basics

Ian Donald

Series: The Basics

This new 'Basics' of environmental and architectural psychology provides an overview of the discipline in a jargon free and accessible manner. The book addresses issues around sustainability, climate change, and behaviour, grounded in theory drawn from psychology, geography, and architecture. The author examines how people shape and affect the environment, but also in turn how the environment shapes and affects people's thoughts, feelings, and behaviours. Readers will be encouraged to reflect on the role design and policies have in shaping the environment, making this the ideal book for anyone interested in environmental and architectural psychology.

5TH EDITION

Psychology for Sustainability

Britain A. Scott University of St Thomas, Minnesota, USA, **Elise L. Amel** University of St Thomas, Minnesota, USA, **Christie M. Manning** Macalester College, Minnesota, USA

Psychology for Sustainability applies psychological science to so-called "environmental" problems that manifest when human behavior disrupts and degrades natural systems. This edition represents a substantial revision and expansion spurred by a burgeoning body of research and by global ecological, political, and social developments. Particular attention is paid to environmental justice and collective action for systems change. Timely topics include climate change, biodiversity loss, environmental racism, Indigenous perspectives, social media, and Covid-19 and other pandemics.

The Psychology of Climate Change

Geoffrey Beattie , Laura McGuire

Series: The Psychology of Everything

This book offers a psychological perspective on the current thinking on climate change, an issue of major global importance. The authors seek to demonstrate that there's a significant psychological issue connected with climate change in relation to the development of the climate change debate, optimism bias, the failure of climate change initiatives, and our attitudes towards the environment. There is also discussion of how behaviour in relation to climate change can be changed, to go some way to resolve the mistakes that have been made in the past in relation to our environment. This is fascinating reading for students, general readers and policy makers interested in climate change.

Perspectives on Social Psychology

A Psychology of Human Being

Wendy Stainton Rogers

This innovative textbook explores core social psychology topics from a new psychological perspective that is concerned with the social and cultural worlds we inhabit. Taking a critical approach, the book explores how qualitative methods and data analysis can be used to examine our behaviour and what it is to be human. The author analyses human communication, agency, and values, in order to go beyond the individualist scientific approach taken by traditional psychology. This innovative textbook offers a fascinating alternative to existing resources, and includes original pedagogical features. It is essential reading for students studying social psychology and in related disciplines.

4TH EDITION

Social Psychology

Fourth Edition

Eliot R. Smith University of Indiana, USA, **Diane M. Mackie** University of California Santa Barbara, USA, **Heather M. Claypool** Miami University, Oxford, OH, USA

This textbook is the only major introduction to social psychology that provides a conceptually and thematically integrated approach to the science of social behavior, showing how the major topics and themes in the discipline are deeply interconnected. As such, it provides a uniquely rich, meaningful, and logical appreciation of human social behavior that students can relate to the world around them and apply to their own lives. Throughout, there are explanations of how social processes are intertwined with cognitive processes. In addition to being thoroughly updated, this fourth edition includes much richer pedagogy than its predecessors, both within the book and online.

Social Psychology

The Basics

Daniel Frings

Series: The Basics

This new 'Basics' of social psychology provides an overview of the discipline in a jargon free and accessible manner. It offers a brief history of the topic area, and covers core concepts including the self, social cognition, groups, social influence, and relationships. The author examines the fundamental principles of social psychology in a rigorous way, and includes case studies and biographies of important figures. Future directions are also outlined in the concluding chapter, highlighting key trends such as social neuroscience. This is the essential introduction for students at undergraduate and A-Level who are approaching social psychology for the first time.

2ND EDITION

Social Groups in Action and Interaction

2nd Edition

Charles Stangor University of Maryland College Park,
USA

This textbook reviews and analyzes the human group as it operates to create both social good and, potentially, social harm. It uniquely blends social psychological research on intra-group behavior with research on inter-group behavior to give a more rounded perspective on the dynamics of social groups. In addition, topics that are not unique to either of these two approaches, and yet which are important aspects of group relations, such as culture, are also covered in depth. As such, this thoroughly revised 2nd Edition provides the most wide-ranging and contemporary resource for courses on group dynamics and behavior.

Internet Psychology

The Basics

Yair Amichai-Hamburger

Series: The Basics

We can't imagine our lives without the Internet. It is the tool of our existence; without it we couldn't work, plan our social and leisure activities and interact with friends. The internet's influence on contemporary society extends across every aspect of our personal and professional lives, but how has this altered us in psychological terms? How are we to understand how the internet can promote enormous amounts of caring and kindness to strangers and yet be the source of unremitting acts of terror? Internet Psychology: The Basics is a vital and fascinating guide to the online world, drawing on classic theories of human behaviour to shed fresh light on this central facet of modern life.

