Age and the Reach of Sociological Imagination

Power, Ideology and the Life Course

Dale Dannefer

Series: Aging and Society

This book integrates foundational principles of critical social science with recent discoveries across disciplines to reframe our understanding of the life course. It offers a fresh, evidence-based synthesis, combining new knowledge with enduring life-course principles and sociological imagination. Beginning with a critical review of established approaches, it introduces compelling evidence from disciplines ranging from biology to economics to history, to demonstrate the power of social forces - which has often gone unrecognized - in shaping aging over the life course, including not only individual health and life chances but also the cultural and ideological significance of age.

Aging A-Z

Concepts Toward Emancipatory Gerontology

Carroll L. Estes, with Nicholas B. DiCarlo

Series: Aging and Society

This book offers an overview of central dilemmas and social problems in critical gerontology and social policy. Crafted in the format of a Glossary of key terms, the authors seek to connect theories of aging to the contemporary period, drawing readers into pivotal debates and issues within and across disciplines. Succinct descriptions of 100-500 words illustrate the interplay and development of the concepts, both materially and symbolically. Within this framework, A - Z underscores the lens of intersectionality in policy analysis, practice, theory, and social change, and contributes to a richer, theoretically integrated understanding of old age and aging.

Aging in the Family

George Dickinson College of Charleston, USA, **Brenda Sanders** College of Charleston, USA

Aging in the Family identifies intergenerational perspectives to understanding the nature of marital satisfaction, singlehood, adult, child-older parent, siblings and grandparents-grandchild relations in later life. The volume will focus on gender, cultural and socioeconomic factors, review societal expectations and highlight the roles of older adults and their functions within family settings. It uses a research into practice focus and is rich in case studies. The book is essential reading for anyone looking for an introduction to the contemporary realities of older adults and family relationships.

Life-Course Implications of US Public Policy

Edited by Janet Wilmoth Syracuse University, New York, USA, **Andrew London**

Series: Society and Aging Series

Public policies are often narrowly focused and targeted legislative or regulatory guidelines. In Life-Course Implications of U.S. Public Policies, the authors encourage others to systematically consider the influence of policies and programs on lives, aging, and the life course, and how the consequences may vary by race/ethnicity, sexual orientation, ability, and social class.

The New Sociology of Ageing

Martin Slattery

Series: Routledge Advances in Sociology

The New Sociology of Ageing explores the challenges and opportunities of ageing as a global force, transforming life in the twenty-first century. This book sets out a new sociological framework to interpret ageing societies. It explores how the 'New Old' – the baby boomer generation – might be mobilised as an agency of social change in transforming later life. This book will be of interest to undergraduate students and early scholars in the social sciences, particularly in sociology, gerontology, social policy, and public health.

2ND EDITION

Celebrity Society

The Struggle for Attention

Robert van Krieken University of Sydney, Australia and University College Dublin, Ireland

On television and in films, in magazines and books, on the internet and in the realm of politics: celebrities of all sorts seem to dominate our attention. *Celebrity Society: The Struggle for Attention* brings new perspectives to our understanding of how the figure of 'the celebrity' is bound up with the structure and dynamics of society, economics and politics. It outlines how the 'celebrification of society' is not just the twentieth-century product of Hollywood and television, but a long-term historical process, beginning with Christian saints, the printing press, theatre and art.

2ND EDITION

Freaks, Geeks, and Cool Kids

Teenagers in an Era of Consumerism, Standardized Tests, and Social Media

Murray Milner University of Virginia, USA

In *Freaks, Geeks, and Cool Kids*, Second Edition, award-winning sociologist Murray Milner tries to understand why teenagers behave the way they do. The first edition drew upon two years of intensive fieldwork in one high school and 300 written interviews about high schools across the country, where he argued that consumer culture greatly impacts the way our youth relate to one another and understand themselves and society. Milner now expands on that concept with a new year of fieldwork fifteen years after he began. He has uncovered in teens a move away from consumerism and towards the cultural capital of information in a time of social media and standardized tests.

Video Games as Culture

Considering the Role and Importance of Video Games in Contemporary Society

Daniel Muriel University of Salford, UK, **Garry Crawford**
University of Salford, UK

Series: Routledge Advances in Sociology

Video games are becoming an increasingly central part of our cultural lives, impacting on various aspects of everyday life such as our consumption, communities, and identity formation. Drawing on new and original empirical data - including interviews with gamers, as well as key representatives from the video game industry, media, education, and cultural sector - Video Games as Culture not only considers contemporary video game culture, but also explores how video games provide important insights into the modern nature of digital and participatory culture, patterns of consumption and identity formation, late-modernity and contemporary political rationalities.

3RD EDITION

Who Lives, Who Dies, Who Decides?

Abortion, Assisted Dying, Capital Punishment, and Torture

**Sheldon Ekland-Olson** University of Texas at Austin, USA*Series: Sociology Re-Wired*

Who Lives, Who Dies, Who Decides? looks at several of the most contentious issues in many societies. The book asks, whose rights are protected? How do these rights and protections change over time, and who makes those decisions? This book explores the fundamentally sociological processes which underlie the quest for morality and justice in human societies. The author sheds light on the social movements and social processes at the root of these seemingly personal moral questions. The third edition contains a new chapter on torture entitled, "Taking Life and Inflicting Suffering."

13TH EDITION

Death, Society, and Human Experience**Robert Kastenbaum, Christopher M. Moreman**

The thirteenth edition of Death, Society, and Human Experience provides a panoramic overview of the ways that we are touched by death and dying, both as individuals and as members of society. Originally written by Robert Kastenbaum, a renowned scholar who developed one of the world's first death education courses, Christopher M. Moreman, who has worked in the field of death studies for almost two decades has updated this edition. In addition to infusing his close areas of focus, both in after life beliefs and experiences and how these might affect how people live their lives, he's weaved in new coverage of current affairs, including the impact of Covid-19 on experiences of death.

U.S. Practice and Policy

**Sara Moorman***Series: Society and Aging Series*

Three-quarters of deaths in the U.S. today occur to people over the age of 65, following chronic illness. This new experience of 'predictable death' has important consequences for the ways in which societies structure their health care systems, laws, and labor markets. Dying in Old Age: US Practice and Policy applies a sociological lens to the end of life, exploring how macrosocial systems and social inequalities interact to affect individual experiences of death in the United States. This book will be of great interest to graduate and advanced undergraduate students in sociology, social work and public health, as well as scholars and policymakers in these areas.

Disability

The Basics

Tom Shakespeare University of East Anglia, UK.

Series: The Basics

Disability: The Basics is an engaging and accessible introduction to disability which explores the broad historical, social, environmental, economic and legal factors which affect the experiences of those living with an impairment or illness in today's society. The book aims to provide readers with an understanding of the lived experiences of disabled people and highlight the problems and gaps that still exist in how society responds to the challenge of disability. This book is suitable for students of disability studies as well as students taking a disability module as part of a wider course within social work, health care, sociology, nursing, policy and media studies.

The Disability Studies Reader

Edited by **Lennard J. Davis** University of Illinois, Chicago, USA

The fifth edition of the Disability Studies Reader addresses the post-identity theoretical landscape by emphasizing questions of interdependency and independence, the human-animal relationship, and issues around the construction or materiality of gender, the body, and sexuality. The collection addresses physical disabilities, but as always explores issues around pain, mental disability, and invisible disabilities as well. Featuring a new generation of scholars who are dealing with the most current issues, the fifth edition continues the Reader's tradition of remaining timely, urgent, and critical.

2ND EDITION

Economic Sociology

An Introduction

Jeffrey K. Hass University of Richmond, USA

Economic Sociology, 2nd edition, shows how economies are more than supply-and-demand curves, individual profit motives, and efficient performance: they are forms of power and structure, grounded in institutions and culture. The volume addresses crucially important economic issues that touch our well-being and justice: the rise and structuring of capitalism; relations between states and economies; economic policies; economies and inequality; and organizations and corporations. Written in a clear and direct style, this textbook will appeal to students and scholars in economic sociology, sociology of work, economics, social policy, political economy and comparative sociology

Homo Ecophagus

A Deep Diagnosis to Save the Earth

Warren M. Hern

World population trends often are passed over lightly in recent discussions of climate change. Warren Hern, M.D. and anthropologist, brings population back to the fore in his analysis of how population growth has already brought the human world to a point where human extinction is foreseeable. Identifying a "malignant ecopathological process," he documents a wide array of human systems activities that are subject to break down if current trends continue. Based on his decades of original research in rural Peru, and studies of African population growth, Hern uses systems analysis to unveil the many threatening processes of current human activities – and point to system-based solutions.

4TH EDITION

Sacred Ecology

Fikret Berkes

Sacred Ecology examines bodies of knowledge held by indigenous and other rural peoples around the world, and asks how we can learn from this knowledge and ways of knowing. Berkes explores the importance of local and indigenous knowledge as a complement to scientific ecology, and its cultural and political significance for indigenous groups themselves. Updates with relevant links for further learning and over 150 new references, the fourth edition gives increased voice to indigenous authors, and reflects the remarkable increase in published local observations of climate change.

4TH EDITION

Society and the Environment

Pragmatic Solutions to Ecological Issues

Michael S Carolan

The fourth edition of *Society and the Environment* centers its discussion on realistic solutions to the problems that persist and examines current controversies within a socio-organizational context, shifting focus away from simply explaining what is wrong with the world around us. Introducing this "pragmatic environmentalism," Carolan discusses the complex pressures and variables that exist where ecology and society collide with further attention given to the social phenomena and structural dynamics driving today's environmental problems, the book concludes with an important reflection on truly sustainable solutions and what constitutes meaningful social change.

Sociology Saves the Planet

An Introduction to Socioecological Thinking and Practice

Thomas Macias

Series: Routledge Explorations in Environmental Studies

Given its focus on inequality and the constituent elements of the social world, sociology has often been accused of negligence regarding the urgency of the world's environmental crisis. *Sociology Save the Planet* corrects this mis-perception by integrating the theme of environment and society to highlight the intrinsic value a sociological perspective brings to our understanding of the current ecological crisis. Highlighting how the environment and society are intrinsically linked, this book argues that environmental concerns need to be treated as a core concept in the study of sociology.

Black Feminist Thought, 30th Anniversary Edition

Knowledge, Consciousness, and the Politics of Empowerment

Patricia Hill Collins

In the first major update to this classic book in many years, Collins traces the history and contours of Black women's ideas and actions to argue that Black feminist thought is the discourse that fosters Black women's survival, persistence, and success against the odds. Through meticulous research that synthesizes the important intellectual work done by Black women, Collins's timely update demonstrates that Black women's ideas and actions are not marginal concerns but rather are central to the future of social justice within democratic societies.

Beauvoir and Politics

A Toolkit

Edited by **Liesbeth Schoonheim**, **Karen Vintges**

Beauvoir and Politics: A Toolkit brings together established and emerging scholars to apply her insights to gender studies, political philosophy, decolonisation, intellectual history, age theory, and critical phenomenology. The essays in this collection start from key concepts in Beauvoir's oeuvre and relate them to contemporary debates, asking how her notion of ambiguity speaks to decolonial freedom struggles; how myths inform our notions of collective, national identities; how masculinity and its violence has reached new levels with the emergence of 'Incels'.

Gender

Sociological Perspectives

Linda L. Lindsey

A landmark publication in the social sciences, Linda Lindsey's Gender is the most comprehensive textbook to explore gender sociologically, as a critical and fundamental dimension of a person's identity, interactions, development, and role and status in society. Ranging in scope from the everyday lived experiences of individuals to the complex patterns and structures of gender that are produced by institutions in our global society, the book reveals how understandings of gender vary across time and place and shift along the intersecting lines of race, ethnicity, culture, sexuality, class and religion.

Gender Revolution

How Electoral Politics and #MeToo are Reshaping Everyday Life

Pamela Aronson, **Matthew R. Fleming**

Gender Revolution carefully examines the profound transformations happening in both public and private arenas of gender relations and draws critical attention to the simultaneous and potent challenges that have risen up in response. Combining analysis of political trends and social movements with intimate insight into personal views about gendered experiences and issues, this book reveals how movement ideas diffuse into broader culture and offers an essential study for readers keen to understand contemporary shifts in gender, society, and culture.

Rape

Challenging Contemporary Thinking – 10 Years On

Edited by **Miranda A. H. Horvath** Miranda Horvath is a Professor at University of Suffolk, UK, **Jennifer M. Brown** Jennifer Brown is a Professor at London School of Economics

This book takes stock of current thinking and research about rape and the way it is handled in practice within the criminal justice system, as well as challenging some of the widely held but inaccurate beliefs about rape. This new edition incorporates old and new contexts where sexual exploitation takes place, identifying some knowledge gaps especially when considering voices of complainants/victims/survivors who are invisible or muted. Numerous new areas of research include the implications arising from #MeToo and Black Lives Matter movements, the limitations of our present criminal justice systems, and radical alternatives to closing the justice gap.

Reproductive Justice and Sexual Rights

Transnational Perspectives

Edited by **Tanya Saroj Bakhru**

This book integrates the politics of sexual and reproductive rights from a transnational feminist perspective. Authors point to the continuing impacts of colonization on women's bodies and sexual and reproductive health; interactions between the state, the law, and sexual and reproductive rights; the ways in which migration shapes women's sexual and reproductive health experiences; and the engagement with transnational politics by women's health organizers. Case studies of Ireland, India, Senegal, Colombia, Mexico, Uganda, and the United States are set in a globalized context of women's rights today.

Edited by **Kamala Kempadoo**, **Elena Shih**

Combatting human trafficking involves ideas about unfreedoms, suffering, and rescue. Yet the discourse has a distinct racialized legacy that is lodged in fears about "white slavery," women in prostitution and migration, and the defilement of white womanhood by the criminal and racialized Other. This book centers the legacies of race and racism in contemporary anti-trafficking work. Contributors offer anti-racist scholarship that sheds light on past and present racial workings of anti-trafficking discourses and practices globally—and how these intersect with gender, citizenship, sexuality, caste, class formations, and the global political economy.

Edited by **Brittany Slatton**, **Carla Brailey**

Series: New Critical Viewpoints on Society

This book goes beyond previous studies by broadening and deepening the frame of social-structural obstructions to women's equality. It examines the continued inequities navigated by women occupying marginalized social positions within a "nexus of power relations." It addresses the experiences of immigrant women of color, aging women, normative gender constraints faced by lesbian and gender non-conforming individuals, religious constraints on women's sexual expression, and religious and ethnic barriers impeding access to equality for women worldwide. With study and discussion questions the book is ideal for courses in women's studies, gender and society, and social inequality.

English Nationalism and its Ghost Towns

Luke Telford

English Nationalism and its Ghost Towns utilises on-the-ground research with working class individuals in a Leave voting locale in Britain, exploring their discontent with politicians, the Labour Party, the European Union, immigration, refugees and the prolonged calls for a second referendum. It situates this sentiment towards society and politics within the decline of the post-war era and the loss of well-paid industrial jobs, increase in non-unionised service employment and the hollowing out of community spirit.