The Psychology of Social Media

Ciarán Mc Mahon

Series: The Psychology of Everything

The Psychology of Social Media will examine the core features of social media services – profiles, newsfeeds, connections, media and so on – and explain the psychological aspects of how they are used. The book will draw on groundbreaking modern research programmes in addition to long-standing scholarship, in order to blend these very new technologies with the ancient progress of humanity. This is the ideal introductory resource for students on cyberpsychology courses, as well as general readers interested in this topic.

4TH EDITION

Individual Differences and Personality

Colin Cooper , Colin Cooper

This book includes comprehensive coverage of both personality theories and the methodological issues associated with personality and psychometric testing, as well as individual differences and intelligence. The book examines topics such as personality traits and types, measurement of abilities, and applications of personality theory. The new edition includes a new chapter on trait theories and a second chapter on applications. There is increased coverage of the dark triad, creativity, and counselling psychology. With self-assessment questions, further reading and a companion website, this is the ideal resource for anyone taking modules on personality and individual differences.

The Psychology of Democracy

Darren G. Lilleker , Billur Aslan Ozgul

Series: The Psychology of Everything

This book explains the psychological underpinnings behind why people engage with and participate in politics. Covering the influence that political campaigns and media play, it analyses real-world political events including the Trump administration, Brexit, the Arab Spring, and Gezi Park, taking the reader on a journey from engagement with a political news item all the way through to taking to the streets to protest government policy and action. In an age of post-truth and populism, this book shows us how a strong democracy depends upon the feelings and emotions of its citizens, from trust, belonging, empowerment and representation, as much as on electoral processes.

The Psychology of Politics

Barry Richards

Series: The Psychology of Everything

This accessible book examines key psychological ideas in relation to contemporary politics. It shows how the emotions which underpin everyday life are also vital in what happens on the political stage and draws on psychoanalytic ideas to explore how our societies and cultures are changing. Topics such as leaders, conflicts, democracies, and ideologies are analysed in relation to psychological theories, and the author demonstrates how fear and passion shapes the political sphere. This is the ideal introductory resource for students on a range of courses who are exploring politics in relation to psychology, as well as general readers interested in this topic.

2ND EDITION

Psychology of Emotion

Paula M. Niedenthal University of Wisconsin, USA,
François Ric Université de Bordeaux, France

This textbook reviews fundamental issues in the definition and measurement of emotion, including: conscious and unconscious processes; how emotions arise in, and are constrained by, social processes; the regulation of emotion; and the manner in which culture shapes some of these processes. Throughout, both biology and social situation are treated as important forces in the elicitation and the experience of emotion. The 2nd Edition includes greater coverage of neuroscientific approaches and a new chapter devoted to the brain. There is also a new chapter on happiness. With a more developed set of pedagogical features, this revised edition may be used as a primary text on courses on Emotion.

Sex and Gender

A Biopsychological Approach

Heidi R. Riggio California State University, Los Angeles, USA

Using both scientific and feminist approaches in its analysis, *Sex and Gender: A Biopsychological Approach* is essential for instructors hoping to offer a thorough and complex investigation of sex and gender studies to their classrooms. The focus on biological, psychological, and social processes—as separate entities and interacting processes—make *Sex and Gender* particularly crucial for a comprehensive and evolved understanding of the subject. The bonus features, which can be used as discussion topics, student essay topics, or special topics, are intended to transfer the information to the classroom and will be especially valuable to students and teachers alike.

The Psychology of Gender

Gary Wood

Series: The Psychology of Everything

The *Psychology of Gender* offers a concise and accessible introduction to the psychology of gender by drawing on biological, historical and cultural perspectives to consider the impact of gender roles on the individual, relationships and society in general. Topics covered include gender roles, sex differences, gender stereotypes, transgender and cisgender identities, and androgyny. The book is a cross-discipline review that offers a complete psychology of gender and addresses the 'dilemmas' we have regarding gender in a post-modern world. This is the ideal introductory resource for students on a range of courses who are starting to explore gender, and general readers interested in this topic.

The Psychology of Sex

Meg John Barker The Open University, UK

Series: The Psychology of Everything

The *Psychology of Sex* plugs the gap between conventional wisdom about sex and what we know about sex and sexuality from academic research in this area. It draws on psychology in its broadest sense, arguing that for a complete understanding of sex we need to study the history of human sexual behaviour, and the social context in which it happens, as well as considering individual human experience and the way the body and brain work. The book looks at some of the most common myths about sex and sexuality - e.g. surrounding sexual identity, sex drive, sex addiction, "normal" and "abnormal" sex - and shows how recent research can help the way we think about all these things.