Inequality in a Context of Climate Crisis after COVID

A Complex Realist Approach

David Byrne University of Durham, UK

Series: Complexity in Social Science

Inequality in a Context of Climate Crisis after COVID uses a complex realist approach to examine the crisis of three interconnected problems: economic inequality, climate change, and the COVID-19 pandemic. Contributing to our thinking about dynamic social systems, this text deploys complex realism to understand our trajectory towards increasing inequality. This book will be of interest to students and scholars across the social sciences, in particular to those studying social inequality, climate change, heterodox economics, complex systems, and Master's students in programmes with an applied focus.

2ND EDITION

Power and Inequality

Critical Readings for a New Era

Edited by **Levon Chorbajian** University of Massachusetts, USA

Successfully bringing together accessible readings that cover the broad range of issues of importance to those studying politics and society, this new edition provides a unique mix of theoretical and empirical pieces, such as state and electoral politics, that address both classic issues in political sociology as well as more recent developments, such as globalization. With strong integration of race and gender throughout, this collection offers a coherent analysis of power that reflects the contributions of a variety of critical perspectives, including Marxism, feminism, critical race theory, postmodernism, and power structure theory.

2ND EDITION

Social Inequality and Social Stratification in US Society

Christopher B. Doob Southern Connecticut State University, USA

Social Inequality and Social Stratification in US Society uses a historical and conceptual framework to explain social stratification and social inequality. The historical scope gives context to each issue discussed and allows the reader to understand how each topic has evolved over the course of American history. The authors use qualitative data to help explain socioeconomic issues and connect related topics. Each chapter examines major concepts, so readers can see how an individual's success in stratified settings often relies heavily on their access to valued resources—types of capital which involve finances, schooling, social networking, and cultural competence.

The New Systems Reader

Alternatives to a Failed Economy

Edited by **James Gustave Speth** Senior Fellow and co-chair of the Next System Project at the Democracy Collaborative, **Kathleen Courrier**

Our time is one of crisis and an uncertain future. In the face of climate catastrophe, insurgent populism, deepening inequality, and the decay of institutional legitimacy, confidence in the current system of capitalism is at a historic low, especially among the rising generations. Truly addressing the problems of the 21st century requires going beyond small tweaks to business as usual – it requires "changing the system." But what does this mean? And what would it entail? This Reader highlights some of the most promising answers to these questions, offering the ideas of key thinkers and activists. This provocative book provides an essential conversation about the future we want.

Universal Basic Income

Brian McDonough, **Jessie Bustillos Morales** London Metropolitan University, UK

Series: Key Ideas

Universal basic income is a controversial policy which is causing a stir amongst academics, politicians, journalists and policy makers all over the world. The idea of receiving 'money for nothing', with no strings attached, has for a long time appeared a crazy or radical proposal. But today, this policy is being put into practice. With more and more trials and experiments taking place in different countries, this book provides both the theory and context for making sense of different basic income approaches, examining how the policy can be best implemented. This book is an essential resource for anyone who wishes to get to grips with universal basic income.

3RD EDITION

A Contemporary Introduction to Sociology

Culture and Society in Transition

Jeffrey Alexander Yale University, USA, **Jeffrey C. Alexander**, **Kenneth Thompson**, **Laura Desfor Edles**, **Moshoula Capous-Desyllas**

The influential authors significantly update their popular introductory text that invites students to reflect on their lives in the context of the combustible leap from modern to postmodern life. They authors show how culture is central to understanding many world problems as they challenge readers to confront the problems and possibilities of an era in which the futures of the physical and social environments seem uncertain. As culture rapidly changes in the 21st century, the authors have successfully incorporated these nuances with many important updates on Black Lives Matter, populist politics, ISIS, new social media, trans identities, and more.

Flying Aeroplanes and Other Sociological Tales

An Introduction to Sociology and Research Methods

Brian McDonough London Metropolitan University, UK

Flying Aeroplanes and other Sociological Tales is designed to introduce students to sociology and sociological research. Using a narrative approach to learning, the book draws on a range of real world examples, used to explore a range of issues encountered whilst doing sociological research. By focussing on the practicalities of using the methods first and learning the concepts and theories later, the story-telling approach is a unique way of engaging students. This will be the first textbook to apply this learning technique to the classical concepts and dilemmas of sociology.

Introducing Sociology Using the Stuff of Everyday Life

Josee Johnston, **Kate Cairns**, **Shyon Baumann**

By starting with consumer culture, and the "stuff" it so voluminously produces, this book will encourage students to unpack the back-story behind the stuff they love (and the stuff they hate). Through this process, they will see that the seemingly individual act of shopping – whether that be selecting a tube of toothpaste, or ordering a pair of shoes online – is never a solo experience. Instead, it is a profoundly collective phenomenon that joins the cultural and the material world, individual agents with broader structures, and local realities with global trends."

Introduction to Sociology Through Comedy

Julie Morris

Introduction to Sociology Through Comedy teaches foundational sociological concepts using comedy, first considering the history of sociology before employing examples from comedians – including standalone comedy bits, sketches, characters, and scenes – to illustrate a specific theory, concept, or social phenomenon. The profession of comedy is then used as a case study for the application of sociological concepts, such as impression management, social stratification, racial segregation, deviance, and stigma, allowing readers to learn gain familiarity with the concept while simultaneously practicing its application.

Social Science

An Introduction to the Study of Society

David Colander, **Elgin Hunt**

Now in its 18th edition, Social Science: An Introduction to the Study of Society approaches its study from a common sense perspective, rather than a formalistic perspective more common in social science texts. Readers will see how seemingly diverse disciplines intermingle and connect to one another. The goal of the book is to teach students critical thinking and problem-solving skills that will allow them to approach social issues in an objective and informed way.

The Sociological Quest

An Introduction to the Study of Social Life

**Haydn Aarons** Australian Catholic University, Australia,
Evan Willis La Trobe University, Australia

Starting sociology can be daunting. This user-friendly introduction takes the reader on a quest towards a sociological understanding of the world we live in. Using contemporary examples, *The Sociological Quest* asks what is distinctive about the way sociologists view society. Haydn Aarons and Evan Willis show that they are concerned with the relationships between the individual and society, and that a sociological analysis involves an approach which is historical, cultural, structural, and critical.

Introduction to Sociology

Frank van Tubergen Utrecht University, Netherlands

This textbook presents in a highly accessible and engaging way key knowledge in sociology, introducing students to core concepts, theories, perspectives, methods and findings. Furthermore, it helps students learning to think like a sociologist. It offers students a 'sociological toolkit', a set of useful insights, tools and principles, which will enable them to do research like a sociologist themselves. Being able to think like a sociologist helps students to analyze any sociological topic and any contemporary social problem - even those with which one is yet unfamiliar.

Birth and Death

Experience, Ethics, Politics

Kath Woodward The Open University, UK, **Sophie Woodward** University of Manchester, UK

Usually conceived in opposition to each other – birth as a hopeful beginning, death as an ending – this book brings them into dialogue with each other to argue that both are central to our experiences of being in the world and part of living. Of interest to academics and students in the fields of feminism, phenomenology and the life course, the book will also be of relevance to policy makers in the areas of birth activism and end of life care. Drawing from personal stories and everyday life and publicly contested examples the book will also be of interest to a more general readership as it engages with questions we all at some point will grapple with.

COVID Societies

Theorising the Coronavirus Crisis

Deborah Lupton UNSW, Sydney

COVID Societies presents a compelling and accessible overview of key sociocultural theories that can help us make sense of the diverse, dynamic and complex elements of the COVID crisis. These include discussions of the political economy perspective; biopolitics; risk society and cultures; gender and queer theory; and more-than-human theory. The book provides insights into everyday life around the world as people battled with containing the pandemic and explores the broader historical, social, cultural and political contexts in which these responses have developed.

Inequality Kills Us All

COVID-19's Health Lessons for the World

Stephen Bezruchka

Since the pandemic, the lifespan of the average American has dropped by nearly two years – an unprecedented decline unseen since World War II. But even before Covid-19, U.S. health steadily declined relative to other countries. The complex answer to why the U.S. does so poorly in health measures has at its base one pervasive issue: the U.S. has by far the highest levels of inequality of all the rich countries. Inequality Kills Us All details how economic and social inequality leads to poorer health and higher mortality, and how living in a society with entrenched hierarchies increases the negative effects of illnesses for everyone.

The most comprehensive major academic textbook available on its topic, this classic text presents the most important research studies in the field. The author integrates engaging first-person accounts from patients, physicians, and other health care providers throughout the text. Since its inception, this book's principal goal has been to introduce students to the field of medical sociology and serve as a reference for faculty by presenting the most current ideas, issues, concepts, themes, theories, and research findings in the field. This new edition is heavily revised with updated data and important new additions.

On Vulnerability

A Critical Introduction

Patrick Brown University of Amsterdam, The Netherlands

On Vulnerability maps out an array of perspectives for critically examining the nature of vulnerability, its unequal patterning across different social groups, alongside the everyday social processes which make us vulnerable – interactions, identity and group dynamics. Each chapter provides the reader with a sensitising framework for navigating and questioning what it means to be vulnerable or how people cope amid vulnerability. This book is designed to equip undergraduate and post-graduate students and researchers across the social, health and human sciences, aiding their students on the experiences and structures of vulnerability in our social world.

Social Medicine and the Coming Transformation

Howard Waitzkin, Alina Pérez, Matt Anderson

Students, teachers, practitioners and policy advocates will value this textbook of social medicine, which goes beyond the usual approaches of texts in public health, medical sociology and health policy. The authors use examples to show how principles based on solidarity and mutual aid have enabled people to construct health-promoting social conditions, enhancing the understanding of promoting health through social and individual means; the micro-politics of medical encounters; the social origins and determinants of illness; the influences of race, class, gender, and ethnicity; health praxis, reform, and sociomedical activism; COVID-19 and the worldwide uprisings against racism.

Sociological Theories of Health and Illness

William C Cockerham

This book explains the evolution of theory in medical sociology beginning with the field's origins in medicine to its present-day standing as a major sociological subdiscipline. Sociological theory has an especially important role because it distinguishes medical sociology from virtually all other scientific fields engaged in the study of health and illness. Cockerham focuses on commonly used theories, illustrating their utility in current empirical research. Beginning with classical theory (Marx, Weber, Durkheim) and the neglected founders, along with symbolic interaction and labeling theory, poststructuralism and postmodernism, emphasis is placed on current theories used today.

The COVID-19 Crisis

Social Perspectives

Edited by **Deborah Lupton , Karen Willis**

Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. This edited collection covers a diverse range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). The authors show how social relationships and social institutions were suspended, re-invented or transformed while social differences were brought to the fore.

The Covid-19 Reader

The Science and What It Says About the Social

Edited by **William Cockerham , Geoffrey Cockerham**

This text/reader offers the most important writing to date from the science of COVID-19 and what science says for its spread and social implications. Global in scope, the book tells the story of what happened and how Covid-19 was dealt with. The readings have been carefully selected, introduced, and interpreted for an introductory or graduate student readership by a distinguished medical sociology author team. An accompanying online resource on the book's Routledge web page will update and evolve by providing links to new readings as the science develops.

The Medicalization of Marijuana

Legitimacy, Stigma, and the Patient Experience

Michelle Newhart , William Dolphin

This book takes the first comprehensive look at how patients negotiate incomplete medicalization and what their experiences reveal about our relationship with this controversial plant as it is incorporated into biomedicine. The authors draw upon a qualitative study of patients at midlife to challenge ideas about drug use and reveal how incomplete medicalization creates dilemmas for individuals caught between the competing logics of institutions and individuals.

Forced Migration

Current Issues and Debates

Edited by **Alice Bloch** University of Manchester, UK,
Georgia Dona University of East London, UK

Forced Migration: Current Issues and Debates offers an original contribution to a growing field of study, connecting theoretical ideas and empirical research with policy, practice and the lived experiences of forced migrants. The volume provides a theoretical and empirical underpinning, for students, academics and policy makers, of the main questions being asked in contemporary debates in forced migration.

Global Diasporas

An Introduction

Robin Cohen University of Oxford, UK

Following its initial publication in 1997, Global Diasporas: An Introduction was central to the emergence of diaspora studies and quickly established itself as the leading textbook in the field. This expanded and fully-revised 25th anniversary edition adds two new chapters on incipient diasporas and diaspora engagement while carefully clarifying the changing meanings of the concept of diaspora and incorporating updated statistics and new interpretations seamlessly into the original text. The book has also been made more student-friendly with illustrations, thought-provoking questions, and guides to further reading.

Immigration Detention and Social Harm

The Collateral Impacts of Migrant Incarceration

Edited by **Michelle Peterie** University of Sydney, Australia

Immigration detention has significant negative impacts on detainees' physical, emotional and social health. Though these harms are well documented, as are the conditions and practices that contribute to them, the collateral harms that immigration detention regimes impose have received comparatively little attention. These radiating impacts are the focus of this book. Applying a gender and race lens to immigration detention, Immigration Detention and Social Harm argues that calls for detention reform must be replaced by bolder demands for detention abolition – positing that harm is so embedded in immigration detention systems that reform is no longer possible.

After Globalization

Crisis and Disintegration

Robert K. Schaeffer

In the 1980s, U.S. policy channeled huge new resources into Wall Street which fueled a stock market boom as an engine of capital accumulation and a force for global change. During the decades that followed, globalization triggered regional economic crises and transformed societies, but in 2008 the financial crisis triggered the Great Recession, wrecking the legitimacy of globalization as a development strategy. This book examines the origins of globalization and the political and economic forces that contributed to the disintegration of globalization as a force for change in the modern world. After Globalization explains what happened—and what comes next.

Chomsky for Activists

Noam Chomsky, Charles Derber, Suren Moodliar, Paul Shannon

Series: Universalizing Resistance

Noam Chomsky is the most influential critic of hegemonic US foreign policy, having written best-selling books analyzing the policies of the United States globally. While he is celebrated as a truth-telling critic, his role as a leading activist in social justice movements is less known. Here, Derber et al., interview Chomsky about how his biography as an activist. Chomsky offers intimate details about his experiences, and about his deep convictions about how to create social change. He offers many surprising insights about social movement strategies. The book includes a new Chomsky essay on how movements can confront the Covid-19 crisis and economic meltdown.

Covid-19 and Governance

Crisis Reveals

Edited by **Jan Nederveen Pieterse** University of California, Santa Barbara, USA, **Haeran Lim** Seoul National University, South Korea, **Habibul Khondker** Zayed University, Abu Dhabi

Series: Routledge Studies in Emerging Societies

COVID-19 and Governance focuses on the relationship between governance institutions and approaches to Covid-19 and health outcomes. Organized by region, the book is structured to follow the spread of Covid-19 in the course of 2020, through Asia, the Middle East, Europe, the Americas, and Africa. The analyses explore a number of key themes, including public health systems, government capability, and trust in government – as well as underlying variables of social cohesion and inequality. Engaged and free of jargon, this book speaks to a wide global public – including scholars, students and policymakers – on a topic that has profound and broad appeal.