5TH EDITION

Women's Lives

A Psychological Exploration

Claire A. Etaugh Bradley University, USA, **Judith S. Bridges** University of Connecticut at Hartford, USA, Emerita

Women's Lives integrates the most current research and social issues to explore the psychological diversity of girls and women varying in age, ethnicity, social class, nationality, immigrant experience, sexual orientation, gender identity, ableness and body size and shape. The text embeds a lifespan perspective within each topical chapter and has an intersectional approach that integrates women's diverse identities. It includes rich coverage of women with disabilities and on middle-aged and older women throughout. Taking a deeper transnational focus, it also examines the impact of social, cultural, and economic factors in shaping women's lives around the world.

Psychology of Music

Susan Hallam

Series: The Psychology of Everything

This book covers key concepts relating to the psychology of music including the evolutionary purpose of music, the processing of music, musical ability, and musical skills. It also examines the impact music has on everyday life and on health and well-being, and the benefits of music to intellectual functioning. It covers the way in which music enriches humanity, how it relates to religion and spirituality, and how it used to enhance and manipulate people. This is the ideal introductory resource for students on a range of courses who are exploring music in relation to psychology, as well as general readers interested in this topic

2ND EDITION

Psychology of Music

From Sound to Significance

Siu-Lan Tan Kalamazoo College, USA, **Peter Pfordresher** University at Buffalo, the State University of New York, USA, **Rom Harré**

This thoroughly revised new edition of *The Psychology of Music* combines a comprehensive summary with critical assessments of existing research. The contents range from basic-level perception to broader socio-cultural issues, capturing the interdisciplinary breadth of the field while covering the central topics in depth. For the new edition, the authors have expanded coverage to include non-classical forms of music, added more real-world connections, and included a new chapter on practical applications. The text will be invaluable to students in the area and anyone else interested in the psychology of music.

Foundations of Islāmic Psychology

From Classical Scholars to Contemporary Thinkers

G. Hussein Rassool Charles Sturt University, Australia,
Mugheera M. Luqman

This book examines the history of Islāmic psychology from the Islamic Golden age through the early 21st century, giving a thorough look into Islāmic psychology's origins, Islamic philosophy and theology and key developments in Islāmic psychology. This book aims to engage and inspire students taking undergraduate and graduate courses on Islāmic psychology, to recognise the power of history in the academic studies of Islamic psychology, to connect history to the present and the future, and to think critically. It is also ideal reading for researchers and those undertaking continuing professional development in Islāmic psychology, psychotherapy and counselling.

Islamic Psychology

Human Behaviour and Experience from an Islamic Perspective

G. Hussein Rassool Charles Sturt University, Australia

Islamic Psychology or ilm an-nafs (Science of the Soul) is an important textbook drawing on the latest evidence in the sub-disciplines of psychology to provide a balanced and comprehensive view of human nature, behaviour and experience. Its foundation to develop theories about human nature is based upon the writings of Muslim scholars and contemporary research findings. This book is a core text on Islamic psychology for undergraduate and post-graduate students and those undertaking continuing professional development in Islamic psychology, psychotherapy and counselling. Beyond this, it is also a good supporting resource for teachers and lecturers in this field.

2ND EDITION

Experiments With People

Revelations From Social Psychology, 2nd Edition

Kurt P. Frey University of New Rochelle, Connecticut, USA, **Aiden P. Gregg** University of Southampton, UK

This book showcases 28 intriguing social psychological experiments that have significantly advanced our understanding of human social thinking and behavior. Each chapter focuses on the details and implications of a single study, while citing related research and real-life examples along the way. All the chapters are fully self-contained, allowing them to be read in any order without loss of coherence. This 2nd Edition contains a number of new studies and, together with its lively, conversational tone, it makes an ideal text for courses in social psychology, introductory psychology, or research design.

The Field Study in Social Psychology

How to Conduct Research Outside of a Laboratory Setting?

Tomasz Grzyb , **Dariusz Dolinski**

Series: Research Methods in Social Psychology

This unique book offers a comprehensive introduction to field studies as a research method in social psychology, demonstrating that field studies are an important element of contemporary social psychology and encourages its usage in a methodologically correct and ethical manner. This is an essential reading for graduate and undergraduate students and academics in social psychology taking courses on methodology, and researchers looking to use field study methods in their research.