Getting Through Security

Counterterrorism, Bureaucracy, and a Sense of the Modern

Mark Maguire, David A. Westbrook

With the ongoing controversies about the police use force, it is more timely than ever to examine the elite and secretive world of counterterrorism policing. Getting Through Security offers this look behind the scenes of global security structures, in a world haunted by the knowledge that intelligence will fail. Based on extraordinary access to covert counterterrorism programs, the book covers topics from European airports to African bars to explore counterterrorism today. Maguire and Westbrook reflect on what these practices mean for the bureaucratic state and its violence, and offer suggestions for the perennial challenge to secure not just modern life, but humane politics.

Internationalism or Extinction

Edited by **Charles Derber, Noam Chomsky, Suren Moodliar, Paul Shannon**

Series: Universalizing Resistance

In his new book Noam Chomsky writes cogently about the threats to planetary survival that are of growing alarm today. Chomsky uniquely traces the duality of threats from nuclear weapons and from climate change—including how the concerns emerged and evolved, and how the threats can interact with one another. The introduction and accompanying interviews place this dual threat in a framework of unprecedented corporate global power domination that has overtaken nation states' ability to control the future and preserve the planet.

Moving Beyond Fear

Upending the Security Tales in Capitalism, Fascism, and Democracy

Charles Derber, Yale R. Magrass University of Massachusetts, Dartmouth

Series: *Universalizing Resistance*

While national security stories often report real threats, leaders' narratives are much about legitimating the power of rulers and the political/economic system that brought them to power. The authors offer a penetrating examination across history and societies, revealing a great irony about security stories: historically they increase insecurity, imperiling citizens and nation. In the U.S., the contradiction is especially acute, as security stories told by Trump divide U.S. citizens against one another. The book builds from an analysis of the dangers of reigning security stories to a new paradigm of true security that is less threatening to citizens and to humans across the planet.

Power, Politics, and Society

An Introduction to Political Sociology

Betty Dobratz Iowa State University, USA, **Lisa Waldner**, **Timothy Buzzell** Baker University, USA

Power, Politics & Society: An Introduction to Political Sociology discusses how sociologists have organized the study of politics into conceptual frameworks, and how each of these frameworks foster a sociological perspective on power and politics in society. This includes discussing how these frameworks can be applied to understanding current issues and other "real life" aspects of politics. The authors connect with students by engaging them in activities where they complete their own applications of theory, hypothesis testing, and forms of inquiry.

The Corporate Rich and the Power Elite in the Twentieth Century

How They Won, Why Liberals and Labor Lost

G. William Domhoff

This book demonstrates exactly how the corporate rich (the owners and managers of large incorporated income-producing properties) developed and implemented the policies and government structures that allowed them to dominate the United States in the twentieth century. Domhoff frames his analysis within three historical developments, he argues, that have made overall domination possible: the successful resistance of unions, the initiation and subsequent limitation of government social programs, and the creation of a postwar international economic system. A remarkable look into nature of power in America during the 20th century, with added significance for the current era.

The Global Rise of Authoritarianism in the 21st Century

Crisis of Neoliberal Globalization and the Nationalist Response

Edited by **Berch Berberoglu**

Series: *Globalization, Crises, and Change*

As the crisis of neoliberal global capitalism unfolds, and as we move to the brink of another economic disaster and the threat of war, global capitalism is once again resorting to authoritarianism and fascism to maintain its power. This book addresses this vital question in comparative-historical perspective and provides a series of case studies that include Russia, China, India, Turkey, the Philippines, Poland, Hungary, and other states in Latin America, Asia, Africa, and the Middle East, as well as the United States, and serves as a warning against the impending rise of fascism across the world in the 21st century.

The Rich Get Richer and the Poor Get Prison

Thinking Critically About Class and Criminal Justice

Jeffrey Reiman American University, USA, **Paul Leighton** Eastern Michigan University, Ypsilanti, USA

For 40 years, this classic text has taken the issue of economic inequality seriously and asked: Why are our prisons filled with the poor? Why aren't the tools of the criminal justice system being used to protect Americans from predatory business practices and to punish well-off people who cause widespread harm? This new edition continues to engage readers in important exercises of critical thinking: Why has the U.S. relied so heavily on tough crime policies despite evidence of their limited effectiveness, and how much of the decline in crime rates can be attributed to them?

Welfare and the Welfare State

Central Issues Now and in the Future

Bent Greve Roskilde University, Denmark

This book provides an overview of the central concepts in the light of a state, market and civil society lenses. It also provides the reader with knowledge on distribution in societies and how this interacts and influences different groups and their position in society. There are also chapters dealing specifically with central sectors in the welfare states such as health, long-term care and education. The book uses a comparative approach as this better enables one to understand one's own country welfare, as well as helping to underline and see the linkages to the impact of global and regional issues on welfare states and their development.

8TH EDITION

Who Rules America?

The Corporate Rich, White Nationalist Republicans, and Inclusionary Democrats in the 2020s

G William Domhoff

At this time when voting rights are endangered, this significantly updated edition shows precisely how the top 1% of the population who own 43% of all financial wealth dominate governmental decision-making. Domhoff details how the corporate rich and the power dominate US policy, despite constant challenges from inclusionary alliances and from Democrats. The book is updated to explain dark attempts to influence public opinion, the machinations of the climate-denial network, and how minority rule and an ultraconservative Supreme Court can now undermine other policies. Despite this concentrated power, it will be the other 99%, not the top 1%, who will decide the fate of the US.

Black Feminist Thought, 30th Anniversary Edition

Knowledge, Consciousness, and the Politics of Empowerment

Patricia Hill Collins

In the first major update to this classic book in many years, Collins traces the history and contours of Black women's ideas and actions to argue that Black feminist thought is the discourse that fosters Black women's survival, persistence, and success against the odds. Through meticulous research that synthesizes the important intellectual work done by Black women, Collins's timely update demonstrates that Black women's ideas and actions are not marginal concerns but rather are central to the future of social justice within democratic societies.

Myth and Reality in the U.S. Immigration Debate

Greg Prieto University of San Diego

Series: Framing 21st Century Social Issues

"What part of illegal don't you understand?" This commonsense slogan rings true, but is at odds with the evidence. Myth and Reality in the U.S. Immigration Debate separates fact from fiction in this short primer on the empirical impact of immigration on U.S. society. In six short chapters that review the conceptual, historical, economic, global, legal, and racial dimensions of immigration to the United States, Prieto argues that unauthorized immigration is a problem of policy, not people. This text will serve as an introduction to the study of immigration for those who wish to engage in a sober and compassionate dialogue about the role of immigrants in the United States.

Dismantling the Racism Machine

A Manual and Toolbox

Karen Gaffney

Dismantling the Racism Machine: A Manual and Toolbox uses the metaphor of a machine to illustrate how systemic racism operates. The inner-workings of the Racism Machine perpetuate structural racism, from the criminal justice system to education to the media. The Racism Machine is devastatingly effective because it obscures these inner-workings of systemic racism by diverting attention towards myths it creates. While seeing the inner-workings of the Machine can be overwhelming at first, it can also provide two important things: hope and responsibility. This book's many examples of resistance to the will show that change is possible.

Race, Ethnicity and Social Theory

John Solomos University of Warwick, UK

Race, Ethnicity and Social Theory provides a critical analysis of the main areas of scholarly research and debate about racial and ethnic relations over the past few decades. The book covers substantive areas of scholarly debate in this fast-changing field, including race and social relations, identities and the construction of the racial other, feminism and race, the relationship between race and nationalism, antisemitism, the evolution of new forms of racism, race and political representation and, more generally, the changing debates about race and ethnicity in our global environment.

Racial Formation in the United States

Michael Omi University of California, Berkeley, USA,
Howard Winant University of California, Santa Barbara, USA

Twenty years since the publication of the Second Edition and more than thirty years since the publication of the original book, *Racial Formation in the United States* now arrives with each chapter radically revised and rewritten by authors Michael Omi and Howard Winant, but the overall purpose and vision of this classic remains the same: Omi and Winant provide an account of how concepts of race are created and transformed, how they become the focus of political conflict, and how they come to shape and permeate both identities and institutions.

Revealing Britain's Systemic Racism

The Case of Meghan Markle and the Royal Family

Kimberley Ducey, **Joe Feagin**

By questioning the long-held, but largely anecdotal beliefs about racial progressiveness in the UK, Kimberley Ducey and Joe Feagin provide an original counter-narrative about how Markle's experiences as a biracial member of the royal family can help illumine contemporary forms of racism in Britain. The book identifies and documents the plethora of ways systemic racism continues to shape ecological spaces in the UK, challenging romanticized notions of racial inclusivity by applying Feagin's long-established work, aiming to make a unique and significant contribution to literature in sociology and in various other disciplines.

Sociology and the Holocaust

A Discipline Grapples with History

Ronald J. Berger

There has been substantial sociological work on the Holocaust, although this scholarship has often been ignored or neglected, including in the discipline of sociology itself. *Sociology and the Holocaust* brings this scholarly tradition to light, and in doing so offers a comprehensive synthesis of the vast historical and social science literature on the before, during, and after of the Holocaust, a tour d'horizon from an explicitly sociological perspective. As such, the aim of the book is not simply to describe the chronology of events that culminated in the deaths of six million Jews, but to understand these events and the ongoing legacy of the Holocaust sociologically.

Systemic Racism in America

Sociological Theory, Education Inequality, and Social Change

Edited by **Rashawn Ray**, Hoda Mahmoudi University of Maryland, USA

Racist policies are identified as "opportunity killers" and the disparities created by them often have racism sustained through race-neutral policies. Structural Racism in America: Sociological Theory, Education Inequality, and Social Change situates our contemporary moment within a historical framework, and works to identify forms, occurrences, and consequences of racism as well as argue for concrete solutions to address it.

The New Black Sociologists

Historical and Contemporary Perspectives

Edited by **Marcus A. Hunter**

Series: *Sociology Re-Wired*

The New Black Sociologists follows in the footsteps of 1974's pioneering text Black Sociologists: Historical and Contemporary Perspectives, by tracing the organization of its forbearer in key thematic ways. This new collection of essays revisit the legacies of significant Black scholars including James E. Blackwell, William Julius Wilson, Joyce Ladner, and Mary Pattillo, but also extends coverage to include overlooked figures like Audre Lorde, Ida B. Wells, James Baldwin and August Wilson - whose lives and work have inspired new generations of Black sociologists on contemporary issues of racial segregation, feminism, religiosity, class, inequality and urban studies.

The Spanish Language in the United States

Rootedness, Racialization, and Resistance

Edited by **José Cobas**, Bonnie Urciuoli, Joe Feagin, Daniel Delgado

Series: *New Critical Viewpoints on Society*

This book addresses the rootedness of Spanish in the US, its racialization, and Spanish-speakers' resistance against racialization. This novel approach challenges the "foreigner" status of Spanish and shows that racialization victims do not take their oppression meekly. It traces the rootedness of Spanish since the 1500's, when the Spanish empire began the settlement of the new land, to today where 39 million U.S. Latinos speak Spanish at home. Authors show how whites categorize Spanish speaking in ways that denigrate the non-standard language habits of Spanish speakers—including in schools—highlighting ways of overcoming racism.

The White Racial Frame

Centuries of Racial Framing and Counter-Framing

Joe R. Feagin Texas A&M University, USA

Deeply imbedded in American minds and institutions, the white racial frame has for centuries functioned as a broad worldview essential to the systemic racism in the United States. Feagin examines how and why this frame emerged in North America and evolved over time, which racial groups are framed within it, how it has operated for white Americans and Americans of color, and how the latter have long responded with strategies of resistance. In this new edition is a discussion of the impact of the white frame on popular culture and a discussion of the white racial frame's significant impacts on public policymaking, immigration, the environment, health care, and crime.

Tropes of Intolerance

Pride, Prejudice, and the Politics of Fear

Peter Rose

Tropes of intolerance is a Baedeker of bigotry, a short course on racism, xenophobia, nationalism, anti-Semitism and Islamophobia. Focusing on the ideological wars within America and Europe today, sociologist Peter Rose addresses the meaning of pride and prejudice, the emblems of enmity – words, signs, symbols and other chauvinistic expressions, the role of authoritarian leadership and the populist-oriented exploitation of anxiety directed to mobilize vulnerable people, sometimes called "the once-hads." He addresses the rise and fall of American nativism and its resurgence in the age of Donald Trump.

White Minority Nation

Past, Present and Future

Joe R. Feagin Texas A&M University, USA

Written by a leading scholar of US racial studies, this is the only book to comprehensively analyze the societal implications of the U.S. becoming a white minority nation as demographic changes bring people of color into the majority. The changes portend important political changes, as seen in recent American elections, with more change to come, leading to the prospects of further backlash and/or policy changes to ensure the political, economic, and legal rights of diverse populations. Many of Feagin's previous books are academic bestsellers.

Religion and Change in Australia

Adam Possamai Western Sydney University, **David Tittensor** Deakin University

This timely book offers a panoramic overview of the enduring significance of religion in contemporary Australian society. Applying sociological perspectives and contemporary theories of religion in society, it challenges conventional assumptions around the extent of secularisation in Australia and instead argues that religious institutions, groups, and individuals have proved remarkably adaptable to social change and continue to play a major role in Australian life. In doing so, it explores how religion intersects with a wide range of other contemporary issues, including politics, race, migration, gender, and new media.

Sociology of Religion

Overview and Analysis of Contemporary Religion

Abby Day Goldsmiths, University of London, UK

The first sociology of religion textbook to begin the task of diversifying and decolonizing the study of religion, *Sociology of Religion* develops a sociological frame that draws together the personal, political and public, showing how religion – its origins, development and changes – is understood as a social institution, influenced by and influencing wider social structures. This book is essential reading for undergraduate and postgraduate students exploring the sociology of religion, religion and society, religious studies, theology, globalisation, and human geography.

Sociology of Religion

A Reader

Edited by **William Mirola** , **Michael Emerson** , **Susanne Monahan**

Sociology of Religion is a collection that seeks to explore the relationship between the structure and culture of religion and various elements of social life in the United States. Based on both classic and contemporary research in the sociology of religion, this new, third edition highlights a variety of research methods and theoretical approaches to studying the sociological elements of religion. It explores the ways in which religious values, beliefs and practices shape the world outside of church, synagogue, or mosque walls while simultaneously being shaped by the non-religious forces operating in that world.

Rural Communities

Legacy + Change

Cornelia Butler Flora, Jan L. Flora, Stephen P. Gasteyer

This book uses its unique Community Capitals framework to examine how America's diverse rural communities use their various capitals (natural, cultural, human, social, political, financial, and built) to address the modern challenges that face them. Each chapter opens with a case study of a community facing a particular challenge, and is followed by a comprehensive discussion of sociological concepts to be applied to understanding the case. This narrative, topical approach makes the book accessible and engaging for undergraduate students, while its integrative approach provides them with a framework for understanding rural society based on the concepts and explanations of social science.