The Psychology of Belonging

Kelly-Ann Allen Monash University, Australia

Series: The Psychology of Everything

The *Psychology of Belonging* explores why feeling like we belong is so important throughout our lives, from childhood to old age, irrespective of culture, race, or geography. With its virtues and shortcomings, belonging to groups such as families, social groups, schools, workplaces, and communities, is fundamental to our identity and wellbeing, even in a time where technology has changed the way we connect with each other. In a world where loneliness and social isolation is on the rise, *The Psychology of Belonging* shows how meaningful connections can build a sense of belonging for all of us.

Multidisciplinary Perspectives in Social Cognition

Recent Advances and Future Questions

K. Jayasankara Reddy , Bhasker Malu

This book introduces social cognition from multidisciplinary perspectives, exploring in detail how individuals perceive, interpret, and respond to social stimuli throughout different stages of life. Bringing together foundational concepts with advances in the field, the book is ideal reading for students of social psychology, cognitive psychology, social neuroscience and neuropsychology. It will also be of interest to students and researchers of clinical psychology, providing a foundation for future research in applied settings.

4TH EDITION

Social Constructionism

Vivien Burr

The fourth edition of this seminal work introduces students to social constructionism. Using a variety of examples from everyday experience and from existing research in areas such as personality, sexuality and health, it clearly explains the basic theoretical assumptions of social constructionism. It presents and analyses key debates, such as the nature and status of knowledge, truth, reality, and the self, in an accessible style. This book will be an invaluable and informative resource for undergraduate and postgraduate students of Psychology, Sociology, Education, and other related disciplines.

3RD EDITION

The Student's Guide to Social Neuroscience

Jamie Ward University of Sussex, UK

This engaging and cutting-edge text provides an accessible introduction to the complex methods and concepts of social neuroscience, with examples from contemporary research and a blend of different pedagogical features helping students to engage with the material, including essay questions, summary and key points, further reading suggestions, and links to online resources. Richly illustrated in attractive full-color, with figures, boxes, and 'real-world' implications of research, this text is the ideal introduction to the field for both undergraduate and postgraduate students in fields such as psychology and neuroscience.

3RD EDITION

Handbook of Prejudice, Stereotyping, and Discrimination

Edited by **Todd D. Nelson**

This new edition of this bestselling handbook offers a comprehensive and scholarly overview of the latest research on prejudice, stereotyping, and discrimination. Now in its third edition, the book provides a full update of its highly successful predecessor and features new material on topics such as antisemitism, mental illness stigma, sexual and gender identity prejudice, anti-fat prejudice, politics and prejudice, ableism, evolutionary theory and prejudice, and anti-immigration prejudice. It is an essential text for graduate students, instructors and researchers in social and personality psychology.

The Psychology of Prejudice

Richard Gross

Series: *The Psychology of Everything*

This book explores the topic of prejudice from a psychological perspective, and examines the various forms it can take, from racial jokes to genocide. The author outlines the potential causes of prejudice and discrimination, including personality, social influence, group identity, and evolutionary influences. The final chapter is concerned with prejudice and discrimination reduction and refers to how education, campaigning, and consciousness raising can contribute to greater tolerance and understanding. Including real world examples and topical references, this is the ideal accessible book for students and general readers interested in prejudice.

4TH EDITION

Psychology of Prejudice and Discrimination

Mary E. Kite Ball State University, USA, **Bernard E. Whitley, Jr.** Ball State University, USA, **Lisa S. Wagner**

Psychology of Prejudice and Discrimination provides a comprehensive and compelling overview of what psychological theory and research have to say about the nature, causes, and reduction of prejudice and discrimination. It balances a detailed discussion of theories and selected research with applied examples that ensure the material is relevant to students. The theme of discrimination is developed via discussions of the nature of discrimination, the experience of discrimination, and specific forms of discrimination, including gender, gender identity, sexual orientation, age, ability, and appearance. The concluding theme is the reduction of prejudice.

The Behavior of Social Justice

Applying Behavior Analysis to Understand and Challenge Injustice

Natalie Parks, **Francesca Barbieri**, **Ryan Sain**, **Shawn Thomas Capell**, **Beverly Kirby**

This seminal work provides a framework for the study of social injustices that moves beyond just condemning others for their oppressive behaviors, outlining solutions that help work towards a more socially just society. It outlines the basic principles of applied behavior analysis, considers key tenets of social justice work, and examines how social justice work can be carried out on an individual and a wider institutional level. The Behavior of Social Justice is an essential reading for students and scholars of behavioral sciences, psychology, sociology and education, as well as academics and researchers interested in the study of social justice.