Cognitive Science and the Social

A Primer

Stephen Turner University of South Florida

Many new findings in neuroscience, such as the discovery of mirror neurons, have been ambiguous, controversial, and difficult to integrate into the social sciences. These and many other findings pose direct challenges to standard social science. Meantime facts of social science, like linguistic and moral diversity, pose a significant challenge to standard neuroscience approaches. Turner explores the critical issues that relate to the social aspects of cognition. Introducing a wide range of conceptual problems, he points to preliminary conclusions, especially about how processes like socialization need to be understood in cognitive science friendly terms.

Culture, Curiosity and Communication in Scientific Discovery

The Eye in Ideas

Nigel Sanitt

Many aspects of research activity in science are opaque to outsiders and this opacity infects how connections are made between science and other disciplines. The aim of Culture, Curiosity and Communication in Scientific Discovery is to try to shine a light through the mist of scientific research by way of examples taken from the sciences, social sciences and the humanities. Nigel Sanitt explains that we have created a mythical objective world, where we pretend that opinions and values are generated by data alone and not by human beings. This volume is a radical interpretation of how science works and aims to change the way scientists and non-scientists think about science.

Making Sense of Expertise

Cases from Law, Medicine, Journalism, Covid-19, and Climate Change

Reiner Grundmann University of Nottingham, UK

Chomsky for Activists

Noam Chomsky , Charles Derber , Suren Moodliar , Paul Shannon

Series: Universalizing Resistance

Noam Chomsky is the most influential critic of hegemonic US foreign policy, having written best-selling books analyzing the policies of the United States globally. While he is celebrated as a truth-telling critic, his role as a leading activist in social justice movements is less known. Here, Derber et al., interview Chomsky about how his biography as an activist. Chomsky offers intimate details about his experiences, and about his deep convictions about how to create social change. He offers many surprising insights about social movement strategies. The book includes a new Chomsky essay on how movements can confront the Covid-19 crisis and economic meltdown.

Reading and Writing for Civic Literacy

The Critical Citizen's Guide to Argumentative Rhetoric, Brief Edition

Donald Lazere , Anne-Marie Womack

This textbook is based on critical reading and writing for a new era of disputes over race, gender, and economic inequality, compounded by the escalating polarization of American public rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it trains students to locate logical fallacies and other weaknesses in argumentation. Exercises analyzing readings help students understand the ideological positions and rhetoric that underlies opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media are foregrounded as topics for rhetorical analysis.

Contemporary Social Problems in the UK

A Comprehensive Overview

Edited by **Selwyn Stanley** Edge Hill University, UK

Explores a wide range of social problems in the UK using a range of psychosocial theories to generate an understanding of various causal factors and to examine the linkages between different social problems. Government policy and legislation, remedial measures, preventive approaches, and strategies of intervention are also considered. Each accessible chapter deals with a particular social problem and has been penned by an expert in that topic. The end-of-chapter content includes supplementary reading, useful topic related websites besides a quiz and individual/group activities to generate discussion and stimulate learning.

Societal Problems as Public Bads

Nan de Graaf Nuffield College, University of Oxford, UK,
Dingeman Wiertz Nuffield College, University of Oxford, UK

Corruption, crime, economic inequality, religious fundamentalism, financial crises, environmental degradation, population ageing, gender inequality, large-scale migration... This book tackles many of the most pressing problems facing societies today. The authors demonstrate that similar social mechanisms lie behind many of these seemingly disparate problems. Employing a bold multidisciplinary approach, the authors draw on insights from across the social sciences, including sociology, economics, anthropology, criminology and psychology.

Individual and Society

Sociological Social Psychology

Lizabeth A. Crawford , Katherine B. Novak

Unlike other texts for undergraduate sociological social psychology courses, *Individual and Society* covers each of the three research traditions in sociological social psychology—symbolic interactionism, social structure and personality, and group processes and structures. With this approach, the authors make clear the link between sociological social psychology, theory, and methodology. Students will gain a better understanding of how and why social psychologists trained in sociology ask particular kinds of questions; the types of research they are involved in; and how their findings have been, or can be, applied to contemporary societal patterns and problems.

Effective Writing for Sociology

A Guide for Researchers and Students

**Ben Kail, Robert Kail**

Writing well is an essential skill for sociologists, but few books help students learn to write well. Designed to help students produce a manuscript that is clear, concise, and compelling, Effective Writing for Sociology demonstrates and deconstructs what makes effective writing and how best to communicate scholarly ideas. Ben Lennox Kail and Robert V. Kail's book is essential reading in courses on research methods, qualitative methods, quantitative methods, sociological writing, and social science writing in allied disciplines such as education, criminology, health, and all research fields.

Pulling Back the Curtain on Qualitative Research

William Thompson Texas A&M University Commerce, USA, **Mica Thompson** Texas A&M University Commerce, USA

Pulling Back the Curtain on Qualitative Research provides a practical, in-depth guide to conducting qualitative sociological field research. Each chapter centers a different research study conducted by the authors, and in their reflection, they offer step-by-step guidance on the different components that make up a successful study. Emphasis is given to important ethical considerations that arise in research studies and the authors describe in detail the unexpected findings that readers should brace for while conducting their own fieldwork. Pairing tangible advice with meditative musings, this book will be a wonderful read for students and aspiring scholars in the social sciences.

Social Research Methods by Example

Applications in the Modern World

Yasemin Besen-Cassino, Dan Cassino Fairleigh Dickinson University

This book sharpens students' understanding of the research process and the essential methods that researchers use to perform their work on the cutting edge of the social sciences. The new edition features updated examples across the chapters, reflecting new directions within the social sciences and both a diversity of voices and research output in recent years. The authors also expand their chapter overviews in key areas and weave discussion of validity and ethics carefully into the fabric of each chapter's focus. Written not only to introduce students to the basic principles of social science research, this book provides readers with a toolkit to carry out the process on their own.

Social Statistics

Managing Data, Conducting Analyses, Presenting Results

Thomas J. Linneman The College of William and Mary, USA

Series: Sociology Re-Wired

With a clear, engaging writing style and fascinating examples using a variety of real data, this text covers the contemporary statistical techniques that students will encounter in the world of social research. It covers these techniques at an introductory level and carefully guides students through increasingly complex examples without intimidating them. Recurrent examples using four timely topics – health, immigration, income inequality, and everyday harassment – help students understand how the techniques fit together, and how to use the techniques in combination with one another. Author created web resource accompanies the text.

The Research Event

Towards Prospective Methodologies in Sociology

Mike Michael University of Exeter, UK

A distinctive and novel contribution, *The Research Event* introduces and expands on the notion of the 'research event', equipping the researcher to connect with the changing landscape of social scientific research. The book aims to provide social science researchers with practical and conceptual heuristics for the 'opening up' of research practice so that it better engages with, but also better provokes, the possibilities that are entailed in the doing of social research. It will be a key reading in advanced BA and MA courses on alternative research methodologies, or a supplementary reading on more traditional courses aiming to include emerging methods.

Capitalism and Its Uncertain Future

Kristin Plys, Charles Lemert

This engaging book provides new perspectives on well-known theorists from Adam Smith, and Frantz Fanon, to Gilles Deleuze, while also introducing readers to lesser known theorists such as Lucia Sanchez Saornil, Mohammad Ali El Hammi. It examines theories of capitalism from four perspectives: macro-historical theories of the origins of capitalism; postcolonial theories of capitalism that situate capitalism as seen from the Global South; theories of capitalism from the perspective of labor; and prospective theories of capitalism's uncertain future. Provocative yet accessible, the book will be of interest to anyone who wants to explore where we've been and where we're headed.

Charisma

Micro-sociology of Power and Influence

Randall Collins

What is charisma? And how does it generate influence and power? World-renowned sociologist Randall Collins explores these and many other questions in a highly readable exploration of the various forms of charisma and how charisma elevated Jesus, Cleopatra, Lawrence of Arabia, Hitler, Churchill, Franklin and Eleanor Roosevelt, Madame Mao Zedong and others. He explores four types of charisma: frontstage, backstage, success-magic, and reputational charisma. The book exemplifies Collin's sophisticated micro-sociology in accessible and compelling prose, quietly building subtle matrices of analysis that show how sociology unveils hidden discoveries.

Classical and Contemporary Social Theory

Investigation and Application

Tim Delaney

The second edition of Classical and Contemporary Social Theory provides wraparound coverage of the classical social theorists and influential sociological schools of thought in the contemporary period. Delaney revisits the classical period and highlights the special contributions of American social theorists and their impact on the diversity of thought leading into the contemporary era. He attends to later schools of thought and weaves in important updates related to critical race theory and globalization. With updated context and further applications, Classical and Contemporary Social Theory is a perfect addition to combined courses in social theory.

Explosive Conflict

Time-Dynamics of Violence

Randall Collins

What determines how long conflict lasts and how much damage it does? Inequality and hostility are not enough to explain when and where violence breaks out. Ranging from the three months of nationalism and hysteria after 9/11 to the assault on the Capitol in 2021, Collins shows what makes some protests more violent than others and why some revolutions are swift and non-violent tipping-points while others devolve into lengthy civil wars. Nevertheless, Collins offers some optimistic discoveries on clues to mass rampages and heading off police atrocities, with practical lessons from time-dynamics of violence.

Freedom, Justice, and Decolonization

Lewis Gordon

Lewis R. Gordon interrogates the trail from colonized philosophy to re-imagining liberation and revolution to critical challenges raised by Afropessimism, theodicy, and looming catastrophe. Raising an urgent call for dignifying and urgent acts of political commitment, Freedom, Justice, and Decolonization examines what philosophy means in African philosophy, the role of liberation in decolonial thought, and the unshackling of political philosophy from the liberal moral theory to set the stage for the decolonization of justice and normative life.

Intersectionality

Foundations and Frontiers

Edited by Patrick R. Grzanka, Patrick R. Grzanka

Intersectionality: A Foundations and Frontiers Reader is an accessible, primary-source driven exploration of intersectionality in sociology, women's and gender studies, and related fields. The book maps the origins of the concept, particularly in Black feminist thought, opens the discourse to challenges and applications across disciplines and outside academia, and explores the leading edges of scholarship to reveal important new directions for inquiry and activism.

Left Theory and the Alt-Right

Edited by Jeffrey R. Di Leo University of Houston-Victoria, USA,
Sophia A. McClennen

The alt-right movement in the US has actively been endorsing the use of left theory to achieve its ends—and with varying degrees of success. This book asks if the alt-right's reference of left theory is just bad reading, or are there troubling ways that certain types of left theory encourage such interpretations? Are there lessons to be learned in what can often appear as an overlapping desire to deconstruct concepts like truth, justice, freedom and democracy? Drawing on the longer history of right-wing readings of left theory, this volume seeks to unpack these recent developments and consider their impact on the future of theory.

On Human Nature

The Biology and Sociology of What Made Us Human

Jonathan H. Turner

Series: Evolutionary Analysis in the Social Sciences

Beginning with pressures on hominins to become bipedal as they were forced from forest canopies to open habitats, human nature is an inherited legacy shaped by the pressures that made humans' hominin ancestors more social and group oriented. Combining sociology, evolutionary biology, cladistic biology, and comparative neuroanatomy to examine human nature, Turner sees human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain, speech, and culture.

7TH EDITION

Social Theory

The Multicultural, Global, and Classic Readings

Charles Lemert

Social Theory is more than a reader. Feminists, race theorists, decolonizing leaders, and others are thoughtfully introduced by Charles Lemert's commentaries. This book has always sought to keep up with the new while respecting the old. When the book first appeared it was a collection of those who have changed how we think about social things. Today, as the world is threatened by a wave of anti-democratic movements, Social Theory adds a new section to remind us of the origins of democratic values in 1700s. A new conclusion focuses on how, in the 2020s, social theorists are rethinking the world in order better to understand and resist anti-democratic movements.

All Media Are Social

Sociological Perspectives on Mass Media

Andrew M. Lindner Skidmore College, USA, **Stephen R. Barnard**

Series: Sociology Re-Wired

In this introduction to media sociology, Lindner and Barnard encourage readers to think critically about big media companies, state-media relations, developments in journalism, representations of race, class, gender, and sexuality, and what social media may or may not be doing to our brains. Exploring pressing questions by carefully excavating the results of classic and contemporary social studies, *All Media Are Social* offers an accessibly-written analysis of enduring patterns and the newest developments in mass media. With strong emphases on theory and methods, Lindner and Barnard provide the readers with the tools to better understand the ever-changing media landscape.

Celluloid Mischief

Deviance and Crime on the Silver Screen

Erich Goode

The book examines the portrayal of wrongdoing and 'deviant' behavior in film. The premise is that films are material products of both individual and collective imagination that reflect the values and norms of the society that produce them. Motion pictures embody information about the social world; they constitute a universe of raw particulars that await excavation and analysis. By applying the appropriate approach, what happens on the screen can guide us to an understanding of society and culture. Using postwar and contemporary Hollywood cinema as case studies, this book demonstrates the complex and evolving nature of modern America's social, economic, and political values.

Social Media Freaks

Digital Identity in the Network Society

Dustin Kidd

Social media has been transforming American and global cultural life for over a decade. At the core of *Social Media Freaks* is the question: Does social media reproduce inequalities or is it a tool for subverting them? *Social Media Freaks* presents a virtual ethnography of social media, focusing on issues of identity and inequality along five dimensions—race, class, gender, sexuality, and disability. It presents original and secondary findings, while also utilizing social theory to explain the dynamics of social media. It teaches readers how to engage social media as a tool for social activism while also examining the limits of social media's value in the quest for social change.

Shifting Categories of Work

Unsettling the Ways We Think about Jobs, Labor, and Activities

Edited by **Lisa Herzog , Bénédicte Zimmermann**

What do human beings do when they work, how is work organized, and what are its economic, social, political, biographical, ecological effects? We cannot answer these questions without drawing on the numerous categories that we use to describe work, such as "skilled" or "unskilled" work, "domestic work" or "wage labor," "gig work" or "platform work." But where do these categories come from, what are their histories, how do they differ between countries, and how are they evolving? *Shifting Categories of Work* asks these questions, illuminating the many ways in which our societies categorize work.

The Urban Sociology Reader

Edited by **Jan Lin**, **Christopher Mele** University at Buffalo, State University of New York, USA

Series: *Routledge Urban Reader Series*

Drawing together seminal selections covering the nineteenth to the twenty-first centuries, this Reader includes forty significant writings from eminent names such as Simmel, Wirth, Park, Burgess, Zukin, Sassen, Smith and Castells. Selections are predominantly sociological, but some readings cross disciplinary boundaries. Providing an essential resource for students of urban studies, this book brings together important but, till now, widely dispersed writings. Editorial commentaries precede each entry; introducing the text, demonstrating its significance, and outlining the issues surrounding its topic, whilst the associated bibliography enables deeper investigations.
